The enlarged capital sits on the same baseline as the surrounding text. This simple solution is easy to implement. Setting the first few words of the headline smooths the transition between the headline and the subhead.

A drop cap cut into the text block is called a drop cap. This example was produced using the Drop Cap feature in InDesign. The software allows you to wrap text around one or more characters and control the number of lines. The designer can adjust the size of the capital to match it to the surrounding text. The drop cap can be implemented on the web in CSS. The drop cap is rectangular, which can be visually awkward with the sloping silhouette of the letter A.

THE BEST OF TIMES, the worst of times, or just the worst of times? The dropped capital used here (in a serif font) was positioned as a separate element. A box was applied to an invisible box sitting behind the capital, making it appear to flow around the intruding right prow of the letter. The left prow extends out into the margin, making the capital feel firmly anchored in the text block. Hand-crafted drop caps like this one cannot be applied systematically.

DESIGNERS SOMETIMES ADAPT the drop cap convention for other purposes. An illustration or icon can appear in place of a letterform. Purely typographic alternatives are also possible, such as inserting a mark or symbol into the space carved from the primary text block. This technique can be used to create a structure for diverse and sometimes unexpected uses.
