Fairy Tales from Before Jan M. Ziolkowski, 2010-02-01. Explores the links between tales preserved in Latin from the Middle Ages and classic fairy tales from the collections of the Brothers Grimm and Hans Christian Andersen.

Fairy-tale Science Suzanne Magnanini, 2008-01-01. Between 1550 and 1650, marvellous stories of women giving birth to animals, young girls growing penises, and valiant men slaying dragons appeared in Europe. Circulated in scientific texts and in the first two collections of fairy tales published on the continent, Giovan Francesco Straparola's *Le piacevoli notti* and Giambattista Basile's *Lo cunto de li cunti* invigorated readers and established a new literary genre. Despite the fact that the printed European fairy tale was born in Italy, however, contemporary readers tend to think of France or Germany as the genre's place of origin. *Fairy Tale Science* looks at the birth of the literary fairy tale in the context of early modern discourses on the monstrous and explains how scientific discourse and literary theories of the marvellous limited the genre's success on its native soil. Suzanne Magnanini argues that men of science positioned the fairy tale in opposition to science and fixed it as a negative pole in a binary system. This system came to define both a new type of scientific inquiry and the nascent literary genre. Magnanini also suggests that by adopting theories of the monstrous as metaphors for their own literary production, Straparola and Basile aligned the literary fairy tale

the feminine and the monstrous and essentially marginalized the new genre Fairy Tale Science expands our understanding of the early modern European imagination and investigates the complex interplay between scientific discourse and marvellous literature

Film and Fairy Tales Kristian Moen, 2013-05-07 Far from a realm of pure fantasy helping people to escape harsh realities fairy tales and the films that rooted themselves in their tropes and traditions played an integral role in formulating and expressing the anxieties of modernity as well as its potential for radical magical transformation In *Film and Fairy Tales* Kristian Moen examines the role played by fairy tales in shaping cinema its culture and its discourse during its most formative years Well established by the feerie of the nineteenth century as popular entertainment and visual spectacle the wonders of mutability offered by fairy tale fantasies in the early films of Melies situated cinema itself as a realm of enchantment rife with enthralling and disturbing possibilities Through an analysis of early film theorists and a detailed case study of Tourneur's 1918 film *The Blue Bird* Moen shows how the spectacles and tropes of the fairy tale continued to shape ideas of cinema's place in modern life Stars like Mary Pickford and Marguerite Clark who not only played fantasy roles but presented their off screen personae in deliberately fantastic terms and the transformative claims of modernity expressed through visions such as Orientalist fairylands are analysed to show the extent to which fairy tales were used to negotiate different experiences of modernity the giddy adventures of social mobility consumer culture and identity transformation the threats and anxieties of cultural change impermanence and mutability Moen traces the evolution of the fairy tale in film to its self aestheticising peak in *Snow White and the Seven Dwarfs* alongside ironic allusions in films like Hitchcock's *Rebecca* and Howard Hawks' *Ball of Fire* concluding with an examination of how fairy tale visions of fantastic transformation have seen a resurgence in contemporary cinema from Tim Burton to Harry Potter In the process he shows how cinema made fairy tales modern and fairy tales helped make cinema what it is today
