*The Correspondence of Charles Darwin: Volume 2, 1837-1843* Charles Darwin,Frederick Burkhardt,1985 This is the second volume of the complete edition of The Correspondence of Charles Darwin For the first time full authoritative texts of Darwin s letters are available edited according to modern textual editorial principles and practice The letters in this volume were written during the seven years following Darwin s return to England from the Beagle voyage It was a period of extraordinary activity and productivity in which he became recognised as a naturalist of outstanding ability as an author and editor and as a professional man with official responsibilities in several scientific organisations During these years he published two books and fifteen papers and also organised and superintended the publication of the Zoology of the Voyage of HMS Beagle for which he described the locations of the fossils and the habitats and behaviour of the living species he had collected Busy as he was with scientific activities Darwin found time to re establish family ties and friendships and to make new friends among the naturalists with whom his work brought him into close contact In November 1838 two years after his return Darwin became engaged to his cousin Emma Wedgwood whom he subsequently married      Holy Feast and Holy Fast Caroline Walker Bynum,1988-01-07 In the period between 1200 and 1500 in western Europe a number of religious women gained widespread veneration and even canonization as saints for their extraordinary devotion to the Christian eucharist supernatural multiplications of food and drink and miracles of bodily manipulation including stigmata and inedia living without eating The occurrence of such phenomena sheds much light on the nature of medieval society and medieval religion It also forms a chapter in the history of women Previous scholars have occasionally noted the various phenomena in isolation from each other and have sometimes applied modern medical or psychological theories to them Using materials based on saints lives and the religious and mystical writings of medieval women and men Caroline Walker Bynum uncovers the pattern lying behind these aspects of women s religiosity and behind the fascination men and women felt for such miracles and devotional practices She argues that food lies at the heart of much of women s piety Women renounced ordinary food through fasting in order to prepare for receiving extraordinary food in the eucharist They also offered themselves as food in miracles of feeding and bodily manipulation Providing both functionalist and phenomenological explanations Bynum explores the ways in which food practices enabled women to exert control within the family and to define their religious vocations She also describes what women meant by seeing their own bodies and God s body as food and what men meant when they too associated women with food and flesh The author s interpretation of women s piety offers a new view of the nature of

medieval asceticism and drawing upon both anthropology and feminist theory she illuminates the distinctive features of women's use of symbols Rejecting presentist interpretations of women as exploited or masochistic she shows the power and creativity of women's writing and women's lives Musical Record and Review Dexter Smith, Lorin Fuller Deland, Philip Hale, Thomas Tapper, 1879 **Elliptic Carleman Estimates and Applications to Stabilization and Controllability, Volume II** Jérôme Le Rousseau, Gilles Lebeau, Luc Robbiano, 2022-04-22 This monograph explores applications of Carleman estimates in the study of stabilization and controllability properties of partial differential equations including quantified unique continuation logarithmic stabilization of the wave equation and null controllability of the heat equation Where the first volume derived these estimates in regular open sets in Euclidean space and Dirichlet boundary conditions here they are extended to Riemannian manifolds and more general boundary conditions The book begins with the study of Lopatinskiĭ Sapiro boundary conditions for the Laplace Beltrami operator followed by derivation of Carleman estimates for this operator on Riemannian manifolds Applications of Carleman estimates are explored next quantified unique continuation issues a proof of the logarithmic stabilization of the boundary damped wave equation and a spectral inequality with general boundary conditions to derive the null controllability result for the heat equation Two additional chapters consider some more advanced results on Carleman estimates The final part of the book is devoted to exposition of some necessary background material elements of differential and Riemannian geometry and Sobolev spaces and Laplace problems on Riemannian manifolds *Reading Faithfully, Volume 2* Hans W.
