Space, Place and Territory Fabio Duarte, 2017-01-12 Space place and territory are concepts that lie at the core of geography and urban planning environmental studies and sociology Although space place and territory are indeed polysemic and polemic they have particular characteristics that distinguish them from each other They are interdependent but not interchangeable and the differences between them explain how we simultaneously perceive conceive and design multiple

spatialities After drawing the conceptual framework of space place and territory the book initially explores how we sense space in the most visceral ways and how the overlay of meanings attached to the sensorial characteristics of space change the way we perceive it smell spatial experiences using electroencephalography and the changing meaning of darkness are discussed The book continues exploring cartographic mapping not as a final outcome but rather as an epistemological tool an instrument of inquiry It follows on how particular ideas of space place and territory are embedded in specific urban proposals from Brasilia to the Berlin Wall airports and infiltration of digital technologies in our daily life The book concludes by focusing on spatial practices that challenge the status quo of how we perceive and understand urban spaces from famous artists to anonymous interventions by traceurs and hackers of urban technologies Combining space place and territory as distinctive but interdependent concepts into an epistemological matrix may help us to understand contemporary phenomena and live them critically

Design Review Brenda C. Scheer, Wolfgang F.E. Preiser, 2012-12-06 That the topic of design review is somehow troubling My biases are clear from the start I am among those who believe that despite all signals to the contrary the physical structure of our environment agrees on Beyond this however I suspect prospects of consensus are dim Differing opinions must be managed and that controlling it is on the subject likely range from those desiring the key to the amelioration of numerous problems control to those desiring freedom Say one can confront society today I believe that design our physical and natural environments are going can solve a host of problems and that the design to hell in a hand basket Says the other design of the physical environment does influence be review boards are only as good as their members have more often than not their interventions produce Clearly this is a perspective that encompasses mediocre architecture more than one building at a time and demands As a town planner and architect I am sympathetic that each building understand its place in a larger context to the full range of sentiment Perhaps a context the city Indeed anyone proposing discussion of these two concepts control and physical solutions to urban problems is designing freedom and their differences would now be or as may seem more often the case destroying useful But let me instead suggest that both position the city

Mastine Nisbett, 2011 Dean Nisbett has crafted an excellent book that is carefully researched He is a masterful storyteller combining theology sociology history scripture and church architecture into a masterpiece Writing about the struggle of a suburban parish to build an edifice the author cites numerous parallels between the Israelites history and that of the parish He recasts the Israelites story into the contemporary making the Bible relevant in demonstrating the ongoing work of God Nisbett explores the struggle of African Americans to be integrated into the United States of America He addresses the tension between West Indians and black Americans and notes the latter s significant contribution to the Episcopal Church He recognizes the indelible contribution of the first African Americans who penetrated the white enclave of Cambria Heights Recognition is also made of black Episcopalians for their valuable contribution to the society and for challenging the church to be honest to its Catholicity insisting that they black Episcopalians be included into the Body of Christ The author explicates the concept of vocation the call to serve God in His church He shares his personal

experience Very inspiring A must read for those contemplating the ordained ministry The book integrates the Church into the life of the community It is an excellent tool for congregational development and could serve as a model for congregations to chronicle their history from a theological perspective In addition the book will be useful to those researching the history of the ordination of black Episcopalians and the birth of the black Episcopal congregation in the United States It is a wonderful resource for those considering church construction Finally the author theologizes the building and provides a helpful manual for every worshiper whom the author in reference to 1st Peter describes as living stones built upon the foundation of Jesus Christ The chief Corner Stone Linking Architecture and Education Anne Taylor, 2009-05-16 For the past forty years Anne Taylor has studied how schools classrooms playgrounds homes museums and parks affect children and how they learn As a result she has developed a holistic sustainable philosophy of learning environment design She argues persuasively that architects must integrate their design knowledge with an understanding of the developmental needs of learners while at the same time educators parents and students must broaden their awareness of the built natural and cultural environment to maximize the learning experience In other words schools and other environments can themselves become three dimensional textbooks When architects are cognizant of newer models of education and educators view the environment as more than a box in which to teach prescribed lessons the result is an informed architecture that enables children to discover the power of their own learning The book presents numerous examples of dynamic designs that are the result of interdisciplinary understanding of place Taylor includes designer perspectives forums derived from commentary by outside contributors involved in school planning and a wealth of photographs of thoughtful and effective solutions to create learning environments from comprehensive design criteria Because the concept of school is enlarged to a community campus the book also spawns a new model of teaching and learning This book is essential reading for educators architects and community members who are anxious to transform education in America and elsewhere Anne Taylor is the most outstanding educator leading proponent and practitioner in the three dimensional textbook field Her work is the finest resource available for connecting students young and old to their learning environments and visa versa Edward E Kirkbride NCARB REFP Before Western man divided the universe into discrete subject matter areas the order in the universe was and still is both interdisciplinary and holistic The branching of trees spiraling of shells meandering of streams and the radial designs of flowers for example represent an analogy of mathematics biology and art The current artificial separation of subject matter is in contrast to the way the world is constructed and the way children perceive it Architecture and the study of the built natural and cultural environment synthesize the world of material things and the world of ideas Further more it helps us to realize that we are a part of not apart from the environment This book is a tool and a gift to designers educators and students everywhere to assist them in seeing the meaning behind all that we view and use for living on earth To know our precious relationship to our surroundings is the intent of this book In this way life is a work of art and each of us is an artist Anne Taylor **William C.**

Brocklesby: A Connecticut Valley Architect in the Gilded Age Bill Ranauro, 2023-07-07 The late nineteenth century known commonly as the Gilded Age produced some of the most beautiful yet controversial architecture in America's history. The great influencers of the period including Richard Upjohn, Henry Hobson Richardson, and Charles McKim each spread the gospel of his own architectural style. The result was an eclectic mix of styles that some detested but that others embraced. Caught in the struggle to find an architecture America could claim as its own, Hartford, Connecticut architect William Brocklesby carved out his own stylistic path. In an age when the taste for ostentation and pretension was adopted by many, William Brocklesby produced some of the most dignified and beautiful architecture in the Connecticut Valley. His churches, libraries, and theaters remain as artistic landmarks throughout western New England, and his work at colleges from Hartford to Amherst, Massachusetts, make for some of the most picturesque college campuses in America. This book serves as a companion to the author's earlier book, *Asher Benjamin: American Architect*. Author/Artist Taken together, the two books provide a view of developments in American architecture from 1790 to 1910.

The Architecture of William C. Brocklesby Hailing from Hartford, Connecticut, architect William C. Brocklesby (1847-1910) spent his career designing beautiful yet dignified churches, libraries, and public buildings throughout the Connecticut River Valley and western New England. Working in an age when ostentation was the rule rather than the exception, Brocklesby maintained a restrained hand in the application of ornament. His design of Forbes Library in Northampton, Massachusetts, stands out as a monument to his ability as a design architect. In addition, William Brocklesby was among a handful of nineteenth-century architects who made the Connecticut River Valley the birthplace of the prototypical American college campus. Working largely within the vision of the famed American landscape architects Andrew Jackson Downing and Frederick Law Olmstead, Brocklesby and others built campuses that were meant to mimic the traditional New England village. Through the designs of the college buildings by Peabody and Stearns and William Brocklesby, Smith College's architectural history traces the development of late nineteenth-century styles.

Architecture Depends Jeremy Till, 2013-02-08 Polemics and reflections on how to bridge the gap between what architecture actually is and what architects want it to be. Architecture depends on what. On people, time, politics, ethics, mess, the real world. Architecture, Jeremy Till argues with conviction in this engaging, sometimes pugnacious book, cannot help itself; it is dependent for its very existence on things outside itself. Despite the claims of autonomy, purity, and control that architects like to make about their practice, architecture is buffeted by uncertainty and contingency. Circumstances invariably intervene to upset the architect's best-laid plans at every stage in the process, from design through construction to occupancy. Architects, however, tend to deny this, fearing contingency and preferring to pursue perfection. With *Architecture Depends*, architect and critic Jeremy Till offers a proposal for rescuing architects from themselves: a way to bridge the gap between what architecture actually is and what architects want it to be. Mixing anecdote, design, social theory, and personal experience, Till's writing is always accessible, moving freely between high

and low registers much like his suggestions for architecture itself **An Illustrated Guide to Tactical Diagramming** Sid Heal, 2005-11 This book is not about construction although you will learn about building codes and practices It is not about tactics although the information gained by knowing a floor plan will undoubtedly affect them Instead this book is designed to provide a quick and simple method of confidently determining floor plans by using outside architectural features It assumes no knowledge of construction or tactics and is designed to be useful whether it is read cover to cover or occasionally referred to as a reference It provides time tested tried and true principles that any tactician can use to determine avenues of approach observation and fields of fire obstacles and cover or concealment not to mention where a suspect might be most vulnerable Using this essential tool for quick and clear comprehension of tactical diagramming even a novice tactical planner will learn to use windows doors vents and other clues to confidently determine interior features After reading this book it will be clear that the proverbial glass house is in the mind's eye **Architecture Competitions and the Production of Culture, Quality and Knowledge** Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 Winner of the 2016 Bronze medal in Architecture Independent Publisher Book Awards This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research In 2015 it constitutes the most comprehensive survey of the dynamics behind the definition organization judging archiving and publishing of architectural landscape and urban design competitions in the world These richly documented contributions revolve around a few questions that can be summarized in a two fold critical interrogation How can design competitions these historical democratic devices both praised and dreaded by designers be considered laboratories for the production of environmental design quality and ultimately for the renewing of culture and knowledge Includes 340 illustrations bibliographical references and index of over 200 cited competitions Keywords Architecture International competitions Architectural judgment Design thinking Digital archiving databases Architectural publications Architectural experimentation Landscape architecture Urban studies **Experiencing Art and Architecture** Sanda Iliescu, 2022-03-22 In this multidisciplinary book Sanda Iliescu articulates a rich multi faceted approach to the aesthetic experience Through in depth discussions of her own lived encounters with art architecture and the world around her she advocates a way of looking that blends sensory perception formal analysis social and political consciousness and personal memory Focusing special attention on the aesthetic concept of the figure ground problem the author challenges this foundational principle's presumed hierarchies and shows how a new and more dynamic understanding of it can enhance our way of looking at and understanding art and architecture Works discussed in the book include a wide range of contemporary and historic art and architecture among them artworks by Rembrandt Matisse Eva Hesse and David Hammons architecture by Zaha Hadid Peter Zumthor and Weiss Manfredi and non Western works such as a thirteenth century Chinese vase and the Ry anji dry garden in Kyoto Japan Personal and engaging this book is for a wide audience of those practicing studying or with an interest in the creative fields from beginners to seasoned professionals From Life to

Architecture, to Life Tim Ireland, 2024-01-18 The book establishes a correlation between architectural theory and the biosemiotic project and suggest how this coupling establishes a framework leading to an architectural biosemiotic paradigm that puts biosemiotic theory at the heart of cognising the built environment and offers an approach to understanding and shaping the built environment that supports and benefits human and organismic spatial intelligence **Learning to Look**
