Encyclopaedia Metropolitana, Or, Universal Dictionary of Knowledge: Pure sciences Edward Smedley, Hugh James Rose, Henry John Rose, 1845 Encyclopaedia Metropolitana; Or, Universal Dictionary of Knowledge, on an Original Plan ... with ... Engravings: Pure sciences, 1845 *The Universal Right to Education* Joel Spring, 2000-04

In this book Joel Spring offers a powerful and closely reasoned justification and definition for the universal right to education applicable to all cultures as provided for in Article 26 of the United Nations Universal Declaration of Human Rights One sixth of the world's population nearly 855 million people are functionally illiterate and 130 million children in developing countries are without access to basic education Spring argues that in our crowded global economy educational deprivation has dire consequences for human welfare Such deprivation diminishes political power Education is essential for providing citizens with the tools for resisting totalitarian and repressive governments and economic exploitation What is to be done The historically grounded highly original analysis and proposals Spring sets forth in this book go a long way toward answering this urgent question Spring first looks at the debates leading up to the Universal Declaration of Human Rights in 1948 to see how the various writers dealt with the issue of cultural differences These discussions provide a framework for examining the problem of reconciling cultural differences with universal concepts He next expands on the issue of education and cultural differences by proposing a justification for education that is applicable to indigenous peoples and minority cultures and languages This justification is then applied to all people within the current global economy Acknowledging that the right to an education is inseparable from children's rights he uses the concept of a universal right to education to justify children's rights and in turn applies his definition of children's liberty rights to the concept of education His synthesis of cultural language and children's rights provides the basis for a universal justification and definition for the right to education which in the concluding chapters Spring uses to propose universal guidelines for human rights education and instruction in literacy numeracy cultural centeredness and moral economy

George Dalgarno on Universal Language David Cram,Jaap Maat,2001-07-05 George Dalgarno s Art of Signs Ars Signorum 1661 was the first work in the seventeenth century to present a fully elaborated universal language constructed on philosophical principles It contains a wealth of observations on human language and the nature of representation in general and the author takes issue with leading philosophers of his day notably Hobbes and Descartes on epistemological and logical questions By including the first complete English translation alongside the Latin the present edition makes this seminal text accessible to a wider audience The text is further elucidated by a previously unpublished autobiographical tract in which Dalgarno describes the development of his ideas and his discussions with John Wilkins who eventually was to produce a rival universal language scheme In this tract Dalgarno provides in unprecedented detail a lucid account of the major issues involved in the debate on the structure of a philosophical language Further tracts by Dalgarno reprinted here illustrate other facets of his thought These include a series of broadsheets in which he advertised his scheme The Deaf and Dumb Man s Tutor 1680 which contains some original observations concerning the teaching of language to the deaf and a treatise on

Double Consonants one of the earliest treatments of phonotactics In bringing together for the first time the full range of Dalgarno s linguistic work which has striking resonance with modern work in universal grammar and cognitive science the present volume gives ready access to the ideas of this original and stimulating thinker **Languages in Seventeenth and Early Eighteenth-century Imaginary Voyages** Paul Cornelius,1965 **The Stairway to Consciousness** Dr. Thomas Stark, Come and discover the extraordinary story of how consciousness is born from the unconscious This is the story of existence This is the story of the meaning of life the universe and everything Everything conscious has the unconscious for a mother To exist is to live to have a mind and to think As we see in our dreams thinking can produce outer worlds which we imagine are external to us but are just our own constructs We are all part of a living cosmic organism seeking to optimize itself to perfect itself The Cosmic Mind produces a Cosmic World in which Mind can contend with its own construct and come to consciousness via all the problems and struggles it encounters there We are alienated from the world because we fail to understand that we unconsciously created it Only consciousness can reveal the truth that everything is made by us that we have total control over it if we put our mind to it Minds and their thoughts are all that exist There is nothing else **The Calcutta Review** ,1875
