Psychology Alan Poling, Henry Schlinger, Stephen Starin, Elbert Blakely, 2013-03-09 Psychology A Behavioral Overview is an introductory text with an orienting perspective that is frankly behavioral rather than eclectic This focus is made quite

clear in the first chapter of the book but in the remainder it also becomes clear that such a focus permits coverage of most of the topics found in the more common introductory text. Actually the next five chapters dealing with psychology as a science, methodology, evolution, physiology, and learning are in many ways comparable to the treatments provided in more eclectic introductory texts. The behavioral focus and the departure from traditional approaches become most significant in the last six chapters which deal with traditional psychological topics e.g. language, child development, and personality but deal with them systematically in terms of the concepts and principles introduced in the chapters on evolution and physiology and especially in the chapter on learning. Using the concepts provided early in the text to interpret complex aspects of human behavior provides valuable justification for those concepts as well as an opportunity for improved understanding of them. Although students will not make extensive contact with the variety of the theoretical approaches found in the typical text they will become especially competent in the use of behavioral concepts and principles to interpret and understand many of the topics of traditional importance in psychology.

Substance Abuse Counseling Patricia Stevens, Robert Leonard Smith, 2000

This book provides information regarding the enormity of substance abuse problems in the population, how to assess the problems, and how to treat individuals and families who seek assistance. It educates beginning clinicians and counselors about substance abuse by guiding them through the process of working with substance abuse clients. Written in an understandable and easy to grasp manner, it covers the basics of substance use and abuse. Terminology, physiology, psychokinetics, and psychodynamics. Case histories are used in selected chapters to help readers integrate the various approaches by offering a sample of the types of issues presented when working with this population. An emphasis on special populations includes minority populations, women, elderly, special needs groups, and children/youth. For substance abuse counselors seeking information on the stages of counseling from assessment and diagnosis through relapse prevention.
