Examining clandestine organizations in Norway Denmark the Netherlands Belgium France and Italy Olivier Wieviorka sheds new light on the factors that shaped the resistance and its place in the grand scheme of Anglo American military strategy While national actors played a leading role in fomenting resistance British and American intelligence services and propaganda as well as financial material and logistical support were crucial to its activities and growth Wieviorka illuminates the policies of governments in exile and resistance actors regarding cooperation with the British and Americans pointing to the persistence of national self interest and long standing historical tensions Drawing on a wide range of archival sources and bringing together the political diplomatic and military dimensions of the conflict this book is the first account of the resistance on a continental scale and from a trans European perspective *The History Nut* Carol Rae Wakely,2005

Barker,2022-08-12 The Gospel of John s relationship to the Synoptic Gospels is a perennial question For centuries the Gospel of Matthew has been considered the least likely of possible written sources of the Fourth Gospel In an ambitious reappraisal James Barker demonstrates John s use of the redacted Gospel of Matthew After reviewing the history of interpretation on the question Barker develops three case studies Concerning ecclesial authority Barker contends that John s saying concerning forgiving and retaining sins derives from Matthew s binding and loosing logion Regarding proof from prophecy he argues that John relies on Matthew for Zechariah s oracle about Israel s king entering Jerusalem on a donkey Finally he argues that John s inclusion of Samaritans contrasts sharply with Matthew s exclusion of Samaritans from the early church Although John s engagement with Matthew was by no means uncritical Barker at last concludes that John intended his Gospel to be read alongside not instead of Matthew      **Media and The City** Chiara Giaccardi,Matteo Tarantino,Simone Tosoni,2014-07-18 The percentage of people living in cities and the adoption rates of communication technologies continue to grow across the planet Our age has come to be defined as one of urbanism and communication but how are those two intertwined How do they shape each other Where and in which ways do they diverge support or fold into each other As new tensions emerge and old ones find new solutions social sciences are forced into a dialogue with media studies and urban studies in order to make sense of the new reality New theoretical and methodological paradigms are urgently needed and can be produced only through a fertile and eclectic dialogue This volume presents some of the latest research in this exciting cross disciplinary field Issues of conflict mobility crime art memory ethnicity identity and city marketing and branding come under rigorous scrutiny in their mutual and constitutive relationship with urban space and communicative technologies and practices The volume is divided into three broad sections The first section deals with the role of media in the social production of urban space that is with how media interact with other forces in giving shape to the materiality of the city The second section deals with how urban space acts as a context for a variety of media related practices especially in relation to the popularization of mobile geo localization technologies which have given us mass phenomena such as Foursquare The third and final section deals with how urban space is mediated and communicated through ICTs or in other terms how urban space is represented by specific media through specific discursive strategies
