Tent, 1982 German society underwent greater change under the four years of military occupation than it had under Hitler and the Nazis The issue of reeducation lay at the heart of America s occupation policies Encompassing denazification restructuring of the school system university reform and cultural exchange reeducation began as an idealistic and naive attempt to democratize Germany by making her over in the American image For this meticulously researched study James F Tent has drawn on a wealth of recently declassified documents and on numerous personal interviews with veterans of the Occupation He brings to life not only the dilemmas American officials faced in balancing the need for a political purge against the need to rehabilitate a disrupted society but also the paradoxes involved in a democracy s attempt to impose its ideals on another people His book chronicles the dedicated work of many Americans it also illuminates America s Occupation experience as a whole      From Chaos To Mission Gerald A. Arbuckle, 1996-01-10 Formation is a rite of passage or initiation ritual This book draws on the findings of social anthropological studies of initiation rituals and contemporary biblical studies of rites of passage Since initiation rituals are of critical importance in the life journeys of individuals and groups the book s central theme is relevant to educationalists and ritual leaders in the Church and secular society Most religious congregations founded since the thirteenth century were formed for prophetic ministry to a world in change yet for centuries before Vatican II their candidates were rarely trained explicitly for this task Through years of quasi indoctrination and voluntary incarceration they were taught in a monastic atmosphere of unchanging order that the world was evil and to be avoided Conformity to a theological ecclesiastical and pastoral status quo was the most

esteemed value in a candidate This emphasis was contrary to the very nature of active religious life Religious must be prophetic challengers of the status quo within the Church and society Training for membership in active religious congregations therefore must now be radically reformed but there are no road maps available to direct educationalists in developing programmes that would stimulate candidates to be radically creative in ministry From Chaos to Mission creates a framework for radical thinking and practical action about the critical issue of formation of religious for mission today

*Mission: Save A World* Geoff Schultz, 2020-11-23 When a planet of intelligent beings is discovered on the verge of self destruction as each island nation fears the others are plotting its downfall a distant space faring culture sends a group of specialists Their mission is to understand the planet s cultures enough to determine whether they are worth saving and if they are to prevent their self destruction However they have to do it in such a way that none of the planet s inhabitants know they are being observed much less potentially being manipulated Some of the mission members

want to sweep in on the natives with missionary fervor to enlighten them to the glories of their obviously superior culture while other mission members want to understand the planet's inhabitants and what they might offer to enhance the diversity of intelligent beings in the galaxy More than just following the guidelines issued to the mission the Mission Director finds that he has to balance the differing viewpoints and encourage the experts and rookies as well as the traditionalists and the innovators to somehow all work together in order to come up with a solution which will work for the inhabitants of the planet they are studying While the specialists continue their work the Mission Director takes a side trip to visit a planet where he had previously been assigned and the rookie pilot who accompanies him has several surprises which encourages him and in some ways forces him to think outside of his training as well as to set aside his missionary zeal to acquire honor for himself The Mission Director has his own surprises when he lands to meet with the on planet agents and ends up in an unexpected first contact situation After the Mission Director returns to the planet of island nations with the rookie pilot and is updated on the current status he encourages the mission members to consider any ideas of how they can help the inhabitants to avoid self destruction Or maybe the mission should find a way to help them self destruct in a way that can't be blamed on the mission That suggestion shocks some of the mission members but it encourages them to think outside of the status quo or previously tried solutions As one idea after another doesn't pan out or outright fails two of the scientists from different disciplines try to combine some of their research and are surprised when it shows some promise Before they can test the possible solution on the inhabitants they have to have a better understanding of how the individual inhabitants think which requires a totally different approach Unexpectedly that is provided when it's revealed that the rookie pilot has an unexpected talent which the mission is able to make use of with surprising success Following some very limited testing it's decided to offer the solution as a new product to the inhabitants on a voluntary basis without revealing the source of the product The majority of the inhabitants who try the new product find that it improves their lives but there are some people who have a negative reaction at least in their opinion After an extended time of watching the inhabitants get close to mutual self destruction then slightly back off the mission members now have to sit and wait to see whether the new product will encourage the inhabitants to move away from or towards self destruction
