The Curriculum Topic Study CTS process provides a professional development strategy that links mathematics standards and research to curriculum instruction and assessment Encountering Algebra Cecilia Kilhamn,Roger Säljö,2019-07-03

The book reports a comparative research project about algebra teaching and learning in four countries Algebra is a central topic of learning across the world and it is well known that it represents a hurdle for many students The book presents analyses built on extensive video recordings of classrooms documenting the first introduction to symbolic algebra students aged 12 to 14 While the content addressed in all classrooms is variables expressions and equations the teaching approaches are diverse The chapters bring the reader into different algebra classrooms discussing issues such as mathematization and social norms the role of mediating tools and designed examples and teacher beliefs By comparing classrooms new insights are generated about how students understand the algebraic content how teachers instruct and how both parties deal with difficulties in learning elementary algebra The book also describes a research methodology using video in search of taken for granted aspects of algebra lessons Teaching Mathematical Modelling: Connecting to Research and Practice Gloria Ann

Stillman,Gabriele Kaiser,Werner Blum,Jill P. Brown,2013-10-27 This book provides readers with an overview of recent international research and developments in the teaching and learning of modelling and applications from a variety of theoretical and practical perspectives There is a strong focus on pedagogical issues for teaching and learning of modelling as well as research into teaching and practice The teaching of applications of mathematics and mathematical modelling from the early years through primary and secondary school and at tertiary level is rising in prominence in many parts of the world commensurate with an ever increasing usage of mathematics in business the environment industry and everyday life The authors are all members of the International Community of Teachers of Mathematical Modelling and Applications and important researchers in mathematics education and mathematics The book will be of interest to teachers practitioners and researchers in universities polytechnics teacher education curriculum and policy Parents Matter Regina M.

Mistretta,2016-09-08 Parents are social factors in children s lives that can positively influence math achievement and one

does not need a degree in math to provide support What one needs is a guidebook filled with good questions to pose tips for supporting math thinking and general attitudes about math and an insider's view into what math teaching and learning looks like in today's classrooms This book serves as that guidebook and its author invites parents to use it while making sense of math with children Parents and children are encouraged to share and celebrate multiple ways of solving math examples rather than debate over the better approach Chapter 1 includes a description about how and why math teaching has changed through the years The big math ideas taught through the grades are outlined in Chapter 2 Chapters 3 through 5 offer detailed descriptions about how big math ideas develop in Grades Kindergarten through 2 3 through 5 and 6 through 8 respectively In conclusion Chapter 6 offers tasks that provide additional entry points for engaging in conversation about math at home
