It showcases fifty-four clocks, watches, and other timekeeping devices, each represented with an in-depth description and new photography of the exterior and the inner mechanisms. Among these masterpieces is an ornate sixteenth-century celestial timepiece that accurately predicts the trajectory of the sun, moon, and stars; an eighteenth-century longcase clock by David Roentgen that shows the time in the ten most important cities of the day; and a nineteenth-century watch featuring a penetrating portrait of Czar Nicholas I of Russia. Created by the best craftsmen in Austria, England, Flanders, France, Germany, Italy, the Netherlands, and Switzerland, these magnificent timepieces have been selected for their remarkable beauty and design as well as their sophisticated mechanics. Built upon decades of expert research, this publication is a long overdue survey of these stunning visual and technological marvels.

**Restoring Grandfather Clocks** Eric Smith, Brian Smith, 1995-03-01 The grandfather clock, an entirely new kind of furniture, first appeared in the late seventeenth century. From then on, with its long case to protect pendulum and weights, its rugged movement, and large, clear indication of time, it has been a success story right up to the present day. Virtually none of these clocks is beyond repair, and often the work required is within the scope of inexperienced owners. This is the first full-length book to cover repair and restoration of these attractive and often valuable antiques, including their casework. The first part outlines how to clean and service the clock works and also how to refurbish the dial, while in the second part, restoration or casework, both structural repairs and finishing are considered. The illustrations are of two actual clocks, one eight-day and one thirty-hour, and work proceeding on them. The last part of the book sketches common variations from these particular examples. Armed with this book and appropriate tools for work on both movement and case, the owner of a dilapidated grandfather clock will be encouraged and given the know-how to restore it to life as a useful and attractive clock and a prized possession.

Science's Strangest Inventions Tom Quinn, 2015-06-04 The history of science is littered with mad, bad, and delightfully dotty inventions: from the bicycle that relied for its momentum on the rider wagging his head back and forth continually to the Improved Pneumatic Advertising Hat, a bowler that hurled a lit-up billboard into the air at the touch of a button, or the suitcase that turned into a small boat for the nervous ferry passenger. Here is the chance to sample among other delights: Professor Ray's Nose Adjusting Machine; Admiral Popov's Circular Warship; The Perfect Sleeping Partner, a Japanese pillow shaped just like a man with an arm fitted at the right angle for a comforting cuddle; and last but by no means least, Calantariet's Improved Dung Trap for Carriage Horses Employed by Ladies of Fashion and those of a Delicate Constitution.

Clock Cases Nigel Barnes,Karoliina Ilmonen,2015-09-30 This practical informative and beautifully illustrated book will be essential reading for all those with a passion for mechanical clocks It will be of particular interest to both amateurs and professionals alike who wish to work on clock cases and restore them in the correct way according to modern best practice The authors both experienced horological restorers examine in detail the restoration processes and provide detailed descriptions and a wealth of photographs and diagrams Difficult and often misunderstood areas of restoration and conservation are explained in the context of twenty first century thinking The haphazard approach to clock case restoration which has continued in some quarters almost to the present day is no longer considered appropriate for preservation of the rapidly dwindling stock of clocks that represent our horological heritage Accordingly the authors emphasize that sensitive and sympathetic clock case restoration is essential and indeed is the most economically attractive approach to adopt The book outlines the history of the main types of clock case made up to about one hundred years ago and considers clock case woods and woodworking and some of the special techniques involved in clock case construction restoration and conservation It demonstrates how a new clock case can be constructed provides a clock case restoration study and describes the restoration of a number of other wooden clock cases Covering both stone and metal clock cases of the 19th and 20th centuries and including a useful appendix which provides guidelines for restoring and conserving horological objects this is an essential resource for all those
