Nvms Canine Anatomy:

Vesalius: The China Root Epistle Andreas Vesalius, 2015-01-12 This book provides the first annotated English translation from the original Latin of Andreas Vesalius China Root Epistle Ostensibly his appraisal of a fashionable herbal remedy the China Root Epistle concentrates on Vesalius skeptical appraisal of traditional Galenic anatomy which was based on animal rather than human dissections Along with reflections about his life as a young anatomist Vesalius argued that the new science of anatomy should devote itself less to rhetorical polemics and more to the craft of direct observation based on human dissection This volume provides annotations to link the Epistle with Vesalius earlier and more famous work On the Fabric of the Human Body and includes illustrations from the famous woodcuts first used in the 1543 edition of the Fabrica

Canine Anatomy Donald Robert Adams,1986 **Strangeways' Veterinary Anatomy** Thomas Strangeways,1888 Guide to the Dissection of the Dog Malcolm E Miller,2020-12-06 This manual represents an experiment both as to choice of animal and plan of work The dog has been chosen as subject of dissection instead of a large herbivore for several reasons The student specimen ratio can be reduced with a resultant increase in time for dissection by the individual student At the same time more material can be covered in a given period than by using the horse or ox owing to the smaller size of the specimen and the ease with which structures are cleaned and visualized These and other advantages result not only in better preparation of a student to study the more economically important animals but also increases the time that can be devoted to the study of those regions most often involved surgically The dog is cheaply purchased preserved and prepared for dissection After the arteries are filled with red latex they stand out more vividly than in life The large systemic veins can also be injected A large part of a dissected dog can be seen in a single field of vision Structures can be left in place e g the heart is dissected without removing it from the thorax Terms used in veterinary anatomy are largely taken from human anatomy Since in the dog structures closely resemble those of man an advantage in making homologies to the mutual benefit of teacher and student results In general all terms have been Anglicized except most names of muscles and even these Latin names have been used as if they were English in some places The Latin terms were retained to differentiate muscles from nerves and vessels furthermore most veterinarians prefer to use them The improved BNA or INA terminology has been used almost entirely Needless to say the excellent texts of Ellenberger and Baum and Sisson and Grossman have been used frequently as references It is probable that both have influenced the terminology more than they should since a uniform terminology is desired by all anatomists *Miller's Guide to the Dissection of the Dog* Malcolm Eugene Miller,Howard Edward Evans,Alexander DeLahunta,1996 This work provides an illustrated visualization of canine dissection It introduces basic mammalian anatomy and the specific anatomy of the dog as well as presenting up to date anatomical terms from Nomina Anatomica Veterinaria aimed at fostering use of the latest approved nomenclature
