Hewlett, 2017-07-28 In the vast anthropological literature devoted to hunter gatherer societies surprisingly little attention has been paid to the place of hunter gatherer children Children often represent 40 percent of hunter gatherer populations thus nearly half the population is omitted from most hunter gatherer ethnographies and research This volume is designed to bridge the gap in our understanding of the daily lives knowledge and development of hunter gatherer children The twenty six contributors to Hunter Gatherer Childhoods use three general but complementary

theoretical approaches evolutionary developmental cultural in their presentations of new and insightful ethnographic data For instance the authors employ these theoretical orientations to provide the first systematic studies of hunter gatherer children s hunting play infant care by children weaning and expressions of grief The chapters focus on understanding the daily life experiences of children and their views and feelings about their lives and cultural change Chapters address some of the following questions why does childhood exist who cares for hunter gatherer children what are the characteristic features of hunter gatherer children s development and what are the impacts of culture change on hunter gatherer child care The book is divided into five parts The first section provides historical theoretical and conceptual framework for the volume the second section examines data to test competing hypotheses regarding why childhood is particularly long in humans the third section expands on the second section by looking at who cares for hunter gatherer children the fourth section explores several developmental issues such as weaning play and loss of loved ones and the final section examines the impact of sedentism and schools on hunter gatherer children This pioneering volume will help to stimulate further research and scholarship on hunter gatherer childhoods th

Life Histories of the Dobe !Kung Nancy Howell,2010-05-06 Life Histories of the Dobe Kung re examines an important anthropological data set for the Dobe Kung the well known Bushmen of the Kalahari Desert collected by Nancy Howell and colleagues Using life history analysis Howell reinterprets this rich material to address the question of how these hunter gatherers maintain their notably good health from childhood through old age in the Kalahari s harsh environment She divides the population into life history stages that correlate with estimated chronological ages and demonstrates how and why they survive even thrive on a modest allotment of calories She describes how surplus food is produced and distributed and she considers both the motives for the generous sharing she has observed among the Dobe Kung and some evolutionary implications of that behavior

The Oxford Handbook of the Archaeology of Diet Julia Lee-Thorp,M. Anne Katzenberg,2024-06-24 Humans are unique among animals for the wide diversity of foods and food preparation techniques that are intertwined with regional cultural distinctions around the world The Oxford Handbook of the Archaeology of Diet explores evidence for human diet from our earliest ancestors through the dispersal of our species across the globe As populations expanded people encountered new plants and animals and learned how to exploit them for food and other resources Today globalization aside the results manifest in a wide array of traditional cuisines based on locally available indigenous and domesticated plants and animals How did this complexity emerge When did early hominins actively incorporate animal foods into their diets and later exploit marine and freshwater resources What were the effects of reliance on domesticated grains such as maize and rice on past populations and the health of individuals How did a domesticated plant like maize move from its place of origin to the northernmost regions where it can be grown Importantly how do we discover this information and what can be deduced about human health biology and cultural practices in the past and present Such questions are explored in thirty three chapters written by leading researchers in the study of human dietary

adaptations The approaches encompass everything from information gleaned from comparisons with our nearest primate relatives tools used in procuring and preparing foods skeletal remains chemical or genetic indicators of diet and genetic variation and modern or historical ethnographic observations Examples are drawn from across the globe and information on the research methods used is embedded within each chapter The Handbook provides a comprehensive reference work for advanced undergraduate and graduate students and for professionals seeking authoritative essays on specific topics about diet in the human past

Handbook of Parenting Marc H. Bornstein, 2019-03-08 This highly anticipated third edition of the Handbook of Parenting brings together an array of field leading experts who have worked in different ways toward understanding the many diverse aspects of parenting Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent professional and policymaker wonders about Parenting is a perennially hot topic After all everyone who has ever lived has been parented and the vast majority of people become parents themselves No wonder bookstores house shelves of how to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice However almost none of these is evidence based The Handbook of Parenting is Period Each chapter has been written to be

read and absorbed in a single sitting and includes historical considerations of the topic a discussion of central issues and theory a review of classical and modern research and forecasts of future directions of theory and research Together the five volumes in the Handbook cover Children and Parenting the Biology and Ecology of Parenting Being and Becoming a Parent Social Conditions and Applied Parenting and the Practice of Parenting Volume 2 Biology and Ecology of Parenting relates parenting to its biological roots and sets parenting in its ecological framework Some aspects of parenting are influenced by the organic makeup of human beings and the chapters in Part I on the Biology of Parenting examine the evolution of parenting the psychobiological determinants of parenting in nonhumans and primate parenting as well as the genetic prenatal neuroendocrinological and neurobiological bases of human parenting A deep understanding of what it means to parent also depends on the ecologies in which parenting takes place Beyond the nuclear family parents are embedded in influence and are themselves affected by larger social systems The chapters in Part II on the Ecology of Parenting examine the ancient and modern histories of parenting as well as epidemiology neighborhoods educational attainment socioeconomic status culture and environment to provide an overarching relational developmental contextual systems perspective on parenting

Sex, Gender and Health Tessa M. Pollard, Susan Brin Hyatt, 1999-08-26 Explores differences in health experiences of boys girls men and women from both biological and social perspectives [The Developing Person Through Childhood and Adolescence](#) Kathleen Stassen Berger, 2005-10-19 This text presents theory research practical examples and controversial issues in a way that inspires students to think about development addressing the individual's role in both the community and the wider world This second edition contains revised chapters on adolescence and new research into brain development

Neural Dynamics of Neurological Disease Christopher A. Shaw, 2017-02-15 The emerging understanding of age related neurological disorders suggests that notions of a single causal gene toxin being responsible is likely incorrect Neurological disorders probably arise due to a unique intersection of multiple genetic and toxic factors combined with additional contributions of age stage of development immune system actions and more This perspective leads to the view that rather than reflecting only one pathway to end state disease each is a spectrum disorder and every individual case is therefore unique Neural Dynamics of Neurological Disease argues for a fundamental rethinking of what we think we know about neurological disorders how they arise and progress and crucially what might be done to cure them It first introduces the concept of neural dynamics of neurological disease then examines various diseases and gives examples of the interplay of elements such as neural systems cell types and biochemical pathways that can contribute to disease The concluding chapters point the way to how the emerging notion of neurological disease as a dynamic process may lead to more successful treatment options Providing a cross disciplinary approach to understanding the origin and progression of neurological disease Neural Dynamics of Neurological Disease is a timely and valuable resource for neuroscientists researchers and clinicians

The Backbone of History Richard H. Steckel, Jerome C. Rose, 2002-08-26 For the same reasons that explorers of the early twentieth century strove to reach the poles and their modern counterparts journey to outer space most people want to visualize the contours of the human experience the peaks of adaptive success that led to the expansion of civilization and the troughs in which human presence ebbed *The Backbone of History* defines the emerging field of macrobioarchaeology by gathering skeletal evidence on seven basic indicators of health to assess chronic conditions that affected individuals who lived in the Western Hemisphere from 5000 BC to the late nineteenth century Signs of biological stress in childhood and of degeneration in joints and in teeth increased in the several millennia before the arrival of Columbus as populations moved into less healthy ecological environments Thus pre Colombian Native Americans were among the healthiest and the least healthy groups to live in the Western Hemisphere before the twentieth century
