*Slavery and the Forensic Theatricality of Human Rights in the Spanish Empire* Karen-Margrethe Simonsen, 2023-06-24  
This book is a study of the forensic theatricality of human rights claims in literary texts about slavery in the sixteenth and the nineteenth century in the Spanish Empire. The book centers on the question how do literary texts use theatrical multisensorial strategies to denunciate the violence against enslaved people and make a claim for their rights. The Spanish context is particularly interesting because of its early tradition of human rights thinking in the Salamanca School especially Bartolom de Las Casas developed in relation to slavery and colonialism. Taking its point of departure in forensic aesthetics the book analyzes five forms of non narrative theatricality: allegorical, carnivalesque, tragicomic, melodramatic and tragic.

*Social Issues in Living Color* Arthur W. Blume, 2017-02-16  
Offering fresh and exciting approaches to solving global problems, this book creatively views challenging social issues through the lens of racial and ethnic psychology. As the demographic makeup of the American population continues to evolve, understanding and addressing the psychological needs of ethnic minorities in the United States becomes more important to the overall health and well being of society. This three volume set is the first publication to explicitly tackle social issues from the perspective of racial and ethnic psychology. It uniquely presents racial and ethnic psychological perspectives on topics such as media, criminal justice, racism, climate change, gender bias, and health and mental health disparities. Volume one introduces readers to the basic scientific concepts of racial and ethnic minority psychology and then examines the intersectionality of race, ethnicity, gender, and sexual orientation. It also addresses how race and ethnicity affect communication styles, leadership styles, and media. The second volume discusses the experiences of individuals within racial and ethnic minorities, including overt racism, covert racism, and colonialism, and addresses how ethnic minority psychology plays a role in our educational system, poverty, global climate change, and sustainability. The third volume covers ethics in health and research, considers the causes of health and mental health disparities, and identifies diversity initiatives that can improve the health and well being of all citizens, not just racial and ethnic minority citizens.

*Killing African Americans* Noel A. Cazenave, 2018-05-16  
Killing African Americans examines the pervasive disproportionate and persistent police and vigilante killings of African Americans in the United States as a racial control mechanism that sustains the racial control system of systemic racism. Noel A. Cazenave's well researched and conceptualized historical sociological study is one of the first books to focus exclusively on those killings and to treat them as political violence. Few issues have received as much conventional and social media attention in the United States over the past few years or have for decades now sparked so many protests and so often strained race relations to a near breaking point. Because of both its timely and its enduring relevance, *Killing African Americans* can reach a large audience composed not only of students and scholars but also of Movement for Black Lives activists, politicians, public policy analysts, concerned police officers, and other criminal justice professionals and anyone else eager to better understand this American nightmare.

and its solutions from a progressive and informed African American perspective State-Sanctioned Violence Melvin Delgado, 2020-03-16 The helping professions and social scientists traditionally seek concepts and paradigms that can be used in shaping research and services focused on marginalized populations in the United States Various perspectives have garnered attention across disciplines with intersectionality as a recent salient example However state sanctioned violence built upon the foundation established by Intersectionality introduces a purposeful socio political agenda that is carried out by various levels of government to subjugate a group due to its beliefs physical characteristics and or social circumstances This book provides a conceptual foundation on state sanctioned violence critiques how this perspective holds relevance for social work research education and practice examines specific examples of how and where state sanctioned violence is manifested and projects potential developments into the near future

**The Politics of Weight** Amelia Greta Morris, 2019-05-15 This book speaks to the politics of weight through an interrogation of dieting power and the body In feminist theory there is no greater site of contestation than that of the body and Morris explores how these debates often become centred upon a dichotomy between oppression and liberation Whilst there is a vast diversity of scholarship that challenges this binary including post colonial post structuralist and Marxist feminist work the dichotomy nevertheless endures The Politics of Weight argues that the feminine body is not simply a site of oppression or liberation by drawing upon the intersections that exist between Foucault's Discipline and Punish and post structuralist feminist work on the body This provides a unique lens for exploring weight Through in depth analysis of interviews with women who seemingly sit on either side of the oppression and liberation debate members of dieting clubs and fat activists the book highlights the complexities that surround women's relationship to weight and the body Likewise it draws upon the wealth of black feminist scholarship to explore the discourses surrounding Oprah Winfrey's dieting journey seeking to demonstrate how discipline and race interact and how this plays out in dieting and weight The Politics of Weight will be of interest to students and scholars across a range of disciplines including gender studies sociology geography and political science

**America's Johannesburg** Bobby M. Wilson, 2019-12 In some ways no American city symbolizes the black struggle for civil rights more than Birmingham Alabama During the 1950s and 1960s Birmingham gained national and international attention as a center of activity and unrest during the civil rights movement Racially motivated bombings of the houses of black families who moved into new neighborhoods or who were politically active during this era were so prevalent that Birmingham earned the nickname Bombingham In this critical analysis of why Birmingham became such a national flashpoint Bobby M Wilson argues that Alabama's path to industrialism differed significantly from that of states in the North and Midwest True to its antebellum roots no other industrial city in the United States depended as much on the exploitation of black labor so early in its urban development as Birmingham A persuasive exploration of the links between Alabama's slaveholding order and the subsequent industrialization of the state America's Johannesburg demonstrates that arguments based on classical economics fail to take into account the ways in

which racial issues influenced the rise of industrial capitalism      *De Gruyter Handbook of Poverty, Disadvantage and Entrepreneurship* Michael H. Morris, Susana C. Santos, 2024-12-16 Is entrepreneurship a pathway out of poverty Does creating a business represent a means for improving one's life circumstances Surprisingly little is known about ventures started by those in circumstances of poverty This pioneering handbook integrates diverse perspectives from around the world regarding the poverty and entrepreneurship interface While the tendency among many scholars economic developers and policymakers is to downplay these ventures arguing they are largely inefficient marginal enterprises that create little innovation and few jobs the chapters in this handbook demonstrate their significant contributions and encourage societies to invest in their development The authors explore a range of factors affecting the ability of the poor to create enterprises that contribute to their well being including the role played by personal capabilities education family support and faith availability of microfinance technology supportive community ecosystems and a munificent institutional environment By shedding light on issues that can help nations realize the potential of these ventures this volume demonstrates how entrepreneurship can serve as a source of empowerment while providing direction regarding ways to surmount the obstacles that stand in the way

*Race and Place in Birmingham* Bobby M. Wilson, 2000 This pioneering book explores the implications of postmodernism for the black community through an analysis of the civil rights and neighborhood movements in Birmingham Alabama Grounded not only in class struggle the Civil Rights Movement was tied to the politics of racial identity the neighborhood movement to the politics of place identity Bobby M Wilson critically examines these two movements which together transformed race and place in Birmingham He shows that although the civil rights struggle and neighborhood empowerment served a valuable purpose they cannot now overcome post Fordist forces of domination and exclusion Successful political movements the author argues must venture beyond the politics of identity and difference based on race and neighborhood
