Look At Languages

Trevor A. Harley

Look At Languages:

Looking at Language Wolfgang Klein, 2018-03-19 The volume presents an essential selection collected from the essays of Wolfgang Klein In addition to journal and book articles many of them published by Mouton this book features new and unpublished texts by the author It focuses among other topics on information structure the expression of grammatical categories and the structure of learner varieties

Language across Difference Django Paris, 2011-07-28 Once a predominantly African American city South Vista opened the twenty first century with a large Latino a majority and a significant population of Pacific Islanders Using an innovative blend of critical ethnography and social language methodologies Paris offers the voices and experiences of South Vista youth as a window into how today's young people challenge and reinforce ethnic and linguistic difference in demographically changing urban schools and communities The ways African American language Spanish and Samoan are used within and across ethnicity in social and academic interactions text messages and youth authored rap lyrics show urban young people enacting both new and old visions of pluralist cultural spaces Paris illustrates how understanding youth communication ethnicity and identities in changing urban landscapes like South Vista offers crucial avenues for researchers and educators to push for more equitable schools and a more equitable society

All About Language Barry J. Blake, 2008-04-24 In clear congenial style Barry Blake explains how language works He describes the make up of words and how they're built from sounds and signs and put together in phrases and sentences He examines the dynamics of conversation and the relations between the sound and meaning He shows how languages help their users connect to each other and to the world how they vary around the world why they never stop changing and that no two people speak a language in the same way He looks at how language is acquired by infant children how it relates to thought and its operations in the brain He investigates current trends and issues such as the levelling of linguistic class differences and the rise of new secret or in group languages such as argot and teenspeak He describes the history of writing from its origins to digital diffusion and ends by looking at how language might have originated and then evolved among our distant hominid and primate ancestors Language is crucial to every aspect of our lives whether we're thinking talking or dreaming Barry Blake reveals the wonders that lie beneath the surface of everyday communication enriching his exposition with a unique blend of anecdote and humour His engaging guide is for everyone curious about language or who needs to know more about it

Looking Like a Language, Sounding Like a Race Jonathan Rosa, 2019 *Looking like a Language Sounding like a Race* examines the emergence of linguistic and ethnoracial categories in the context of Latinidad The book draws from more than twenty four months of ethnographic and sociolinguistic fieldwork in a Chicago public school whose student body is more than 90% Mexican and Puerto Rican to analyze the racialization of language and its relationship to issues of power and national identity It focuses specifically on youth socialization to U S Latinidad as a contemporary site of political anxiety raciolinguistic transformation and urban inequity Jonathan Rosa's account studies the

fashioning of Latinidad in Chicago's highly segregated Near Northwest Side he links public discourse concerning the rising prominence of U S Latinidad to the institutional management and experience of raciolinguistic identities there Anxieties surrounding Latinx identities push administrators to transform at risk Mexican and Puerto Rican students into young Latino professionals This institutional effort which requires students to learn to be and importantly sound like themselves in highly studied ways reveals administrators attempts to navigate a precarious urban terrain in a city grappling with some of the nation's highest youth homicide dropout and teen pregnancy rates Rosa explores the ingenuity of his research participants responses to these forms of marginalization through the contestation of political ethnoracial and linguistic borders

Language Through the Looking Glass Marina Yaguello, 1998 To play with language is to break its rules disrupt its patterns exploit its weak points Thus paradoxically puns and spoonerisms neologisms and slogans reveal and highlight the patterns to which discourse conforms patterns which reflect the linguistic competence of language speakers Only those who have linguistics competence can play with it thus language games and the poetic use of language are underpinned by unconscious use of linguistic analysis Using Lewis Carroll's Alice as a starting point Marina Yaguello takes the reader on an unconventional voyage around language charting the major themes of linguistics on the way She shows that we can come to an understanding of language in general and of particular languages through exploring the devices of humour word games and poetry devices which reveal the unconscious linguist in all of us The result is an entertaining but rigorous introduction to language and linguistics for non specialists and students alike

Routes to Language, New Perspectives on Older Language Learners Miriam Neigert, 2019-05-13 Young old learners are an underresearched group in foreign second language research The present mixed methods study aims to provide a more differentiated view of this group in the context of lifelong learning and more specifically learning English as a foreign language The author draws from concepts in gerontology psychology adult education and foreign second language research to investigate the L2 self concepts of young old language learners at Volkshochschulen in Germany

Ten Lectures on Language, Cognition, and Language Acquisition Melissa Bowerman,2018-07-17 In her Beijing lectures Melissa Bowerman presents a lucid introduction and account of her research on a range of topics how children acquire the semantics of spatial terms how they construct categories and acquire the semantics of nouns and how they master the semantics of verbs in early language acquisition Bowerman also covers the learning of argument structure and expressions of end state with special attention to the adult speech that guides children and hence also the role of typology in acquisition how cross linguistic variation affects for example how speakers represent cutting and breaking in different languages and the relation of the Whorfian Hypothesis to cross linguistic variations in the semantics of languages Bowerman s over riding concern throughout is with how children come to master the first language being spoken to them by their parents and caregivers

How Language Works David Crystal,2007-03-29 In this fascinating survey of everything from how sounds become speech to how names work David

Crystal answers every question you might ever have had about the nuts and bolts of language in his usual highly illuminating way. Along the way we find out about eyebrow flashes, whistling languages, how parents teach their children to speak, how politeness travels across languages, and how the way we talk shows not just how old we are but where we're from and even who we want to be.

Language Debates Various, 2021-11-25. This book captures an urgent moment for language teaching, learning, and research. At its core are a series of debates concerning gender stereotyping, the place of linguistics in modern languages, language activism, multilingualism, and modern languages and digital humanities. Taken together, these debates explore the work that languages and those who learn and speak them do in the world, as well as the way we think through and in a language and are shaped by it. *Language Debates* acknowledges the history of language teaching and the current realities of language teaching and learning. It is bold in suggesting ways forward for reform and for policy setting, languages and language learning at the heart of a consciously transformative set of goals. This book is therefore essential reading for academics, language teachers, policy makers, students, activists, and those passionate about progressing language learning and teaching. The editors and contributors make up a multilingual and multicultural team who work across languages, cultures, and borders with a globally informed approach to their work. Uniquely, the debates in this volume are based on events with participants in the Language Acts and Worldmaking Debates Series and/or workshops within the wider research project and take into account the ensuing discussions there. Each debate is accompanied by an interview which serves as a model on how to continue the conversation beyond the printed pages of the book. You can also discover ways to join the debate through links on the Language Acts and Worldmaking series website www.jmlanguages.com/languageacts, which includes recorded debates, additional materials, and more information about the series. Like all the volumes in the Language Acts and Worldmaking series, the overall aim is two-fold: to challenge widely held views about language learning as a neutral instrument of globalisation and to innovate and transform language research, teaching, and learning together with Modern Languages as an academic discipline by foregrounding its unique form of cognition and critical engagement. Specific aims are to propose new ways of bridging the gaps between those who teach and research languages and those who learn and use them in everyday contexts; from the professional to the personal, put research into the hands of wider audiences; share a philosophy, policy, and practice of language teaching and learning which turns research into action; provide the research experience and data to enable informed debates on current issues and attitudes in language learning, teaching, and research; share knowledge across and within all levels and experiences of language learning and teaching; showcase exciting new work that derives from different types of community activity and is of practical relevance to its audiences; disseminate new research in languages that engages with diverse communities of language practitioners.

Parameter Hierarchies and Universal Grammar Ian G. Roberts, 2019. In this book, Ian Roberts argues that the essential insight of the principles and parameters approach to variation can be maintained, albeit in a somewhat different guise, in the context of the minimalist

programme The book represents a significant new contribution to the formal study of cross linguistic morphosyntactic variation

Generative Linguistics Frederick J. Newmeyer, 2002-09-11 Written by one of America's most prominent linguists the essays in *Generative Linguistics* provide a challenging reappraisal of the Chomskian Revolution the implications of which are still being debated some three decades on Here together for the first time are all of Frederick J Newmeyer's writings on the origins and development of generative grammar Spanning a period of fifteen years the essays address the nature of the Chomskian Revolution the deep structure debates of the 1970s and the attempts to apply generative theory to second language acquisition

Rightward Movement Dorothee Beerman, David LeBlanc, Henk C. van Riemsdijk, 1997 Symmetries and asymmetries have always played an important role in linguistic theorizing From the early works on potentially universal properties of transformational processes differences between rightward and leftward movement processes were noted and constituted a challenge to theories of conditions on transformations The upward boundedness of extraposition rules vs the successive cyclic character of question word movement for example remains a vexing problem An idea which has gained considerable prominence in the most recent syntactic work in particular Noam Chomsky's Minimalist Program and Richard Kayne's Antisymmetry proposal is that rightward movement simply does not exist This means in essence that what looks like an element that has been moved rightward is either base generated in its surface position or it is actually moved leftward but all its surrounding materials have been moved leftward even further Clearly these radical proposals have generated a large number of new analyses of the relevant phenomena and they have fostered considerable controversy about the viability and desirability of this type of approach The present volume brings together a representative group of articles discussing a variety of aspects of apparent rightward movement processes including considerations having to do with parsing and representing the various opposing lines of thought on this matter Empirically they cover a wide array of constructions extraposition scrambling quantifier floating etc and languages American Sign Language Bengali Dutch French Frisian German Hindi Japanese Marathi etc
