Environs traces through history the impact of human activity upon the environment of this fascinating and unpredictable region. In eleven essays scholars across disciplines including anthropology, architecture, history, natural history, and geography chronicle how societies have worked to transform untamed wetlands and volatile floodplains into a present-day sprawling urban center and industrial complex and how they have responded to the environmental changes brought about by the disruption of the natural setting. This new text follows the trials of native and colonial settlers as they struggled to shape the environment to fit the needs of urbanization. It demonstrates how the Mississippi River while providing great avenues for commerce, transportation, and colonization also presented the region's greatest threat to urban centers and details how engineers set about taming the mighty river. Also featured is an analysis of the impact of modern New Orleans upon the surrounding rural parishes and the effect urban pollution has had on the city's water supply and aquatic life. Constructing the Heartland Katherine Fry, 2003. The author uses television news coverage of the 1993 Midwest flood as a case study to analyze the intersection of television news and nature with specific focus on how contemporary television news accounts of natural disasters borrow from, alter, and extend conceptions of nature as bound within certain geographic parameters.

Early Western Travels, 1748-1846 Reuben Gold Thwaites, 1905 **Travels in the Far West** Reuben Gold Thwaites, 1906 The News-Letter of the Society for the Study of Southern Literature Society for the Study of Southern Literature, 1995 **Early Western Travels, 1748-1846 Volume 27 ~ Paperback**, American Book Publishing Record, 1996-09 **The Travels of David Thompson 1784-1812** Sean T. Peake, 2011-08-01. At age 75 David Thompson began to write about his life of exploration and surveying in western North America from 1784 to 1812. At this point, however, the odds of finishing were slim; his eyesight was failing, his body was worn out after years of strain on portages and mountain passes. For five years he toiled with rewrites and revisions, never able to set the final account in order. On 16 January 1851 he put his papers to right in one last attempt to finish his work. By 28 February 1851, no longer able to see, he gave up his pen as well as any hope of completing his Travels. Like a true surveyor, though, he left a well-blazed trail for others to follow. Drawing from the four surviving manuscripts and Thompson's 77 notebooks filled with daily journals, reports, essays, and anecdotes, Sean Peake finished what Thompson set out to achieve: a full account that encompasses the extent of the forests of the great Plains, the animals, birds, and the various tribes of Indians which inhabit these countries; their several languages, their religious opinions, manners, and mode of life; place and extent of hunting grounds; and the changes which have taken place by the fortune of war or other causes. A curious and extensive collection of all that can fall under the observation of a traveller. This edition of *The Travels of David Thompson* is a landmark publication in Canadian history, fully deserving of a place on the bookshelf of anyone interested in a first-hand account of the tumultuous struggle for control of western North America.
