Mixed-use Development Richard E. Damm, 1981 **Interior Urbanism** Charles Rice, 2016-02-25 Vast interior spaces have become ubiquitous in the contemporary city. The soaring atriums and concourses of mega hotels, shopping malls and transport interchanges define an increasingly normal experience of being inside in a city. Yet such spaces are also subject to intense criticism and claims that they can destroy the quality of a city's authentic life on the outside. *Interior Urbanism* explores the roots of this contemporary tension between inside and outside, identifying and analysing the concept of interior urbanism and tracing its history back to the works of John Portman and Associates in the 1960s and 70s. America's Portman, increasingly recognised as an influential yet understudied figure, was responsible for projects such as Peachtree Center in Atlanta and the Los Angeles Bonaventure Hotel, developments that employed vast internal atriums to define a world of possibilities not just for hotels and commercial spaces but for the future of the American downtown amid the upheavals of the 1960s and 70s. The book analyses Portman's architecture in order to reconsider major contexts of debate in architecture and urbanism in this period, including the massive expansion of a commercial imperative, shifts in the governance and development of cities amid social and economic instability, the rise of postmodernism and critical urban studies, and the defence of the street and public space amid the continual upheavals of urban development. In this way, the book reconsiders the American city at a crucial time in its development, identifying lessons for how we consider the forces at work and the spaces produced in cities in the present. *Coordinated Urban Economic Development* National Council for Urban Economic Development, 1978 **Guadalupe Corridor Transportation Project, Santa Clara County**, 1983 **Profit Implications of Joint Development** Louis E. Keefer, 1984 Technical Bulletin - University of Arizona, Agricultural Experiment Station, 1922 Technical Bulletin (University of Arizona, Agricultural Experiment Station), University of Arizona, Agricultural Experiment Station, 1983 **Improving Your Waterfront**, 1980 *Sustainable Urban Neighbourhood* David Rudlin, Nicholas Falk, 2010-05-14 This successful title, previously known as *Building the 21st Century Home* and now in its second edition, explores and explains the trends and issues that underlie the renaissance of UK towns and cities and describes the sustainable urban neighbourhood as a model for rebuilding urban areas. The book reviews the way that planning policies, architectural trends and economic forces have undermined the viability of urban areas in Britain since the Industrial Revolution. Now that much post-war planning philosophy is being discredited, we are left with few urban models other than garden city-inspired suburbia. Are these appropriate in the 21st century given environmental concerns, demographic change, social and economic pressures? The authors suggest that these trends point to a very different urban future. The authors argue that we must reform our towns and cities so that they become attractive, humane places where people will choose to live. *The Sustainable Urban Neighbourhood* is a model for such reform and the book describes what this would look like and how it might be brought about. *Joint Development* Urban Land Institute, Research Division, Gladstone
