The Principles of Astrological Geomancy Franz Hartmann,1913 Llewellyn's Truth About Numerology David Allen Hulse,2025-08-05 In numerology numbers are assigned to your birth name The Truth About Numerology shows you how to work with your numbers so you can Shed light on your unique attributes and tendencies Find out how others may perceive you and why they see you that way Detect hidden motivations Discover your lucky and unlucky days Uncover talents you never knew you had Learn the motives behind the actions of friends and family Zodiacal Symbolism and Its Planetary Power Isidore Kozminsky,1917 **Mathematical Enculturation** Alan Bishop,2012-12-06 Mathematics is in the unenviable

position of being simultaneously one of the most important school subjects for today's children to study and one of the least well understood. Its reputation is awe inspiring. Everybody knows how important it is and everybody knows that they have to study it. But few people feel comfortable with it so much so that it is socially quite acceptable in many countries to confess ignorance about it to brag about one's incompetence at doing it and even to claim that one is mathophobic. So are teachers around the world being apparently legal sadists by inflicting mental pain on their charges? Or is it that their pupils are all masochists enjoying the thrill of self-inflicted mental torture? More seriously, do we really know what the reasons are for the mathematical activity which goes on in schools? Do we really have confidence in our criteria for judging what's important and what isn't? Do we really know what we should be doing? These basic questions become even more important when considered in the context of two growing problem areas. The first is a concern felt in many countries about the direction which mathematics education should take in the face of the increasing presence of computers and calculator-related technology in society.

The Mystery of Numbers Annemarie Schimmel, 1994-04-07 In this fascinating book Schimmel shows that numbers have been filled with mystery and meaning since the earliest times and across every society. She conducts an illuminating tour of the mysteries attributed to numbers and their symbolism. 45 halftones, 64 linecuts. *Luzac & Co.'s Oriental List*, 1918
