The Development of the Concept of SMELL in American English Daniela Pettersson-Traba,2022-10-24 The last decades have witnessed a renewed interest in near synonymy In particular recent distributional corpus based approaches used for semantic analysis have successfully uncovered subtle distinctions in meaning between near synonyms However most studies have dealt with the semantic structure of sets of near synonyms from a synchronic perspective while their diachronic evolution generally has been neglected Against this backdrop the aim of this book is to examine five adjectival near synonyms in the history of American English from the understudied semantic domain of SMELL fragrant perfumed scented sweet scented and sweet smelling Their distribution is analyzed across a wide range of contexts including semantic morphosyntactic and stylistic ones since distributional patterns of this type serve as a proxy for semantic dis similarity The data is submitted to various univariate and multivariate statistical techniques making it possible to uncover fine grained dis similarities among the near synonyms as well as possible changes in their prototypical structures The book sheds valuable light on the diachronic development of lexical near synonyms a dimension that has up to now been relatively disregarded

The Use and Abuse of EFL Dictionaries Hilary Nesi, 2012-02-14 The book begins with a review of research into dictionary use A number of experimental design problems are discussed in particular the unreliability of questionnaire responses and the need for detailed accounts of individual dictionary consultations whilst sampling in numbers sufficient to represent specified populations The experiments reported in subsequent chapters investigate issues raised in the review The first two studies find that dictionary use during a reading comprehension test affected completion speed but not test scores The apparent failure of dictionary use to improve comprehension is attributed to the test itself the dictionaries and the users choice of look up words The ability of users to interpret dictionary entries is investigated in three further studies which use computers to gather data on large numbers of individual consultations The findings indicate that there is little difference between three major EFL dictionaries in terms of speed of consultation and overall productive success They also indicate that Malaysian ESL subjects who have higher vocabulary scores are slower in their reading and less successful in their interpretation of entries than Portuguese EFL subjects Finally the findings suggest that overall productive success is unaffected by the presence or absence of examples The experimental findings lead to the conclusion that dictionary consultation is a process in which users match pre existing beliefs about word meaning and behaviour against segments in the dictionary entry Such segments are often selected because they are familiar sounding and conceptually accessible but may contain only incomplete or non essential information Where pre existing beliefs and dictionary information conflict dictionary information is sometimes overridden Thus word knowledge acquired from a single consultation is often insufficient to ensure productive success Although it is probably inevitable that word knowledge will be acquired slowly through multiple encounters modifications to the dictionary entry and the training of users might help to avoid serious misinterpretation of dictionary information

dictionaries **The Bloomsbury Companion To Lexicography** Howard Jackson, 2013-10-10 The Bloomsbury Companion to Lexicography offers the definitive guide to a key area of linguistic study Each companion is a comprehensive reference resource featuring an overview of key topics research areas new directions and a manageable guide to beginning or developing research in the field Lexicography as the practice of compiling dictionaries has a long tradition that has been for much of the time largely independent of linguistics The direct influence of linguistics on lexicography goes back around 50 years though longer in the case of learners dictionaries The present volume aims to reflect on the research that has been and is being done in lexicography and to point the way forward It also tackles the critique of dictionaries in the electronic medium the future of historical lexicography in the electronic mode with special reference to the online Oxford English Dictionary and on e lexicography in general **No translation is perfect** Marco Sievers, 2007-07-12 Essay from the year 2006 in the subject Interpreting Translating grade 2 Liverpool John Moores University course Translation Studies language English abstract The basic assumption of laymen concerning translation is that every word or meaning can universally be translated from one language to another Their idea of translation is that of a straightforward mechanical process which simply replaces source language SL items with target language TL items Some conceptions in translation studies seem to encourage this view and debates suggest that it is only a matter of the right scope focus or technique to create perfect translations The paper at hand will refute this notion It will prove and exemplify the facts that not everything is translatable and that a transfer of meaning necessarily involves changes entailing loss or gain of linguistic cultural and stylistic features cf Harvey 2001 38 Pym Turk 2001 274 Translation cannot create an identical TL copy of the SL text but only permits a relative equivalence to it A maximal approximation however can never be achieved due to the complexity of language its dependence on constantly changing cultural norms and because the human factor Especially the aspect acceptance by the audience will show that perfection is just an abstract evaluative term which largely depends on individual taste
