Mission On The Rhine Reeducation And Denazification In American Occupied Germany:

Mission on the Rhine James F. Tent, 1982 German society underwent greater change under the four years of military occupation than it had under Hitler and the Nazis The issue of reeducation lay at the heart of America's occupation policies Encompassing denazification restructuring of the school system university reform and cultural exchange reeducation began as an idealistic and naive attempt to democratize Germany by making her over in the American image For this meticulously researched study James F Tent has drawn on a wealth of recently declassified documents and on numerous personal interviews with veterans of the Occupation He brings to life not only the dilemmas American officials faced in balancing the need for a political purge against the need to rehabilitate a disrupted society but also the paradoxes involved in a democracy's attempt to impose its ideals on another people His book chronicles the dedicated work of many Americans it also illuminates America's Occupation experience as a whole

Art of Suppression Pamela M. Potter, 2016-06-28 This provocative study asks why we have held on to vivid images of the Nazis total control of the visual and performing arts even though research has shown that many artists and their works thrived under Hitler To answer this question Pamela M Potter investigates how historians since 1945 have written about music art architecture theater film and dance in Nazi Germany and how their accounts have been colored by politics of the Cold War the fall of communism and the wish to preserve the idea that true art

and politics cannot mix Potter maintains that although the persecution of Jewish artists and other enemies of the state was a high priority for the Third Reich removing them from German cultural life did not eradicate their artistic legacies *Art of Suppression* examines the cultural histories of Nazi Germany to help us understand how the circumstances of exile the Allied occupation the Cold War and the complex meanings of modernism have sustained a distorted and problematic characterization of cultural life during the Third Reich

Teaching a Dark Chapter Daniela R. P. Weiner,2024-07-15 Teaching a Dark Chapter explores how textbook narratives about the Fascist Nazi past in Italy East Germany and West Germany followed relatively calm

undisturbed paths of little change until isolated flashpoints catalyzed the educational infrastructure into periods of rapid transformation. Though these flashpoints varied among Italy and the Germanys they all roughly conformed to a chronological scheme and permanently changed how each dark past was represented. Historians have often neglected textbooks as sources in their engagement with the reconstruction of postfascist states and the development of postwar memory culture. But as *Teaching a Dark Chapter* demonstrates, textbooks yield new insights and suggest a new chronology of the changes in postwar memory culture that other sources overlook. Employing a methodological and temporal rethinking of the narratives surrounding the development of European Holocaust memory, Daniela R P Weiner reveals how long before 1968 textbooks in these three countries served as important tools to influence public memory about Nazi Fascist atrocities. As Fascism had been spread through education, then education must play a key role in undoing the damage. Thus to repair and shape postwar societies, textbooks became an avenue to inculcate youths with desirable democratic and socialist values. *Teaching a Dark Chapter* weaves the historical study of public memory with the educational study of textbooks to ask how and why the textbooks were created, what they said, and how they affected the society around them.

Mass Atrocities and the Police
Christian Axboe Nielsen, 2022-06-16
Between April 1992 and December 1995, more than 100 000 people were killed in the war in Bosnia and Herzegovina. The terrible atrocities committed in this period have been much discussed and studied and many prosecuted as acts of genocide, war crimes, or crimes against humanity. But so far, the academic scholarship has focused on the role of the military in these events. This has come at the expense of considering the police's role, which Nielsen here demonstrates as crucial. Nielsen traces the origins of the war in Bosnia and Herzegovina to the police and associated paramilitary groups. Nielsen makes this ground-breaking case by drawing on a host of confidential archival sources, academic research, and practical experience as a widely cited expert witness in the most notorious of the war crimes tribunals. His innovative new history sheds light on wider issues regarding the dissolution of Yugoslavia, the Balkan wars, and the region today.

Complicity in the Holocaust
Robert P. Ericksen, 2012-02-05
In one of the darker aspects of Nazi Germany, churches and universities generally respected institutions grew to accept and support Nazi ideology. Robert P. Ericksen explains how an advanced, highly educated Christian nation could commit the crimes of the Holocaust. This book describes how Germany's intellectual and spiritual leaders enthusiastically partnered with Hitler's regime, thus becoming active participants in the persecution of Jews and ultimately in the Holocaust. Ericksen also examines Germany's deeply flawed yet successful postwar policy of denazification in these institutions. *Complicity in the Holocaust* argues that enthusiasm for Hitler within churches and universities effectively gave Germans permission to participate in the Nazi regime.

Science and Ideology
Mark Walker, 2013-10-11
Does science work best in a democracy? Were Soviet or Nazi science fundamentally different from science in the USA? These questions have been passionately debated in the recent past. Particular developments in science took place under particular political regimes, but they may or may not have been directly determined by them. *Science and Ideology*

brings together a number of comparative case studies to examine the relationship between science and the dominant ideology of a state Cybernetics in the USA is compared to France and the Soviet Union Postwar Allied science policy in occupied Germany is juxtaposed to that in Japan The essays are narrowly focussed yet cover a wide range of countries and ideologies The collection provides a unique comparative history of scientific policies and practices in the 20th century **A Vatican Atlantic Alliance** Autori Vari,2025-01-16T18:05:00+01:00 As a result of the cooperation between the Holy See and Washington in the containment of Communism and the work of charity and assistance at the end of World War II several priests and bishops from the United States assumed quite significant roles in papal diplomacy These included Msgr Walter S Carroll in the Vatican Secretariat of State 1940 1950 Msgr Aloisius Joseph Muench in Germany 1946 1959 Msgr Joseph Patrick Hurley in Yugoslavia 1945 1950 and Rev Edward J Killion in Geneva 1947 1953 This book examines the activity of these actors during the years of Pius XII s pontificate The contributors include historians who have previously addressed the general aspects of the Holy See s diplomatic strategy as well as archivists familiar with Vatican documents relating to Pius XII s pontificate *Sport, Health and the Body in the History of Education* Mark Freeman,2016-04-14 Historians in recent years have paid considerable attention to sport and leisure in the past and historians of education are no exception The chapters in this book showcase the breadth and depth of scholarship in this area bringing new perspectives to bear on the history of physical education in several different European countries Ranging from schoolgirl cricket in early postwar England to the varying approaches to physical education in the nineteenth century Netherlands the contributions all emphasise the importance of physical education to wider conceptions of education for citizenship A number of chapters tackle issues in gender history while others focus on the effects often unintended of policy makers and the conflicts that could arise from the imposition of new physical education curricula Covering England Scotland France Germany the Netherlands and Greece this book features the work of both established and emerging scholars and is an important contribution to the historiography of both education and sport This book was originally published as a special issue of History of Education **Democracy Imposed** Professor Bruce A Williams,Richard L.
