Systemic Transformation, Trade and Economic Growth Natalja von Westernhagen,2002-09-04 Since the late 1980s and the beginning of the 1990s the Commonwealth of Independent States CIS and Central and Eastern European Countries CEECs have been involved in the transition process This book compares the progress of some of these economies in transition and analyses their growth potential The focus lies on the special role that foreign trade liberalisation and foreign direct investment plays in economic growth Since foreign trade and foreign direct investment are important channels of technology transfer they can substantially contribute to a higher level of economic growth Based on the gravity model this book investigates potential in foreign trade and foreign direct investment for selected CIS and CEECs with developed OECD economies Policy options for some of these countries are discussed including issues of foreign trade foreign direct investment structural adjustment and economic growth Changes of Atmospheric Chemistry and Effects on Forest Ecosystems

Reinhard F. Hüttel,K. Bellmann,2013-03-09 This volume summarises the result of an interdisciplinary research programme entitled Rehabilitation of the Atmosphere of the New States of Germany Effects on Terrestrial Ecosystems Before the unification of Germany emission loads of SO₂ and dust particles were up to 18 fold higher in East than in West Germany However emission rates have decreased significantly since reunification in 1990 due to the breakdown of a large number of industrial and particularly lignite fired powerplants and the implementation of clean air technologies In order to study the effects of these dramatic changes in atmospheric chemistry on terrestrial ecosystems comprehensive field studies were conducted in pine forest ecosystems along an historic gradient of atmospheric deposition rates in the northeastern lowlands of Germany The fast and dramatic reduction of dust particle and SO₂ emissions offers a unique opportunity to test the role of SO₂ and alkaline particle deposition with regard to changes or damage to forest ecosystems and whether the forest stands return to a state of resilience In this respect this ecosystem experiment can be looked upon as a roof experiment without a roof *The Inspired Teacher* Carol Frederick Steele,2009 Provides research based pathways that teachers can take regardless of their experience to grow professionally and aim for truly inspired teaching
