having a consciousness composed of equal parts historian ecologist philosopher critic poet and sociologist At this time in
history when many people are trying to understand their true relationship with the natural environment this book offers a
remarkable contribution breathtaking in the scope of its research and exhilarating to read Pyne takes the reader on a journey
through time exploring the terrain of Europe and the uses and abuses of its lands as well as through migration and conquest
many parts of the rest of the world Whether he is discussing the Mediterranean region Russia Scandinavia the British Isles
central Europe or colonized islands whether he is considering the impact of agriculture forestry or Enlightenment thinking
the author brings an unmatched insight to his subject Vestal Fire takes its title from Vesta Roman goddess of the hearth and
keeper of the sacred fire on Mount Olympus But the book's title also suggests the strengths and limitations of Europe's
peculiar conception of fire and through fire of its relationship to nature Between the untamed fire of the wilderness and the
tended fire of the hearth lies a never ending dialectic in which human beings struggle to control natural forces and processes
that in fact can sometimes be directed but never wholly dominated or contained *Report* Maryland Geological Survey, 1905
