Eye Movements and Psychological Processes Richard A.

Monty, John W. Senders, 2017-03-27 In the 10 years prior to publication the quantity of research on eye movements as they pertain to psychological processes had been increasing at a rapid rate Originally published in 1976 the editors purpose was to bring together investigators representing different theoretical positions and methodological approaches to present their recent findings to debate the theoretical points of view and to identify and discuss the major research problems on eye movements at the time An attempt was made to invite participants ranging all the way from promising graduate students through the established authorities in the field The result was an intensive three day session with meetings from early morning until late into the evening with much opportunity for formal and informal group discussion The edited papers and transcripts of the discussions are the contents of this book Visuality and Virtuality Whitney Davis, 2022-06-14 A

provocative and challenging new conceptual framework for the study of images This book builds on the groundbreaking theoretical framework established in Whitney Davis's acclaimed previous book A General Theory of Visual Culture in which he shows how certain culturally constituted aspects of artifacts and pictures are visible to informed viewers Here Davis uses revealing archaeological and historical case studies to further develop his theory presenting an exacting new account of the interaction that occurs when a viewer looks at a picture Davis argues that pictoriality the depiction intended by its maker to be seen emerges at a particular standpoint in space and time Reconstruction of this standpoint is the first step of the art historian's craft Because standpoints are inherently mutable and mobile pictoriality constantly shifts in form and possible meaning To capture this complexity Davis develops new concepts of radical pictorial ambiguity including bivisibility the fact that pictures can always be seen in ways other than intended pictorial naturalism and the behavior of pictures under changing angles of view He then applies these concepts to four cases Paleolithic cave painting ancient Egyptian tomb decoration classical Greek architectural sculpture with a focus on the Parthenon frieze and Renaissance perspective as invented by Brunelleschi A profound new theory of the work of both makers and viewers by one of the discipline's most esteemed and engaged thinkers Visuality and Virtuality is essential reading for art historians architects archaeologists and philosophers of art and visual theory **Searching for Cioran** Ilinca Zarifopol-Johnston, 2009-01-07 Ilinca Zarifopol

Johnston's critical biography of the Romanian born French philosopher E M Cioran focuses on his crucial formative years as a mystical revolutionary attracted to right wing nationalist politics in interwar Romania his writings of this period and his self imposed exile to France in 1937 This move led to his transformation into one of the most famous French moralists of the 20th century As an enthusiast of the anti rationalist philosophies widely popular in Europe during the first decades of the 20th century Cioran became an advocate of the fascistic Iron Guard In her quest to understand how Cioran and other brilliant young intellectuals could have been attracted to such passionate national revival movements Zarifopol Johnston herself a Romanian emigr sought out the aging philosopher in Paris in the early 1990s and retraced his steps from his home village of Rasinari and youthful years in Sibiu through his student years in Bucharest and Berlin to his early residence in France Her

portrait of Cioran is complemented by an engaging autobiographical account of her rediscovery of her own Romanian past
