Savages And Beasts The Birth Of The Modern Zoo:

Savages and Beasts Nigel Rothfels, 2025-03-04 Now completely revised A history of the modern zoo In this revised edition of *Savages and Beasts* Nigel Rothfels traces the origins of the modern zoo to the efforts of the German entrepreneur Carl Hagenbeck the most successful dealer in exotic animals in the nineteenth century Building from his core business in animals Hagenbeck eventually became even more famous for his large ethnographic exhibitions and circus ventures When Hagenbeck opened his Animal Park near Hamburg Germany in 1907 he brought together all his business interests in a revolutionary zoological park He moved wild animals out of their cages and into natural landscapes and in the process invented a new way of imagining captivity Through the use of theatrical scenery the animals and people performing in his ethnographic exhibitions appeared to be living in their native lands This revised edition addresses ethical concerns about the representation of indigenous peoples and animals and includes a host of new images and photographs By examining Hagenbeck's enterprises *Savages and Beasts* demonstrates how ideas about the role of zoos and the nature of animal captivity developed in the late nineteenth century Rothfels provides a much needed historical perspective on the connections between the development of modern zoos and their colonial histories

Metamorphoses of the Zoo Ralph R. Acampora, 2010-06-14 *Metamorphoses of the Zoo* Animal Encounter After Noah is a volume dedicated to radically transformative approaches to spaces set aside as zoological parks or gardens Historically these establishments served as symbols of power and venues for entertainment but today they have taken to portraying themselves as flagships of environmental education scientific research and wildlife conservation Along with the past century's turn in exhibition design toward increasingly naturalistic architecture such portrayals have been received by many in an uncritically positive light At the same time it remains clear that zoos are immensely popular attractions drawing hundreds of millions of visitors globally per year This level of participation is consistent with the suggestion that humans harbor a strong sense of biophilia one which moves them to seek out diverse life forms when their own territories become too biologically homogenous from such a vantage it is no accident that zoos are most often situated in urbanizing areas *Metamorphoses of the Zoo* emphasizes creative and reconstructive analyses of zoos that do not simply advocate marginal reform or quick abolition By focusing on issues such as interspecies progress and eco psychological health this unique collection will satisfy those in disciplines ranging from ecophilosophy to humanistic psychology to environmental studies

Technological Forms and Ecological Communication Piyush Mathur, 2017-09-25 Investigating the phenomena of technology science technique and mass communication Piyush Mathur contends that the enterprise of science communication may be misleading vis vis technology if in part because it frequently coextends with a flawed but dominant notion of science that presumptuously implicates technology anyway Grappling with what authentically constitutes science and the prospective effects of its realization on a global future of mass communication Mathur explores how various technological forms play specifically into ecologically

sensitive mass communication The result is an eco communicative theory of technology that includes its classification based upon a set of qualitative principles and a profile of the notion of development On the whole though Technological Forms and Ecological Communication A Theoretical Heuristic brings the fields of philosophy and history of science philosophy and sociology of technology communication studies and development studies into conversation with one another

Political Animals Jesse Donahue,Erik Trump,2007-01-01 Political Animals offers a unique study and perspective on the relationship between politics and the art found in American zoos and aquariums Jesse Donahue and Erik Trump examine the ways that zoos and aquariums have successfully served as sculptural gardens for the masses and have incorporated art and architecture that convey political messages about both the patrons and the animals This book demonstrates how art has been used for a range of economic and political purposes including providing jobs a medium to reach out to minority interest groups a fundraising tool and a surrogate for the animals themselves Donahue and Trump skillfully analyze and compare zoos to other areas of public art to highlight the calculated strategies on the part of the zoos that have incorporated a range of artistic styles for different audiences Incorporating photographs of zoo and aquarium art from around the country Political Animals is an exciting and captivating text for the mind and eye

Interurban Knowledge Exchange in Southern and Eastern Europe, 1870-1950 Eszter Gantner,Heidi Hein-Kircher,Oliver Hochadel,2020-10-22 Around 1900 cities in Southern and Eastern Europe were persistently labeled backward and delayed Allegedly they had no alternative but to follow the role model of the metropolises of London Paris or Vienna This edited volume fundamentally questions this assumption It shows that cities as diverse as Barcelona Berdyansk Budapest Lviv Milan Moscow Prague Warsaw and Zagreb pursued their own agendas of modernization In order to solve their pressing problems with respect to urban planning and public health they searched for best practices abroad The solutions they gleaned from other cities were eclectic to fit the specific needs of a given urban space and were thus often innovative This applied urban knowledge was generated through interurban networks and multi directional exchanges Yet in the period around 1900 this transnational municipalism often clashed with the forging of urban and national identities highlighting the tensions between the universal and the local This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery This volume will appeal to scholars from a large number of disciplines including urban historians historians of Eastern and Southern Europe historians of science and medicine and scholars interested in transnational connections

Creatures of Fashion John Soluri,2024-04-02 Today the mention of Patagonia and Tierra del Fuego conjures images of idyllic landscapes untouched by globalization Creatures of Fashion upends this revealing how the exploitation of animals terrestrial and marine domesticated and wild living and dead was central to the region s transformation from Indigenous lands into the national territories of Argentina and Chile Drawing on evidence from archives and digital repositories John Soluri traces the circulation of furs and fibers to explore how the power of fashion stretched far beyond Europe s houses of haute couture to

entangle the fates of Indigenous hunters migrant workers and textile manufacturers with those of fur seals guanacos and sheep at the end of the world From the nineteenth century rise of commercial hunting to twentieth century sheep ranching to contemporary conservation based tourism Soluri s narrative explains how struggles for control over the production of commodities and the reproduction of animals drove the social and environmental changes that tied Patagonia to global markets empires and wildlife conservation movements By exposing seams in national territories and global markets knit together by force this book provides perspectives and analyses vital for understanding contemporary conflicts over mass consumption the conservation of biodiversity and struggles for environmental justice in Patagonia and beyond *Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History* Dominik Ohrem, 2025-11-18 Volume V covers three key areas of interaction and concern that shaped Americans relations with wild animals The sources in section one focus on hunting a practice that among early republicans was still associated with the savage existence of Indigenous peoples and regarded as incompatible with the agrarian virtues they deemed essential yet which eventually became emblematic of settler identity and masculinity and tangled up in the politics of race and class The second section examines practices and sites of animal display natural history museums zoological gardens and circus menageries for commercial or educational purposes highlighting the evolution of such displays from the private collections and traveling exhibitions of the early republican and antebellum decades into significant institutions that shaped American perceptions of wild animals A third section discusses the growing awareness of anthropogenic species extinction in U S society focusing especially on the dramatic decline of the American bison and the passenger pigeon and the cultural and political responses to these losses tracing a long nineteenth century arc that began with opposition to the very idea of extinction and concluded with Progressive Era campaigns that managed to save the bison from the brink but amounted to too little too late for the pigeon

Animals, Machines, and AI Erika Quinn, Holly Yanacek, 2021-11-08 Sentient animals machines and robots abound in German literature and culture but there has been surprisingly limited scholarship on non human life forms in German studies This volume extends interdisciplinary research in emotion studies to examine non humans and the affective relationships between humans and non humans in modern German cultural history In recent years fascination with emotions developments in robotics and the burgeoning of animal studies in and beyond the academy have given rise to questions about the nature of humanity Using sources from the life sciences literature visual art poetry philosophy and photography this collection interrogates not animal or machine emotions per se but rather uses animals and machines as lenses through which to investigate human emotions and the affective entanglements between humans and non humans The COVID 19 pandemic made us more keenly aware of the importance of both animals and new technologies in our daily lives and this volume ultimately sheds light on the centrality of non humans in the human emotional world and the possibilities that relationships with non humans offer for enriching that world Watch our talk with the editors Erika Quinn and Holly Yanacek here [https](https://www.youtube.com/watch?v=...)

youtu be RBMwXah_Om8 **Animal Attractions** Elizabeth Hanson, 2018-06-05 On a rainy day in May 1988 a lowland gorilla named Willie B stepped outdoors for the first time in twenty seven years into a new landscape immersion exhibit Born in Africa Willie B had been captured by an animal collector and sold to a zoo During the decades he spent in a cage zoos stopped collecting animals from the wild and Americans changed the ways they wished to view animals in the zoo Zoos developed new displays to simulate landscapes like the Amazon River basin and African forests Exhibits similar to animals natural habitats began to replace old fashioned animal houses But such displays are only the most recent effort of zoos to present their audiences with an authentic experience of nature Since the first zoological park opened in the United States in Philadelphia in 1874 zoos have promised their visitors a journey into the natural world And for more than a century they have been popular places for education and recreation every year more than 130 million Americans go to zoos to look at the animals and enjoy a day outdoors The first book length history of American zoos *Animal Attractions* examines the meaning of nature in the city by looking at the ways zoos have assembled and displayed their animal collections Situated literally and culturally in the American middle landscape zoos are concrete expressions of longstanding tensions between wildness and civilization science and popular culture education and entertainment In their efforts to promote nature appreciation they reveal much about how our culture envisions the natural world and the human place in it and how these ideas have changed

Kafka's Zoopoetics Naama Harel, 2020-05-04 Nonhuman figures are ubiquitous in the work of Franz Kafka from his early stories down to his very last one Despite their prominence throughout his oeuvre Kafka's animal representations have been considered first and foremost as mere allegories of intrahuman matters In recent years the allegorization of Kafka's animals has been poetically dismissed by Kafka's commentators and politically rejected by posthumanist scholars Such critique however has yet to inspire either an overarching or an interdiscursive account This book aims to fill this lacuna Positing animal stories as a distinct and significant corpus within Kafka's entire poetics and closely examining them in dialogue with both literary and posthumanist analysis *Kafka's Zoopoetics* critically revisits animality interspecies relations and the very human animal contradistinction in the writings of Franz Kafka Kafka's animals typically stand at the threshold between humanity and animality fusing together human and nonhuman features Among his liminal creatures we find a human transformed into vermin in *The Metamorphosis* an ape turned into a human being in *A Report to an Academy* talking jackals in *Jackals and Arabs* a philosophical dog in *Researches of a Dog* a contemplative mole like creature in *The Burrow* and indiscernible beings in *Josefine the Singer or the Mouse People* Depicting species boundaries as mutable and obscure Kafka creates a fluid human animal space which can be described as humanimal The constitution of a humanimal space radically undermines the stark barrier between human and other animals dictated by the anthropocentric paradigm Through denying animalistic elements in humans and disavowing the agency of nonhuman animals excluding them from social life and neutralizing compassion for them this barrier has been designed to regularize both humanity and animality The

contextualization of Kafka's animals within posthumanist theory engenders a post anthropocentric arena which is simultaneously both imagined and very real

The Georgian Menagerie Christopher Plumb, 2015-06-26 In the eighteenth century it would not have been impossible to encounter an elephant or a kangaroo making its way down the Strand heading towards the menagerie of Mr Pidcock at the Exeter Change Pidcock's was just one of a number of commercial menagerists who plied their trade in London in this period the predecessors to the zoological societies of the Victorian era As the British Empire expanded and seaborne trade flooded into London's ports the menagerists gained access to animals from the most far flung corners of the globe and these strange creatures became the objects of fascination and wonder Many aristocratic families sought to create their own private menageries with which to entertain their guests while for the less well heeled touring exhibitions of exotic creatures both alive and dead satisfied their curiosity for the animal world While many exotic creatures were treasured as a form of spectacle others fared less well turtles went into soups and civet cats were sought after for ingredients for perfume In this entertaining and enlightening book Plumb introduces the many tales of exotic animals in London

Through the Lion Gate Gary Bruce, 2017 In the first English language history of the Berlin zoo Gary Bruce traces the fascinating story of one of Germany's most popular cultural institutions from its 19th century displays of exotic peoples to Nazi attempts to breed back long extinct European cattle As an institution with broad public reach the zoo for more than 150 years shaped German views not only of the animal world but of the human world far beyond Germany's borders

vulnerability and dependence Several chapters demonstrate that in the frequently horrible circumstances of war powerful sympathies nonetheless flourish between humans and animals Animals and War thus exposes the often paradoxical contours of human animal relationships

Posthumanism Pramod K. Nayar, 2014 This timely book examines the rise of posthumanism as both a material condition and a developing philosophical ethical project in the age of cloning gene engineering organ transplants and implants Nayar first maps the political and philosophical critiques of traditional humanism revealing its exclusionary and speciesist politics that position the human as a distinctive and dominant life form He then contextualizes the posthumanist vision which drawing upon biomedical engineering and techno scientific studies concludes that human consciousness is shaped by its co evolution with other life forms and our human form inescapably influenced by tools and technology Finally the book explores posthumanism s roots in disability studies animal studies and bioethics to underscore the constructed nature of normalcy in bodies and the singularity of species and life itself As this book powerfully demonstrates posthumanism marks a radical reassessment of the human as constituted by symbiosis assimilation difference and dependence upon and with other species Mapping the terrain of these far reaching debates Posthumanism will be an invaluable companion to students of cultural studies and modern and contemporary literature

Public Garden Management: a Global Perspective Bijan Dehgan, 2014-04-16 Public Gardens Management A Global Perspective provides essential information about public gardens and what is involved in designing managing and maintaining one Although suitable as a textbook its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen It may also prove useful for homeowners for there is no fundamental difference between growing plants in a public garden or a home garden a fact reflected in the extensive reference citations The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he she was in a natural but well ordered garden environment Thus began the art of garden making Many volumes have been

written on every applicable subject discussed in this and similar publications Indeed the voluminous literature on history design horticulture and numerous related subjects is nothing short of overwhelming Accordingly anyone involved in management of public gardens whether as a director or area supervisor and irrespective of the type and size of such facility would have to have familiarity with various aspects of garden organization and administration However despite the enormous number and diversity of such publications there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book These volumes provide the essential background information on plants animals management maintenance fundraising and finances as well as history art design education and conservation They also cover a host of interrelated subjects and responsible organization of such activities as creating a childrens garden horticultural therapy conservatories zoological gardens and parks hence administration of multidimensional public gardens Nearly 500 full color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management The 15 chapters begin with the need for public gardens types of public gardens historical backgrounds as well as design diversity Numerous quotations are included from many garden lovers landscape architects philosophers and others The authors primary aim in writing this book was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all animals need plants for their survival Visitors of zoological gardens expect to see more than just animals zoos are landscaped grounds Moreover most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks A number of public gardens are currently referred to as botanical and zoological garden Population density and the publics desires and expectations as well as financial requirements are among the reasons for some major city parks such as Golden Gate in San Francisco Central Park in New York City and Lincoln Park in Chicago which integrate botanical or zoological divisions as well as museums and recreational facilities While this book attempts to provide basic principles involved in public garden management it does not claim to be a substitute for broader familiarity
