*Shaping the Shoreline* Connie Y. Chiang, 2009-11-17 The Monterey coast home to an acclaimed aquarium and the setting for John Steinbeck's classic novel *Cannery Row* was also the stage for a historical junction of industry and tourism *Shaping the Shoreline* looks at the ways in which Monterey has formed and been formed by the tension between labor and leisure Connie Y Chiang examines Monterey's development from a seaside resort into a working class fishing town and finally into a tourist attraction again Through the subjects of work recreation and environment the intersections of which are applicable to communities across the United States and abroad she documents the struggles and contests over this magnificent coastal region By tracing Monterey's shift from what was once the literal *Cannery Row* to an iconic hub that now houses an aquarium in which nature is replicated to attract tourists the interactions of people with nature continues to change Drawing on histories of immigration unionization and the impact of national and international events Chiang explores the reciprocal relationship between social and environmental change By integrating topics such as race ethnicity and class into environmental history Chiang illustrates the idea that work and play are not mutually exclusive endeavors

*Reno's Big Gamble* Alicia Barber, 2023-05-19 When Pittsburgh socialite Laura Corey rolled into Reno Nevada in 1905 for a six month stay her goal was a divorce from the president of U S Steel Her visit also provided a provocative glimpse into the city's future With its rugged landscape and rough edged culture Reno had little to offer early twentieth century visitors besides the gambling and prostitution that had remained unregulated since Nevada's silver mining heyday But the possibility of easy divorce attracted national media attention East Coast notables and Hollywood stars and soon the Reno Cure was all the rage Almost overnight Reno was on the map Alicia Barber traces the transformation of Reno's reputation from backward railroad town to the nationally known Sin Central as Garrison Keillor observed a place where you could see things that you wouldn't want to see in your own hometown Chronicling the city's changing fortunes from the days of the Comstock Lode she describes how city leaders came to embrace an identity as *The Biggest Little City in the World* and transform their town into a lively tourist mecca Focusing on the evolution of urban reputation Barber carefully distinguishes between the image that a city's promoters hope to manufacture and the impression that outsiders actually have Interweaving aspects of urban identity she shows how sense of place promoted image and civic reputation intermingled and influenced each other and how they in turn shaped the urban environment Quickie divorces notwithstanding Reno's primary growth engine was gambling modern casinos came to dominate the downtown landscape When mainstream America balked Reno countered by advertising tax freedom and natural splendor to attract new residents But by the mid seventies unchecked growth and competition from Las Vegas had initiated a downslide that persisted until a carefully crafted series of special events and the rise of recreational tourism began to attract new breeds of tourists Barber's engaging story portrays Reno as more than a second string Las Vegas having pioneered most of the attractions gaming and prizefighting divorces and weddings that made the larger city

famous As Reno continues to remold itself to weather the shifting winds of tourism and growth Barber s book provides a cautionary tale for other cities hoping to ride the latest consumer trends [Preservation Virginia's Most Endangered Historic Sites List](#): Justin Sarafin, Preservation Virginia,2014-12-23 The following compilation of Most Endangered Historic Sites listings is composed of the first two years of the program 2000 and 2002 when it was administered bi annually by the Preservation Alliance of Virginia and following the merger of that organization with Preservation Virginia in 2004 annual lists from 2005 to the present The following updates and status reports for each listing are believed to be current as of the posting of this document in August 2014 Where available pertinent links to news stories and reports are included to help contextualize listings but are in no way exhaustive Each listing has also been graded into four categories as a quick way to reference its current status While the particulars of each site or issue are unique and nuanced the following four categorizations can be used to approximately characterize each listing SAVED The immediate threat to a resource has been overcome and is not likely to reappear in the foreseeable future LOST The resource has been demolished or its integrity altered enough to jeopardize its register eligibility STILL ENDANGERED The threat present at the time of listing is still active unresolved and or could likely reappear in the foreseeable future WATCH LIST The resource is not currently actively endangered but may still face threats and should continue to be monitored [Border Walls Gone Green](#) John Hultgren,2015-10-15 How is it that self identified environmental progressives in America can oppose liberalizing immigration policies Environmentalism is generally assumed to be a commitment of the political left and restrictionism a commitment of the right As John Hultgren shows the reality is significantly more complicated American environmentalists have supported immigration restrictions since the movement first began in the late 1800s and anti immigration arguments continue to attract vocal adherents among contemporary mainstream and radical greens Border Walls Gone Green seeks to explain these seemingly paradoxical commitments by examining what is actually going on in American debates over the environmental impacts of immigration It makes the case that nature is increasingly being deployed as a form of walling which enables restrictionists to subtly fortify territorial boundaries and identities without having to revert to cultural and racial logics that are unpalatable to the political left From an environmental point of view the location of borders makes little sense the Mexican landscape near most border crossings looks exactly like the landscape on the American side And the belief that immigrants are somehow using up the nation s natural resources and thereby accelerating the degradation of the environment simply does not hold up to scrutiny So Hultgren finds the well intentioned efforts of environmentalists to sustain America are also sustaining the idea of the nation state and in fact serving to reinforce exclusionary forms of political community How then should socially conscious environmentalists proceed Hultgren demonstrates that close attention to the realities of transnational migration can lead to a different brand of socio ecological activism one that could be our only chance to effectively confront the powerful forces producing ecological devastation and social injustice *Almanac of*
