difference in perception and is no longer measured in terms of quantity of stimuli since the research developed in COST 2102 has proved that human information processing is a nonlinear process that cannot be seen as the sum of the numerous pieces of information available. Considering simply the pieces of information available results in a model of the receiver as a mere decoder and produces a huge simplification of the communication process. *DAB Digital Radio: Licensed To Fail* Grant Goddard, 2010-09-01.
