Missing Tooth:

The Unsolved Murder of Adam Walsh Arthur Jay Harris, 2016-03-01 Another hitch missing autopsy The Walsh case was hampered by various problems including a missing autopsy report and a glitch in identifying the remains The Miami Herald March 28 2010 From The Unsolved Murder of Adam Walsh Book One The Adam Walsh story you know After 6 year old Adam was found murdered his father John Walsh channeled his unbearable grief into becoming an angry crime fighting TV host Yet this is the story you don't know For decades officials had never revealed the file proving the child was Adam Astonishingly it showed that the ID of the dead child had never been completed Why Was it because the evidence was either inconclusive or showed that the child likely actually wasn't Adam After Hollywood Police closed the case in 2008 not only was the police investigative file made a public record so were the medical examiners files in two districts Harris asked to see all of them and realized this As shown by his smile in the Missing picture Adam's top front baby teeth were both gone But the found child had a buck tooth a left top front tooth that was in almost all the way in the words of a state forensic anthropologist who the police had later consulted When was the Missing picture taken How long before Adam vanished John Walsh wrote it was one week Harris found it was actually about a month He found Adam's last best friend who said he saw him a week or two before he disappeared and remembered that he still didn't have any top front teeth However the police's last seen alive description reads that his top left front tooth was partially in So within the week or two before Adam disappeared his new tooth had erupted Two weeks after Adam was gone the child's head was found The Fort Lauderdale medical examiner told the newspapers then that the child Adam he said had been dead for possibly all of the 14 days he had been missing Teeth don't keep growing after death In just that week or two before he disappeared could Adam's top left front tooth have gone from eruption to in almost all the way That would be very unusual if not impossible More likely it would have taken months maybe up to six pediatric and forensic dentists and parents of young children told Harris If indeed Adam's top left front tooth doesn't match the same one in the found child there also should be other indicators that they don't match To compare discovered abandoned bodies with missing people forensic dentists use the missing person's dental charts and dental X rays The upstate medical examiner who made the positive ID wrote that Adam's dental chart showed that he had a filling in a lower left molar that matched a filling in the found child But that was only enough for a presumptive ID which is less than a positive ID It was only one filling and it was in a common place for children to have cavities And the dental chart he used is missing from his file as well as the files of Hollywood Police which originally handled it and the Fort Lauderdale medical examiner who the upstate M E said he gave a copy to Further none of the files mention ever getting or using Adam's dental X rays for a comparison Those would have made for a definitive match or a negative match Nor is there a mention anywhere of a forensic dental consultation ordinarily done in such circumstances to make positive IDs Adam's dentist says he no longer has the original records so the examination that should have been done then can never be done in the future Even

worse there is no autopsy report The medical examiner who performed the autopsy admitted in writing that neither he nor anyone else in his office ever wrote one Detectives prosecutors and defense attorneys who work homicides told Harris they had never heard of that ever happening before This is what it all means As there never has been there never can be a trial for the murder of Adam Walsh because prosecutors can never establish that the murder victim was Adam Walsh Instead this case is about something different crimes injustices and horrors against likely two young children their families and their communities A child close in age to Adam who has never been correctly identified whose parents were never notified and whose murder was never investigated and who was not buried under his or her correct identity And also the kidnapping of a young boy in a shopping mall in Hollywood Florida Which leads to an incredible pair of questions What ever happened to Adam Walsh Could he still be alive
