**Nursing Care Plans** Marilynn E. Doenges, Mary Frances Moorhouse, Alice C. Geissler, 1997-01-01      *Nursing Care Plans* Marilynn E. Doenges, Mary Frances Moorhouse, Alice C. Geissler, 1993-01-01 This widely used reference continues to be a reliable guide for both students and nurses involved in constructing individualized patient care plans. It is the first care plan reference to include collaborative interventions. This edition includes three introductory chapters on the nursing process, care planning, and the documentation process; comprehensive guidelines for plans which encompass total patient needs and 90 tear out care plans.      Medical-surgical Care Planning Nancy Meyer Holloway, 2004 Revised for nursing students, educators, and practicing nurses, this complete reference contains almost 100 comprehensive clinical care plans for adult patients in medical/surgical units. New to this edition are care plans for acute alcohol withdrawal, hypertensive crisis, Parkinson's disease, sickle cell disease, transplantation, and end of life.      *Veterinary Nursing Care Plans* Helen Ballantyne, 2017-12-15 This book is the first veterinary textbook dedicated to nursing care plans. It offers a broad overview of the theory and practice of care planning in veterinary nursing, answering three key questions: What are nursing care plans? Why should nursing care plans be used in practice? How should nursing care plans be used in practice? Author Helen Ballantyne provides basic definitions and explanations which will be useful to those unfamiliar with nursing care plans. For those veterinary nurses and technicians who are using nursing care plans, the content stimulates debate and discussion by covering some of the philosophical and theoretical aspects of nursing and drawing comparisons and contrasts between the veterinary and human nursing roles and contexts. There is a pressing need for veterinary nurses to establish themselves as professionals and develop their unique role within the veterinary care team. Nursing care plans are a core tool to support that development. It is hoped that veterinary nurses may borrow tools from the pages of this book or use it as a resource to design their unique care plans. Either way, this practical guide will support the application of care planning, no matter the species of the animal kingdom for whom you are caring.      *Instructor's Guide for Nursing Care Plans* Joseph T. Burley, 1993      **Nursing Care Plans and Documentation** Lynda Juall Carpenito-Moyet, 2005-11-01 Enter the world of nursing care planning with confidence. This informative guide is the perfect way to build your care planning and documentation skills.
