Modality And Structure In Signed And Spoken Languages:

Modality and Structure in Signed and Spoken Languages Texas Linguistics Society. Conference,2002-10-24 Publisher Description   Simultaneity in Signed Languages Myriam Vermeerbergen,Lorraine Leeson,Onno A. Crasborn,2007-02-21 Signed language users can draw on a range of articulators when expressing linguistic messages including the hands torso eye gaze and mouth Sometimes these articulators work in tandem to produce one lexical item while in other instances they operate to convey different types of information simultaneously Over the past fifteen years there has been a growing interest in the issue of simultaneity in signed languages However this book is the first to offer a comprehensive treatment of this topic presenting a collection of papers dealing with different aspects of simultaneity in a range of related and unrelated signed languages in descriptive and cross linguistic treatments which are set in different theoretical frameworks This volume has relevance for those interested in sign linguistics in teaching and learning signed languages and is also highly recommended to anyone interested in the fundamental underpinnings of human language and the effects of signed versus spoken modality   Multilingual Aspects of Signed Language Communication and Disorder David Quinto-Pozos,2014-01-29 This book provides a synthesis of work on communication disorders of child and adult users of signed languages The chapters investigate linguistic impairments caused by deficits in visual processing and motor movements as well as neurological decline The volume also contains in depth descriptions of child language acquisition in the signed modality and suggestions about how signed languages might guard against communication disorder   *Signed Language and Gesture Research in Cognitive Linguistics* Terry Janzen,Barbara Shaffer,2023-07-24 This volume represents the first time that researchers on signed language and gesture have come together with a coherent focus under the framework of cognitive linguistics The pioneering work of Sherman Wilcox is highlighted throughout scaffolding much of the research of these contributors The five sections of the volume reflect critical areas of Dr Wilcox s own research in cognitive linguistics Guiding research principles in signed language gesture and cognitive linguistics iconicity across signed and spoken linguistics multimodality blending depiction and metaphor in signed languages and specific grammatical constructions as form meaning pairings The authors of this volume exemplify and continue Dr Wilcox s work of bridging signed and spoken language disciplines by contributing chapters that represent a multiplicity of perspectives on signed spoken and gesture data This volume presents a unified collection of cognitive linguistics research by leading authors that will be of interest to readers in the fields of signed and spoken language linguistics gesture studies and general linguistics   Topics in Signed Language Interpreting Terry Janzen,2005-10-26 Interpreters who work with signed languages and those who work strictly with spoken languages share many of the same issues regarding their training skill sets and fundamentals of practice Yet interpreting into and from signed languages presents unique challenges for the interpreter who works with language that must be seen rather than heard The contributions in this volume focus on topics of interest to both students of signed language interpreting and practitioners

working in community conference and education settings Signed languages dealt with include American Sign Language Langue des Signes Qu b coise and Irish Sign Language although interpreters internationally will find the discussion in each chapter relevant to their own language context Topics concern theoretical and practical components of the interpreter s work including interpreters approaches to language and meaning their role on the job and in the communities within which they work dealing with language variation and consumer preferences and Deaf interpreters as professionals in the field **The Routledge Handbook of Sign Language Translation and Interpreting** Christopher Stone,Robert Adam,Ronice Müller de Quadros,Christian Rathmann,2022-07-18 This Handbook provides the first comprehensive overview of sign language translation and interpretation from around the globe and looks ahead to future directions of research Divided into eight parts the book covers foundational skills the working context of both the sign language translator and interpreter their education the sociological context work settings diverse service users and a regional review of developments The chapters are authored by a range of contributors both deaf and hearing from the Global North and South diverse in ethnicity language background and academic discipline Topics include the history of the profession the provision of translation and interpreting in different domains and to different populations the politics of provision and the state of play of sign language translation and interpreting professions across the globe Edited and authored by established and new voices in the field this is the essential guide for advanced students and researchers of translation and interpretation studies and sign language **Current Directions in Turkish Sign Language Research** Engin Arik,2014-07-18 This book aims to contribute to our knowledge of Turkish Sign Language T D and sign language linguistics in general T D is a relatively old signed language and is at present believed to be historically unrelated to other signed languages Linguistic studies on this language started in the early 2000s There has been growing academic interest and an increasing body of work on T D within the past decade enhancing the need for this this book which brings together chapters covering a variety of topics such as the history of deaf education and T D issues regarding language documentation a phonological study of fingerspelling reciprocals interrogatives reported utterances expressions of spatial relations including their acquisitions and expressions of multiple entities This book was supported in part by the T B TAK Research Fund Project No 111K314 This edited volume serves as a useful resource for newcomers to the field gives new momentum to future research on T D and offers unique perspectives in investigating sign languages in general Finally the intention is that the conversations within this volume will open up new discussions not only within sign linguistics but also in other related fields such as cognitive science **New Perspectives in Role and Reference Grammar** Wataru Nakamura,2011-09-22 New Perspectives in Role and Reference Grammar presents a broad picture of current developments in Role and Reference Grammar RRG a version of parallel structure grammar with an emphasis on typological adequacy Since its inception RRG has been applied to a wide range of languages in particular to case marking complex clauses e g control raising and serial verb constructions unaccusativity unergativity and the interplay

between syntax and information structure The present book is a continued investigation of the intermodular correspondence in a variety of languages and comprises 13 papers which not only contribute to the further development of the theory but also investigate controversial areas of linguistic theory including inflectional and derivational morphology verbal semantics and argument structure anticausative and serial verb constructions the argument adjunct distinction an extended typology of complex clauses the syntax information structure interface and interactions between the lexicon and constructions In addition three papers illustrate how RRG may be applied to sign languages language acquisition and machine translation from Arabic to English **The Use of Signing Space in a Shared Sign Language of Australia** Anastasia Bauer,2014-09-11 In this book an Australian Aboriginal sign language used by Indigenous people in the North East Arnhem Land Northern Territory is described on the level of spatial grammar Topics discussed range from properties of individual signs to structure of interrogative and negative sentences The main interest is the manifestation of signing space the articulatory space surrounding the signers for grammatical purposes in Yolngu Sign Language *Sign Language Research Sixty Years Later: Current and Future Perspectives* Valentina Cuccio,Erin Wilkinson,Brigitte Garcia,Adam Schembri,Erin Moriarty,Sabina Fontana,2022-11-14 **The Handbook of Educational Linguistics** Bernard Spolsky,Francis M. Hult,2010-02-01 The Handbook of Educational Linguistics is a dynamic scientifically grounded overview revealing the complexity of this growing field while remaining accessible for students researchers language educators curriculum developers and educational policy makers A single volume overview of educational linguistics written by leading specialists in its many relevant fields Takes into account the diverse theoretical foundations core themes major findings and practical applications of educational linguistics Highlights the multidisciplinary reach of educational linguistics Reflects the complexity of this growing field whilst remaining accessible to a wide audience **Context in Communication: A Cognitive View** Gabriella Airenti,Marco Cruciani,Alessio Plebe,2017-04-03 Context is what contributes to interpret a communicative act beyond the spoken words It provides information essential to clarify the intentions of a speaker and thus to identify the actual meaning of an utterance A large amount of research in Pragmatics has shown how wide ranging and multifaceted this concept can be Context spans from the preceding words in a conversation to the general knowledge that the interlocutors supposedly share from the perceived environment to features and traits that the participants in a dialogue attribute to each other This last category is also very broad since it includes mental and emotional states together with culturally constructed knowledge such as the reciprocal identification of social roles and positions The assumption of a cognitive point of view brings to the foreground a number of new questions regarding how information about the context is organized in the mind and how this kind of knowledge is used in specific communicative situations A related very important question concerns the role played in this process by theory of mind abilities ToM both in typical and atypical populations In this Research Topic we bring together articles that address different aspects of context analysis from theoretical and empirical perspectives

Visual language Wendy Sandler,Marianne Gullberg,Carol Padden,2019-11-04 Traditionally research on human language has taken speech and written language as the only domains of investigation However there is now a wealth of empirical studies documenting visual aspects of language ranging from rich studies of sign languages which are self contained visual language systems to the field of gesture studies which examines speech associated gestures facial expressions and other bodily movements related to communicative expressions But despite this large body of work sign language and gestures are rarely treated together in theoretical discussions This volume aims to remedy that by considering both types of visual language jointly in order to transcend artificial theoretical divides and to arrive at a comprehensive account of the human language faculty This collection seeks to pave the way for an inherently multimodal view of language in which visible actions of the body play a crucial role The 19 papers in this volume address four broad and overlapping topics 1 the multimodal nature of language 2 multimodal representation of meaning 3 multimodal and multichannel prosody and 4 acquisition and development of visual language in children and adults   *The Signs of a Savant* Neil Smith,Ianthi Tsimpli,Gary Morgan,Bencie Woll,2010-12-02 Every once in a while nature gives us insight into the human condition by

providing us with a unique case whose special properties illuminate the species as a whole Christopher is such an example Despite disabilities which mean that everyday tasks are burdensome chores Christopher is a linguistic wonder who can read write speak understand and translate more than twenty languages On some tests he shows a severely low IQ hinting at ineducability yet his English language ability indicates an IQ in excess of 120 a level more than sufficient to enter university Christopher is a savant someone with an island of startling talent in a sea of inability This book documents his learning of British Sign Language casting light on the modularity of cognition the modality neutrality of the language faculty the structure of memory the grammar of signed language and the nature of the human mind
