Beyond Choice Alexander Sanger,2005-07-06 Thirty years after Roe v Wade the argument between pro choicers and pro lifers has reached stalemate Pro choice arguments haven t persuaded a comfortable majority that legal abortion is vital to our society nor addressed our moral qualms Younger people are less and less supportive of reproductive rights Since 1996 state legislatures have enacted nearly 300 pieces of anti choice legislation With Roe in jeopardy International Planned Parenthood Council Chair Alexander Sanger asks a simple but heretical question How many more pieces of anti choice legislation will it take to get the pro choice movement to rethink its approach to the issue In Beyond Choice Sanger explores the history of the reproductive rights movement to discover how it got stuck in its thinking and then provides a convincing new argument for the moral rightness of its cause He shows why it is vital to the health and survival of the human race that couples be able to have children or not when they choose why reproductive rights are just as important to men as to women and why in an era of new reproductive technologies completely unfettered choice is not morally defensible Beyond Choice is inspiring and important reading for women s rights advocates opinion leaders medical ethicists and anyone concerned to preserve our freedom to reproduce or not without government intervention **The Economics and Politics of Choice**

No-Fault Insurance Edward L. Jr. Lascher,Michael R. Powers,2012-12-06 In recent years choice no fault has emerged as a popular but controversial proposal for addressing the problem of high automobile insurance rates Choice plans offer consumers the option of a lower cost insurance policy with restrictions on filing lawsuits or a higher cost policy with full tort rights Some American states have implemented choice programs and major federal choice legislation is now pending in the United States Congress Choice no fault has caught the attention of policy makers the insurance industry and academics Until now however no single book has pulled together the available research on the topic The Economics and Politics of Choice No Fault Insurance fills that gap Edited by scholars from different disciplines each of whom has written extensively on automobile insurance issues the book includes some of the best work in the area Former Massachusetts Governor and presidential candidate Michael S Dukakis wrote the foreword Contributors include University of Virginia Law Professor Jeffrey O Connell widely considered the father of no fault as well as authors of the influential RAND study of the potential effects of choice no fault on insurance rates The book chapters most of which were written especially for this volume cover topics ranging from the impact of choice no fault on accidents and driving behavior to the effects of choice on medical care

usage to alternative approaches for resolving accidents involving both no fault and tort electors to the political feasibility of choice legislative proposals Emphasis on the potential advantages of choice no fault is balanced by consideration of possible ill effects *Library of Choice Literature and Encyclopaedia of Universal Authorship* Ainsworth Rand Spofford, Charles Gibbon, 1895 *The Library of Choice Literature and Encyclopædia of Universal Authorship* Charles Gibbon, Ainsworth Rand Spofford, 1890 **Carroll County, Maryland** ADC (Firm), 2000 *Reference Catalogue of Current Literature* , 1906

Our Unknown, Undeserved, Preplanned Journey Jan Gingrich, 2020-01-30 Life is often referred to as a journey Without a doubt every person who uses that analogy does so from at least a different perspective and likely a different reason Sometimes it is because they have found life hard and the term journey represents the struggle and its length they have experienced There is some of that factor in our so titling the book Other times it is used to express finding life delivering beyond their expectations and the experience took them where they never imagined going There is that factor in our so titling the book also Sometimes it is because life seems mundane repetitious and they feel caught in its cycle There is nothing of that in our book There is a poem called Footprints in the Sand by Mary Fishback Powers that illustrates the caring hand of God she experienced in hard times of life when she saw only one set of prints Too often that is all we look for help in the parts of life s journey we think we need help with True we should look for that but the promise of God to his children is I will never leave nor forsake you good or hard times This book was written to demonstrate the truth and reality of that promise made over 200 times in various wordings of the Bible This book was written no had to be written so every child of God is alertly looking for what God is doing for them every day in ways they have not considered before Then experience the amazement of realizing their Journey has been part of the Creator s plan from the beginning who works all things according to his good and perfect will so that they can know purpose and blessing in life and not just an aimless Journey **The Auto Choice Reform Act of 1997** United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 1999 **The Library of Choice Literature** Ainsworth Rand Spofford, Charles Gibbon, 1888 *The Cyclopaedia of Wit and Humor: Containing Choice and Characteristic Selections from the Writings of the Most Eminent Humorists of America, Ireland, Scotland, and England* William Evans Burton, 1875 *The Library of Choice Literature and Encyclopedia of Universal Authorship* Ainsworth Rand Spofford, 1894 **Personalised Medicine, Individual Choice and the Common Good** Britta van Beers, Sigrid Sterckx, Donna Dickenson, 2018-11-22 Hippocrates famously advised doctors it is far more important to know what person the disease has than what disease the person has Yet 2 500 years later personalised medicine based on individual genetic profiling and the achievements of genomic research claims to be revolutionary In this book experts from a wide range of disciplines critically examine this claim They expand the discussion of personalised medicine beyond its usual scope to include many other highly topical issues including human nuclear genome transfer three parent IVF stem cell derived gametes private umbilical cord blood banking international trade in human organs biobanks such as the US Precision

Medicine Initiative direct to consumer genetic testing health and fitness self monitoring Although these technologies often prioritise individual choice the original ideal of genomic research saw the human genome as the common heritage of humanity The authors question whether personalised medicine actually threatens this conception of the common good
