Clay, 2005-09-14 The intention of Ancient Texts and Translations ATT is to make available a variety of ancient documents and document collections to a broad range of readers The series will include reprints of long out of print volumes revisions of earlier editions and completely new volumes The understanding of ancient societies depends upon our close reading of the documents however fragmentary that have survived K C Hanson Series Editor *Scribal Education in the Sargonic Period* Nicholas L. Kraus, 2020-10-12 Scribal Education in the Sargonic Period is an in depth analysis of the process of education for scribes during the period of Sargonic hegemony in ancient Mesopotamia c 2335 2150 BCE The book provides a holistic study of the topic addressing the technology of writing the school texts used in education the languages of instruction and the social and historical context of scribal life and an education in cuneiform writing The topic of scribal education at such an early period of Mesopotamian history has never been addressed at length before Nicholas Kraus convincingly argues that scribal education during the Sargonic period was closely tied to the administrative institutions of the Sargonic Empire and prepared a scribe to become an effective administrator The Harvard Semitic Studies series publishes volumes from the Harvard Museum of the Ancient Near East Other series offered by Brill that publish volumes from the Museum include Studies in the Archaeology and History of the Levant and Harvard Semitic Monographs <https://hmane.harvard.edu/publications> *Sargonic Akkadian* Rebecca Hasselbach, 2005 Since the second edition of I J Gelb s *Old Akkadian Writing and Grammar* in 1961 which is still the standard grammar of Old Akkadian to this day a significant number of new texts from the Old Akkadian period has been discovered and important improvements have been made regarding the analysis of Old Akkadian and Early Semitic grammar particularly phonology and writing The present volume seeks to update our understanding of the syllabically written textual material from the Sargonic period 2350

2100 BCE which contains most of our evidence for the Akkadian used at this period It consists of a detailed investigation of the Sargonic Akkadian syllabary phonology and morphology with specific focus on geographical and dialectal variations that are noticeable in this text corpus but which have not yet been examined thoroughly The grammatical investigation further compares specific linguistic features of this period with the two later Akkadian dialects Babylonian and Assyrian in order to establish the position of the individual sub groups of Sargonic Akkadian within the dialect geography of Akkadian

*Mathematics in Ancient Iraq* Eleanor Robson, 2020-06-30 This monumental book traces the origins and development of mathematics in the ancient Middle East from its earliest beginnings in the fourth millennium BCE to the end of indigenous intellectual culture in the second century BCE when cuneiform writing was gradually abandoned Eleanor Robson offers a history like no other examining ancient mathematics within its broader social political economic and religious contexts and showing that mathematics was not just an abstract discipline for elites but a key component in ordering society and understanding the world The region of modern day Iraq is uniquely rich in evidence for ancient mathematics because its prehistoric inhabitants wrote on clay tablets many hundreds of thousands of which have been archaeologically excavated deciphered and translated Drawing from these and a wealth of other textual and archaeological evidence Robson gives an extraordinarily detailed picture of how mathematical ideas and practices were conceived used and taught during this period She challenges the prevailing view that they were merely the simplistic precursors of classical Greek mathematics and explains how the prevailing view came to be Robson reveals the true sophistication and beauty of

ancient Middle Eastern mathematics as it evolved over three thousand years from the earliest beginnings of recorded accounting to complex mathematical astronomy Every chapter provides detailed information on sources and the book includes an appendix on all mathematical cuneiform tablets published before 2007

**Problems of Canonicity and Identity Formation in Ancient Egypt and Mesopotamia** Gojko Barjamovic, Kim Ryholt, 2016-04-24 The term canonicity implies the recognition that the domain of literature and of the library is also a cultural and political one related to various forms of identity formation maintenance and change Scribes and benefactors create canon in as much as they teach analyze preserve promulgate and change canonical texts according to prevailing norms From early on texts from the written traditions of ancient Mesopotamia and Egypt were accumulated codified and to some extent canonized as various collections developed mainly in the environment of the temple and the palace These written traditions represent sets of formal and informal cultures that all speak in their own ways of canonicity normativity and other forms of cultural expertise Some forms of literature were used not only in scholarly contexts but also in political ones and they served purposes of identity formation This volume addresses the interrelations between various forms of canon and identity formation in different time periods genres regions and contexts as well as the application of contemporary conceptions of canon to ancient texts

**Establishing Value** Vitali Bartash, 2019-06-04 This book explores the reasons for which weights and scales were used to measure goods in Early Mesopotamia ca 3 200 2 000 BCE The vast corpus of cuneiform records from this period sheds light on the various mechanisms behind the development of this cultural innovation Weighing became the means of articulating the value of both imported and locally produced goods within a socioeconomic system that had reached an unprecedented level of complexity This study provides a comprehensive analysis of this cultural and economic phenomenon which simultaneously reflected and shaped the relationships between individuals and groups in Mesopotamia throughout the third millennium BCE

**Historical Genesis** Richard James Fischer, 2008-01-28 The beginning chapters of Genesis come alive with characters places and events almost totally unknown outside of the Bible itself except when illuminated by the fascinating history of the ancient Near East Did a man we call Adam actually exist Was someone known to us as Noah warned of a cataclysmic flood and instructed to build an ark Could the Tower of Babel incident actually have happened When archaeological artifacts and literature began to surface from ancient Mesopotamia present day Iraq nearly 200 years ago only a handful of archaeologists dared to point out that there appeared to be a close relationship between Genesis and the ruminations of the Sumerians and Akkadians who once lived there Often enduring great personal hardships these archaeological pioneers produced copious translations and marvelous insights Cuneiform texts compiled from almost two centuries of exploration have added significantly to our understanding of the historical underpinnings of the Old Testament The reader will gain a new appreciation for the historical integrity of Genesis 2 11 and marvel at the evidence that the persons places and events depicted though long misunderstood could be real Please visit Richard J Fisher s web site at <http://www.richardjfisher.com>

Copyright Office, 1973      Babel und Bibel 8 Natalia Koslova, E. Vizirova, Gabor Zólyomi, 2015-02-27 This is the eighth volume of *Babel und Bibel*, an annual of ancient Near Eastern Old Testament and Semitic studies. The principal goal of the annual is to reveal the inherent relationship between Assyriology, Semitics and biblical studies, a relationship that our predecessors comprehended and fruitfully explored but that is often neglected today. The title *Babel und Bibel* is intended to point to the possibility of fruitful collaboration among the three disciplines in an effort to explore the various civilizations of the ancient Near East. This volume is a festschrift for Joachim Krecher, Professor of Assyriology in the Westfälische Wilhelms-Universität Münster. Krecher is best known perhaps for his seminal *Sumerische Kulturyrik* published already in 1966. This compendium includes 17 essays by friends and colleagues all focusing on Sumerian language and literature.      **Materials for the Assyrian Dictionary**, 1952
