Authenticity in Culture, Self, and Society J. Patrick Williams,2016-12-05 Across sociology and cultural studies in particular the concept of authenticity has begun to occupy a central role yet in spite of its popularity as an ideal and philosophical value authenticity notably suffers from a certain vagueness with work in this area tending to borrow ideas from outside of sociology whilst failing to present empirical studies which centre on the concept itself Authenticity in Culture Self and Society addresses the problems surrounding this concept offering a sociological analysis of it for the first time in order to provide readers in the social and cultural sciences with a clear conceptualization of authenticity and with a survey of original empirical studies focused on its experience negotiation and social relevance at the levels of self culture and specific social settings *Reasons for Living* Marisa Crawford,Graham Rossiter,2006-11-01 Reasons for Living begins by exploring the development and psychological function of meaning identity and spirituality in the lives of young people This exploration can contribute significantly to the professional background of those engaged in the education and care of youth in various contexts The book then focuses on what it means to educate young people in meaning identity and spirituality Implications are considered for three school contexts the spiritual and moral dimension to the general curriculum in public and independent schools religious education in religious schools and state based Religion Studies courses Reasons for Living

makes a much needed contribution to the philosophy of education by discussing the links between education and young people's spiritual and moral development. It also provides new insights and approaches to values education and religious education. Areas of fundamental importance in Australian education have long been held back not only by the gap between theory and practice but also by the very complexities of young people's personal development in contemporary Western Culture. *Reasons for Living* offers a constructive and practical way forward.

Son, 2014-05-08 *Ritual Practices in Congregational Identity Formation* investigates the educational roles of ritual practices in the process of congregational identity formation. Son identifies and analyzes various kinds of Christian rituals with respect to how rituals influence the formational processes of a congregation's identity. The Self and Memory Denise R. Beike, James M. Lampinen, Douglas A. Behrend, 2004-11 How we think of ourselves depends largely on what we remember from our lives and what we remember is biased in many ways by how we think of ourselves. The complex interplay of the self and memory is the topic of this volume.

The Oxford Handbook of Identity Development Kate C. McLean, Moin U. Syed, 2015 Identity is defined in many different ways in various disciplines in the social sciences and sub-disciplines within psychology. The developmental psychological approach to identity is characterized by a focus on developing a sense of the self that is temporally continuous and unified across the different life spaces that individuals inhabit. Erikson proposed that the task of adolescence and young adulthood was to define the self by answering the question 'Who Am I?' There have been many advances in theory and research on identity development since Erikson's writing over fifty years ago and the time has come to consolidate our knowledge and set an agenda for future research. *The Oxford Handbook of Identity Development* represents a turning point in the field of identity development research. Various and disparate groups of researchers are brought together to debate, extend and apply Erikson's theory to contemporary problems and empirical issues. The result is a comprehensive and state-of-the-art examination of identity development that pushes the field in provocative new directions. Scholars of identity development, adolescent and adult development and related fields as well as graduate students, advanced undergraduates and practitioners will find this to be an innovative, unique and exciting look at identity development.
