Robinson, Kirsten Stalker, 1998-01-01 This book encompasses a wide range of perspectives on childhood impairment and its social implications. The book adopts a child-centred approach stressing the importance of communicating with disabled children and includes pieces of writing by young disabled people. Preschool and school-age children describe their behavior and feelings within their own families, substitute families, and residential homes. The book explores how such children can best be protected and how their quality of life can be improved. Using the social model of disability, which identifies the material and social barriers to inclusion, contributors give examples of progressive practice and examine the aspirations of young disabled people, their friendships, and how they come to terms with adolescence and the transition to adulthood.
