Mason, James Stewart, 2005-02-09 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics African Americans in the U S Economy represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation s most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike      **African Americans in the U.S. Economy** Cecilia Conrad, 2005 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics African Americans in the U S Economy represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation s most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike      **Race, Politics, and Economic Development** James Jennings, 1992 In April 1992 the world witnessed

a renewal in South Central Los Angeles of the urban violence that exploded over a quarter of a century earlier As in 1965 the spark that ignited the firestorm was Black rage over police brutality But in both eras the tinder was prepared by decades of social neglect and political disenfranchisement that have left the predominantly non white urban poor trapped and virtually without hope Race Politics and Economic Development strips away the veneer of mass media images to examine the underlying causes of Black urban poverty and to recommend means to escape the seemingly endless cycle of retributive violence that it spawns The book brings together Black activists and scholars including two former mayors of American cities to analyse the theoretical and practical problems currently facing the Black community in the United States The essays collected here are dominated by three key themes that political influence power and wealth are major factors in determining social welfare policies directed at Blacks the poor and the working class that both liberal and conservative policies over the last fifty years are no longer effective in alleviating a growing human service crisis among Blacks and that the political mobilization of impoverished sectors of the Black community is absolutely critical in resolving the problem of poverty in urban America Drawing on new work in the social sciences political theory and economics and also on the contributors activist experiences these essays represent a pathbreaking new agenda for the participation of grassroots Black leaders in developing and implementing urban policy Contributors Jeremiah Cotton Julianne Malveaux Mack H Jones Charles P Henry Walter Stafford William Fletcher Jr Eugene Newport Sheila Ards Jacqueline Pope Keith Jennings Lloyd Hogan Richard Hatcher
