globalización Robert Castel, 2001 The Oxford Handbook of the Sociology of Latin America Xóchitl Bada, Liliana Rivera Sánchez, 2021 The essays included in this volume provide both an assessment of key areas and current trends in sociology specifically with regard to contemporary sociology in Latin America as well as a collection of innovative empirical studies The volume serves as an effective bridge of communication allowing sociological academics to mobilize and disseminate research dynamics from Latin America to the rest of the world *Education Systems in Historical, Cultural, and Sociological Perspectives* Daniel Tröhler, Ragnhild Barbu, 2012-03-26 For nearly half a century research on education systems has been increasingly popular However this popularity was long restricted primarily to internationally linked policy makers and education planners often backed up by international organizations such the OECD but also by governmental or para governmental organizations within the individual countries These institutional affiliations provided education research with a specific character that often centres on notions such as excellence efficiency or standards The specific comparative character of this policy driven research agenda triggered the development of suitable research techniques such as comparative statistics and pertinent sub disciplines such as cognitive psychology Backed up by powerful global institutions this agenda purported to be rather unique and it tended to ignore the cultural complexity of the educational field and those research approaches that address this complexity This volume includes different historical cultural and sociological approaches to the education systems and to questions as to how research on education systems can be undertaken beyond the parameters of

the existing research agenda They demonstrate how pertinent problems of research on education systems can only be tackled taking an international and interdisciplinary approach with regard to both research questions and methods concerning education systems

Nuevo ensayo político-social de la República Mexicana. Recuento de las desigualdades y la pobreza en México, 1790-1930. vol. 1 Mario Luis Fuentes Alcalá, Saúl Arellano Almanza, 2023-04-05 Este libro es el primer tomo de una extensa investigación en proceso de desarrollo en el cual se indaga en torno a las desigualdades las condiciones de pobreza y de marginación que han caracterizado a la población nacional desde 1790 hasta nuestros días Los autores utilizan como fuente de información a los Censos de Población y Vivienda por lo que el libro también puede considerarse como una historia general de los censos en nuestro país y una historia particular de la estadística social Se trata de una investigación novedosa porque muestra que la estructura de los censos en su lógica interna responde en cada uno de ellos a una visión de poder preguntar implica definir de manera previa qué es lo que al grupo gobernante le interesa saber y eso presupone una definición de lo que entiende por el poder el Estado el Gobierno y la sociedad

Pathologies of inequality in Latin America José Antonio Alonso, Rodolfo Gutiérrez, 2025-06-30 In the last two decades increasing inequalities in a broad range of countries have prompted many scholars to consider inequality as the main cause for social unrest weakened institutions or people's disaffection toward democracy However this interpretation often relies on fragile theoretical foundations and conceptual ambiguity To clarify these possible correlations the present volume focuses on Latin America as a region characterized by persistently high level of inequality It aims to Disentangle the different meanings of inequality taking into account that it is a complex phenomenon whose measure depends on the variables adopted to measure distributive asymmetries Consider the complex of internal and external factors that impact distributive patterns including those related to institutional arrangements and bargain power among different social actors Examine the main effects of inequality particularly on social services and subjective wellbeing violence and insecurity as well as institutional weakening Finally evaluate the effectiveness of different policies against inequality the design of welfare systems the pre distributive and redistributive impacts of fiscal measures and the creation of a culture of tolerance about inequality

Persistence and Emergencies of Inequalities in Latin America Pablo

Vommaro, Pablo Baisotti, 2022-02-21 This book adopts a multidimensional approach to analyze both the historical and emerging factors that contribute to make Latin America and the Caribbean the most unequal region in the world Social inequality is a historical characteristic of the region but at the beginning of the 21st century a handful of progressive governments seemed to be adopting policies that could reduce this historical trend Many of these efforts however were blocked or reversed by the COVID 19 pandemic which both exposed the persistence of historical trends and contributed to the emergency of new forms of inequality in the region The different chapters in this contributed volume adopt a multidimensional intersectional perspective to analyze both the persistence and the emergency of social devices of production and reproduction of inequalities in the diverse Latin American and Caribbean temporal spatialities The issues analyzed in the different chapters revolve around four main axes a persistence of generational and intergenerational inequalities b structural gender inequality c intertwined social inequalities race class and social structure and d historical and economic dimension of inequality Persistence and Emergencies of Inequalities in Latin America A Multidimensional Approach will be of interest to researchers interested in the study of social inequality and social justice in different fields of the human and social sciences such as sociology political science history economics anthropology and education It will also be a valuable tool for policy makers and social activists engaged in the discussion advocacy and implementation of public policies aimed at reducing social inequalities

Disputas por el espacio urbano María Mercedes Di Virgilio, Mariano Perelman, 2019-02-26 En los últimos años el estudio sobre las desigualdades se ha transformado en uno de los temas centrales de la agenda de investigación de las ciencias sociales De hecho los usos del concepto se han multiplicado notablemente En América Latina el debate sobre esta categoría se vio favorecido por el crecimiento económico que varios países experimentaron durante el primer decenio del siglo XXI y sus relativos impactos En ese contexto el libro se propone pensar las desigualdades que aún hoy luego de años de crecimiento deben ser enfrentadas y combatidas En ese marco se focaliza en las disputas urbanas que sin duda están signadas y son parte de la configuración de la desigualdad es socioterritorial es Desde una mirada centrada en el territorio esta obra busca contribuir a la identificación y la comprensión de las dinámicas y factores que intervienen en su producción y reproducción Dinámicas y factores que son emergentes pero también inerciales y persistentes El libro propone aportar una mirada compleja sobre la relación desigualdad

es territorio rompiendo con la división espacio sociedad y pensando esa dada ontológicamente de forma conjunta Esta perspectiva permite complejizar la mirada sobre las desigualdades existentes y las territorialidades emergentes

Perspectivas jurídicas actuales sobre la democracia en América Latina Miguel Ángel Hernández Gómez, Esmeralda Hernández Hernández, Javier Saldaña Almazán, Daniel Mora Magallón, 2023-10-16 La presente obra es una aportación crítica a los estudios de la democracia en México y América Latina con ella se muestra una posición epistémica en cuanto a la concepción tradicional de la democracia Si bien es cierto se ha concebido que la democracia es el poder del pueblo pero la mayoría del pueblo ante ello asumimos y comprendemos la democracia como un proceso social dinámico en el que se va adecuando a las condiciones contextuales y epocales por ello esa concepción tradicional ha tenido diversas metamorfosis por la lucha social de los grupos sociales minoritario u oprimidos quienes exigen sus derechos como todo ser humano La diversidad de problemas presentados en los textos que componen este libro tiene la particularidad de ser extraordinaria porque muestra la diversidad y pluralidad de abordajes epistémico y no sólo la postura hegemónica La complejidad la diversidad y la pluralidad teórica son las características esenciales que sin duda serán asumidas según la posición epistémica de la comunidad lectora En la obra se muestra la complejidad y diversidad de problemáticas por las que atraviesan las ciencias sociales pero sobre todo las ciencias jurídicas desde un enfoque crítico en la cual se desmitifica ese discurso basado en una ideología hegemónica y forma a agentes sociales conscientes para realizar acciones que transformen la realidad

Comercio justo, globalización y medio ambiente Gonzalo Ramírez Cleves, Erli Margarita Marín, 2013-01-01 Desde que el proceso de liberalización de la economía se ha incrementado con la llamada globalización económica los índices de pobreza y de desigualdad en el mundo han aumentado también El crecimiento de la economía y la generación de riqueza no han llevado como preveían los economistas a un mejor reparto Según los informes del PNUD 2006 cada año mueren 18 millones de personas por causas relacionadas con la pobreza como las enfermedades endémicas las malas condiciones de salubridad y el hambre es decir unas 5 000 personas diarias que incluyen a más de 34 000 niños menores de cinco años Del mismo modo la desigualdad en la repartición de los recursos genera la llamada sociedad 20-80 es decir que el 20% de la humanidad dispone de la riqueza y de los recursos del planeta mientras que el 80% restante vive en condiciones de pobreza y miserias Igualmente se ha cuestionado el modelo de globalización económica por problemas relacionados con el medio ambiente y el desarrollo sostenible ya que países industrializados con alta producción de gases de efecto invernadero como Estados Unidos China y Rusia rechazan la firma de tratados medioambientales que limiten restrinjan o encarezcan su producción Concomitantemente se ha hablado de depredación ambiental en los países en vías de desarrollo con la explotación de los llamados commodities o bienes primarios recursos naturales y minerales así como bosques y plantas que no se encuentran suficientemente protegidos jurídicamente y donde muchas veces los intereses económicos llevan a que se flexibilice o adecue la legislación de los países más vulnerables económicamente para de este modo favorecer los intereses del mercado
