FNS, 1997 Promoting Nutrition Through Education, 1989 **Nutrition Education Materials and Audiovisuals for Grades Preschool Through 6**, 1997 Nutrition Education Materials and Audiovisuals for Grades 7 Through 12 Shirley King Evans, 1995 *Food and Nutrition Information and Educational Materials Center catalog* Food and Nutrition Information Center (U.S.), 1976 *Quick Bibliography Series*, 1976 *Bibliographies and Literature of Agriculture*, 1989 The Link between Nutrition, Physical Activity and Academic Achievement Sigrid Quendler, 2004-09-30 Inhaltsangabe Abstract It has been documented that children from all socioeconomic backgrounds are at risk for poor nutrition and lack of physical activity PA On one hand many children from low income families are not getting enough to eat each day due to a lack of resources On the other hand children from middle and upper income levels consume enough food but their diets are high in fat sugar and sodium and they do not participate in PA As a result of this combination many children today face an increased risk for under nutrition obesity heart disease and other chronic diseases Finally educators and health professionals agree that poor diet eating habits and lack of PA also affect academic performance The fact that a hungry child cannot learn has been documented in numerous studies Indeed this research has found that even moderate under nutrition and an immense lack of PA can have lasting effects on children's ability to learn and school

performance Undernourished and untrained children tend to attain lower scores on standardised tests are more likely to become sick miss school and to fall behind in class Also hungry children have low energy are more irritable and have difficulty concentrating which interferes with learning Therefore school feeding and PA programs were established by several schools and public and private organizations to provide proper nourishment and the possibility of practicing PA In addition it helps preventing the negative effects of hunger and malnutrition The School Breakfast Programs was established as a pilot project in 1966 in response to the needs of children arriving at school without having eaten breakfast Now permanent breakfast programs help states provide daily breakfast to millions of students in thousands of schools The positive impact of this program cannot be underestimated Not only do many teachers report that students are more alert and perform better in class after eating a nutritious breakfast but published studies also found that breakfast programs are associated with significant improvements in academic functioning among school children PA programs can substantially improve children s ability to learn and their state of health by making PA a part of their daily lives Being physically active early in life has many physical social and emotional benefits and can lead to a reduced incidence of chronic diseases in adulthood In addition teachers report Getting Started , Food and Nutrition Resource for Grades Preschool Through 6 Shirley King Evans,1998 **Team Nutrition** ,2004 **Nutrition and the Elderly** Shirley King Evans,1990 **Nutrition Education for Preschoolers** ,1984 **Nutrition Education Materials and Audiovisuals for Grades Preschool - 6** Shirley King Evans,1993
