Social Work with Mentally Retarded Adults in a Rehabilitation Setting

ARTHUR SEGAL

THE NEED of mentally retarded persons for social work assistance and their ability to use it constructively has been documented by reports from agencies in several areas of the United States.¹ However, the problems of mentally retarded adults living at home are often not adequately met through social work. Two reasons are lack of information about these persons and lack of knowledge about how to help them. There is, however, evidence that social work services—both casework and group work services—can be effective in meeting the needs of mentally retarded young adults, and the Independent Living Rehabilitation Program to be described in this article is one example.

The ILRP is a multidisciplinary service designed to help mentally retarded adults live as adequately as possible in their own homes or in foster homes. The program is built around the belief that, in most instances, the mentally retarded need not be institutionalized — and, furthermore, that they have a right to grow emotionally and to develop as much independence as possible.

Every Monday through Friday, from 9:30 A.M. to 3:00 P.M., each ILRP enrollee participates in a sheltered-workshop training program, in home-living unit activities, and in leisure-time activities. He also takes part, as do his parents, in a social work program that utilizes both casework and group work methods.

The program serves a group of thirty-two young adults between the ages of eighteen and thirty-one, only five of whom are older than twenty-six. Their level of retardation

can be classified as between severe and mild, their I.Q. scores ranging from 30 to 70. The majority have always lived with their parents and attended the public schools of San Francisco, either in special classes for the educable (I.Q. over 50) or in a special school for the trainable (I.Q. 50 and under). Some come from other communities and have had little, if any, schooling. Several have been in residential schools and in state hospitals during part of their lives but are now living with their parents or in foster homes.

A survey of case material indicates that most of the enrollees did not have any healthy developmental experiences during their childhood. Because of their limitations, they were not permitted to assume tasks and responsibilities expected of normal children, such as household duties, the selection of personal items, and simple shopping. Opportunities to socialize with their peers were limited to parallel play in school and at some playgrounds.

Most enrollees have had no peer relationships outside the school setting; they have spent their time watching TV, playing with persons younger than themselves in the household or neighborhood, or keeping busy in any way they could. Such isolation has proved especially detrimental to the enrollees who have had little schooling or have come to the ILRP several years after leaving school.

The Diagnostic Evaluation

The social worker's function is to help the enrollee in the ILRP make more effective use of his environment and to function more

First published in 1992 this second book in the series fully described the evaluation programme and seeks to answer pressing questions of policy and practice This book is split into four parts Introduction to the pilot programme the projects and their clients the policy contexts the objectives the research methodology The Process of care financing accommodation and service use staffing case management joint working Evaluation Outcomes for clients and others and costs for each of the client s groups people with learning difficulties people with mental health problems elderly people and people with physical disabilities Finally this book aims to further discuss Policy and practice implications **The Willowbrook Wars** David J. Rothman,2017-07-12 The Willowbrook Wars is a dramatic and illuminating account of the effort to close down a scandal ridden institution and return its 5 400 handicapped residents to communities in New York The wars began in 1972 with Geraldo Rivera s televised raid on the Willowbrook State School They continued for three years in a federal courtroom with civil libertarian lawyers persuading a conservative and conscience stricken judge to expand the rights of the disabled and they culminated in a 1975 consent decree with the state of New York pledging to accomplish the unprecedented assignment in six years From 1975 to 1982 David and Sheila Rothman observed this remarkable chapter in American reform of mental disabilities care Would the state live up to its agreement without dumping residents into other nightmarish institutions Would the lawyers prove as interested in meeting client needs as in securing client rights Could a tradition bound bureaucracy create a new network of community services And finally would a governor and a legislature tolerate such outside intervention and if so for how long In answering these questions The Willowbrook Wars takes us behind the scenes to clarify the role of the judiciary the fate of the underprivileged and the potential for social justice In their new afterword the authors bring the story up to date describing the results of the closing of the institution in 1987 from the experiences of integrating the former residents into communities to the legal battles between the state of New York and advocates for the mentally handicapped
