Poor and Pregnant in New Delhi, India Helen Vallianatos,2017-07-12 In this innovative contribution to the study of food gender and power Helen Vallianatos meticulously documents cultural values and beliefs dietary practices and the nutritional and health status of mothers in Indian squatter settlements She explores both large scale forces incorporating critical medical anthropology and feminist theory into a biocultural paradigm and the local and individual choices New Delhi women make in interpreting cultural dietary norms based on their reproductive histories socioeconomic status family structure and other specific conditions Her findings have significant implications for nutritional and medical anthropology and development studies and her innovative research design serves as a model for multi method studies that use participatory research principles combine quantitative and qualitative investigations and interpret diverse types of data

Fed Up! Susan Okie,2005-03-10 Once dismissed by the medical profession as a purely cosmetic problem obesity now ranks second only to smoking as a wholly preventable cause of death Indeed it is implicated in 300 000 deaths each year and is a major contributor to heart disease diabetes high blood pressure high cholesterol and depression Even conservative estimates show that 15% of all children are now considered to be overweight worldwide there are 22 million kids under five years old that are defined as fat Supersized portions unhealthy diets and too little physical activity certainly contribute to what is making kids fat But that is not the whole story Researchers are at a loss to explain why obesity rates have risen so suddenly and so steeply in the closing decades of the 20th century But head out to the beaches playgrounds and amusement parks and it is obvious that overweight children are more numerous and conspicuous We see it in our neighborhoods and we read it in the headlines Our nation indeed the world is in crisis But knowledge is power and it is time to arm ourselves in the

battle to win the war on obesity Fed Up is just what the doctor ordered Based in part on the Institute of Medicine's groundbreaking report on childhood obesity this new book from family physician and journalist Susan Okie provides in depth background on the issue shares heartrending but instructive case studies that illustrate just how serious and widespread the problem is and gives honest authoritative science based advice that constitute our best weapons in this critical battle
