Rethinking Empowerment Gender And Development In A Global Local World:

Rethinking Empowerment Jane L. Parpart, Shirin Rai, Kathleen A. Staudt, 2002 Rethinking Empowerment looks at the changing role of women in developing countries and calls for a new approach to empowerment An approach that adopts a more nuanced feminist interpretation of power and empowerment recognises that local empowerment is always embedded in regional national and global contexts pays attention to institutional structures and politics and acknowledges that empowerment is both a process and an outcome Moreover the book warns that an obsession with measurement rather than process can undermine efforts to foster transformative and empowering outcomes It concludes that power must be restored as the centrepiece of empowerment Only then will the term and its advocates provide meaningful ammunition for dealing with the challenges of an increasingly unequal and often sexist global local world

Rethinking Empowerment Jane L. Parpart, Shirin Rai, Kathleen A. Staudt, 2002 Rethinking Empowerment looks at the changing role of women in developing countries and rejects the established notion that empowerment in development is best understood and pursued at a local global level It calls for a new approach one that adopts a more nuanced feminist interpretation of power and empowerment and recognizes that local empowerment is always embedded in regional national and global contexts It must both pay attention to institutional structures and politics and acknowledge that empowerment is both a process and an outcome Moreover the book warns that an obsession with measurement rather than process can undermine efforts to foster transformative an empowering outcomes It concludes that power must be restored as the centrepiece of empowerment Only then will the term and its advocates provide meaningful ammunition for dealing with the challenges of an increasingly unequal and often sexist global local world This edited collection should be useful reading for undergraduates and graduates in politics development studies and gender studies focusing on Chile Turkey India Kenya Cameroon and Tanzania

Development, Sexual Rights and Global Governance Amy Lind, 2010-01-04 This book addresses how sexual practices and identities are imagined and regulated through development discourses and within institutions of global governance The underlying premise of this volume is that the global development industry plays a central role in constructing people s sexual lives access to citizenship and struggles for livelihood Despite the industry s persistent insistence on viewing sexuality as basically outside the realm of economic modernization and anti poverty programs this volume brings to the fore heterosexual bias within macroeconomic and human rights development frameworks The work fills an important gap in understanding how people s intimate lives are governed through heteronormative policies which typically assume that the family is based on blood or property ties rather than on alternative forms of kinship By placing heteronormativity at the center of analysis this anthology thus provides a much needed discussion about the development industry s role in pathologizing sexual deviance yet also more recently in helping make visible a sexual rights agenda Providing insights valuable to a range of disciplines this book will be of particular interest to students and scholars of Development Studies Gender Studies and International

Relations It will also be highly relevant to development practitioners and international human rights advocates The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9780203868348> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Adapting Gender and Development to Local Religious Contexts Romina Istratii, 2020-10-01 This book provides a critical and decolonial analysis of gender and development theory and practice in religious societies through the presentation of a detailed ethnographic study of conjugal violence in Ethiopia Responding to recent consensus that gender mainstreaming approaches have failed to produce their intended structural changes Romina Istratii explains that gender and development analytical and theoretical frameworks are often constructed through western Euro centric lenses ill equipped to understand gender related realities and human behaviour in non western religious contexts and knowledge systems Instead Istratii argues for an approach to gender sensitive research and practice which is embedded in insiders conceptual understandings as a basis to theorise about gender assess the possible gendered underpinnings of local issues and design appropriate alleviation strategies Drawing on a detailed study of conjugal abuse realities and attitudes in two villages and the city of Aksum in Northern Ethiopia she demonstrates how religious knowledge can be engaged in the design and implementation of remedial interventions This book carefully evidences the importance of integrating religious traditions and spirituality in current discussions of sustainable development in Africa and speaks to researchers and practitioners of gender religion and development in Africa scholars of non western Christianities and Ethiopian studies and domestic violence researchers and practitioners

Gendering Globalization on the Ground Gay Young, 2014-11-13 How has globalization worked for women working on the frontlines of neoliberalism on the Mexico US border This border divides US from Others and produces social inequalities that form a site where marginalized border women encounter the othering power of neoliberalism and confront inequalities of gender and class Within this context a critical comparison of socially similar women working either in export production industries or in small scale commerce and low level services in Ciudad Ju rez reveals how export factory work constrains women s empowerment at home as well as the wages they earn and the well being of their households This volume challenges the neoliberal rationale of empowering women to support market growth and argues instead for understanding women s empowerment as a process of transformation from disempowerment by gender power relations to challenging masculinist domination in households and ultimately the economy and society Because structures of gender and globalization are mutually constituted women s empowerment as gender democracy is integral to producing alternative democratic globalization Using a feminist methodology that gives attention to the standpoint of women located on the downside of social hierarchies and takes into account strategically diverse points of view this study develops analysis to counter neoliberal globalization as it touches down in the lives of ordinary women and men on the border and beyond

Women, Quotas and Politics Drude Dahlerup, 2013-05-13 This is the first world wide comparative study of the controversial new trends of gender

quotas now emerging in global politics presenting a comprehensive overview of changes in women's parliamentary representation across the world. This is important reading for all those working to increase women's influence in politics because it scrutinizes under what circumstances gender quotas do increase women's representation and why they sometimes fail. These distinguished international scholars also show how gender balance in politics has become important to a nation's international image and why quotas are being introduced in many post-conflict countries. They present key case studies of Afghanistan, Iraq, Argentina, Sweden, South Africa, Belgium, covering almost all major regions of the world: Latin America, Africa, the Arab world, South Asia, the Balkans, The Nordic countries, and Europe, New Zealand, Australia, and the USA, and Rwanda, which in 2003 unexpectedly surpassed Sweden as the number one country in the world in terms of women's parliamentary representation. Using a comparative perspective, this book contains analyses of the discursive controversies around quotas; it gives an overview over various types of quotas in use, from candidate quotas to reserved seat systems, and it throws light over the troublesome implementation process. When do gender quotas lead to actual increase in the number of women parliamentarians? When are quotas merely a symbolic gesture? What does it imply to be elected as a quota woman? Tackling these and many more key questions, this is a major new contribution to the field. Making an important contribution to our knowledge of gender politics worldwide, this book will be of interest to NGOs, students, and scholars of democracy, policy making, comparative politics, and gender studies. [Encyclopedia of International Development](#) Tim Forsyth, 2018-10-24

International development is now a major global activity and the focus of the rapidly growing academic discipline of development studies. The Encyclopedia of International Development provides definitions and discussions of the key concepts, controversies, and actors associated with international development for a readership of development workers, teachers, and students. With 600 entries ranging in length from shorter factual studies to more in-depth essays, a comprehensive system of cross-references, and a full index, it is the most definitive guide to international development yet published. Development is more than a simple increase in a country's wealth and living conditions. It also implies increasing people's choices and freedoms; it is change that is inclusive and empowering. Development theory and practice has important applications to questions of economic growth, trade, governance, education, healthcare, gender rights, and environmental protection, and it involves issues such as international aid, peacekeeping, famine relief, and strategies against HIV/AIDS. The Encyclopedia treats these topics and many more, and provides critical analyses of important actors within development, such as the United Nations and World Bank, non-governmental organizations, and corporations. Contributors to this volume reflect the multidisciplinary and international nature of the subject. They come from social science disciplines such as economics, international studies, political science, and anthropology, and from specialties such as medicine. This Encyclopedia provides crucial information for universities, students, and professional organizations involved with international development, and those interested in related topics such as international studies or other studies of social and economic change today.

Routledge Handbook of International Education and Development Simon McGrath, Qing Gu, 2015-07-24 This timely Handbook takes stock of the range of debates that characterise the field of international education and development and suggests key aspects of a research agenda for the next period It is deliberately divergent in its approach recognising the major ideological and epistemological divides that characterise a field that draws on many traditions Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts The Handbook is divided in four parts and book ended by an introduction and a conclusion the latter oriented towards the implications that the volume has for future research agendas The first part explores major strands of debates about education s place in development theory The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development Part three looks beyond schools to consider early years adult and vocational education but focuses particularly on the return to thinking about higher education s role in development The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries Featuring over thirty chapters written by leading international and interdisciplinary scholars the Routledge Handbook of International Education and Development offers the first comprehensive and forward looking resource for students and scholars
