Satellite Information Systems Edward S. Binkowski, 1988 **Geographical Information Systems in Hydrology** V.P. Singh, M. Fiorentino, 2013-03-09 The last few years have witnessed an enormous interest in application of GIS in hydrology and water resources This is partly evidenced by organization of several national and international symposia or conferences under the sponsorship of various professional organizations This increased interest is in a large measure in response to growing public sensitivity to environmental quality and management The GIS technology has the ability to capture store manipulate analyze and visualize the diverse sets of geo referenced data On the other hand hydrology is inherently spatial and distributed hydrologic models have large data requirements The integration of hydrology and GIS is therefore quite natural The integration involves three major components 1 spatial data construction 2 integration of spatial model layers and 3 GIS and model interface GIS can assist in design calibration modification and comparison of models This integration is spreading worldwide and is expected to accelerate in the foreseeable future Substantial opportunities exist in integration of GIS and hydrology We believe there are enough challenges in use of GIS for conceptualizing and modeling complex hydrologic processes and for globalization of hydrology The motivation for this book grew out of the desire to provide under one cover a range of applications of GIS technology in hydrology It is hoped that the book will stimulate others to write more comprehensive texts on this subject of growing importance **The Information System Consultant's Handbook** William S. Davis, David C. Yen, 2019-04-30 The Information System Consultant's Handbook familiarizes systems analysts systems designers and information systems consultants with underlying principles specific documentation and methodologies Corresponding to the primary stages in the systems development life cycle the book divides into eight sections Principles Information Gathering and Problem Definition Project Planning and Project Management Systems Analysis Identifying Alternatives Component Design Testing and Implementation Operation and Maintenance Eighty two chapters comprise the book and each chapter covers a single tool technique set of principles or methodology The clear concise narrative supplemented with numerous illustrations and diagrams makes the material accessible for readers effectively outlining new and unfamiliar analysis and design topics **InfoWorld**, 1986-04-21 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **StarBriefs Plus** Andre Heck, 2004-03-31 With about 200 000 entries StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations acronyms contractions and symbols within astronomy related space sciences and other related fields As such this invaluable reference source and its companion volume StarGuides Plus should be on the reference shelf of every library organization or individual with any interest in these areas Besides astronomy and associated space sciences related fields such as aeronautics aeronomy astronautics atmospheric sciences chemistry communications computer sciences data processing education electronics engineering energetics

From Warfare to Welfare Jennifer S. Light, 2005-09-19 During the early decades of the Cold War large scale investments in American defense and aerospace research and development spawned a variety of problem solving techniques technologies and institutions From systems analysis to reconnaissance satellites to think tanks these innovations did not remain exclusive accessories of the defense establishment Instead they readily found civilian applications in both the private and public sector City planning and management were no exception Jennifer Light argues that the technologies and values of the Cold War fundamentally shaped the history of postwar urban America From Warfare to Welfare documents how American intellectuals city leaders and the federal government chose to attack problems in the nation's cities by borrowing techniques and technologies first designed for military engagement with foreign enemies Experiments in urban problem solving adapted the expertise of defense professionals to face new threats urban chaos blight and social unrest Tracing the transfer of innovations from military to city planning and management Light reveals how a continuing source of inspiration for American city administrators lay in the nation's preparations for war
