Unfortunately, this great tradition of anthropology is not given serious consideration in many anthropology departments. Against the backdrop of the volume in honour of Professor Deepak Kumar Behera, who himself was an excellent fieldworker, presents important issues and rich fieldwork experience of various scholars. The book has two sections. The first section, *Issues of Academic Friends*, consisting of eleven papers, covers aspects such as tribes, governance, health, food, language, lyric, youth, etc. The second section, *Friends in the Field*, consisting of seven papers, presents the fieldwork experiences of some German anthropologists in India. The volume makes an attempt to show the importance of fieldwork in anthropology and allied subjects. Pāli and Buddhism Bryan G. Levman, 2021-11-02 This book is a collection of essays on the history and evolution of the Pāli language, which preserves the earliest record of the Buddha's teaching. Although only the Pāli record has survived, it argues that the Buddha also taught in several of the indigenous languages of northern India, including Dravidian, probably Munda, and possibly others. Pāli was derived from a koin or common language for inter-dialect communication between the different dialects spoken by the Indo-Aryan immigrants, but was also strongly influenced by the languages of the indigenous peoples, Dravidian and Munda. The language of the Buddha's native clan, the Sakyas, was probably Dravidian, which had a Munda substrate. The Buddha was bi- or multilingual and taught in the Indo-Aryan koin of the immigrants, but also in the local languages of his people, whose impact may be found in extensive word and cultural borrowing from these languages into Indo-Aryan, and a significant phonological, morphological, and syntactical imprint on Pāli and other Indo-Aryan languages. The book examines this influence and other factors of language change over time in the context of current theories of comparative philology.

Theorizing Built Form and Culture Kapila D. Silva, Nisha A. Fernando, 2024-03-08 In this collection of essays, *Theorizing Built Form and Culture: The Legacy of Amos Rapoport*, a felicitation volume to celebrate the significance of Professor Amos Rapoport's lifelong scholarship, scholars from around the world discuss the analytical relevance, expansion, and continuing application of these contributions in developing an advanced understanding of mutual relationships between people and built environments across cultures. Professor Amos Rapoport has espoused an intellectual and theoretical legacy on environmental design scholarship that explains how cultural factors play a significant role in the ways people create and use environments, as well as the way environments in turn influence people's behavior. This volume presents a hitherto not seen, unique and singular work that simultaneously articulates a cohesive framework of Rapoport's architectural theories and demonstrates how that theoretical approach can be

used in architectural inquiry education and practice across environmental scales types and cultural contexts It also acknowledges for the very first time how this theoretical legacy has pioneered the decolonizing of the Eurocentric approaches to architectural inquiry and has thus privileged an inclusive cross cultural perspective that laid the groundwork to understand and analyze non Western design traditions The book thus reflects a wide range of cross cultural and cross contextual range to which Professor Rapoport s theories apply a general notion of theoretical validity he always advocated for in his own writings The volume is a paramount source for scholars and students of architecture who are interested in understanding how culture mediates the creation use and preservation of the built environment
