Longleaf , *Looking for Longleaf* Lawrence S. Earley, 2005-10-12 Covering 92 million acres from Virginia to Texas the longleaf pine ecosystem was in its prime one of the most extensive and biologically diverse ecosystems in North America Today these magnificent forests have declined to a fraction of their original extent threatening such species as the gopher tortoise the red cockaded woodpecker and the Venus fly trap Conservationists have proclaimed longleaf restoration a major goal but has it come too late In *Looking for Longleaf* Lawrence S Earley explores the history of these forests and the astonishing biodiversity of the longleaf ecosystem drawing on extensive research and telling the story through first person travel accounts and interviews with foresters ecologists biologists botanists and landowners For centuries these vast grass covered forests provided pasture for large cattle herds in addition to serving as the world s greatest source of naval stores They sustained the exploitative turpentine and lumber industries until nearly all of the virgin longleaf had vanished *Looking for Longleaf* demonstrates how in the twentieth century forest managers and ecologists struggled to understand the special demands of longleaf and to halt its overall decline The compelling story Earley tells here offers hope that with continued human commitment the longleaf pine might not just survive but once again thrive Green Chemistry Avant La Lettre: The

Pine Institute And Resin Chemistry In Aquitaine (1900-1970) Marcin Krasnodebski, 2024-07-16 Long before the foundations of the concept of sustainability were laid down and green chemistry became a hot topic chemists had already been looking for alternative feedstocks hoping to liberate the industry from its dependency on fossil fuels This book examines one such story Near the largest French forest in the southwest of the country in Aquitaine a network of entrepreneurs of chemists established in the early 20th century the Pine Institute This curious institution working at the interface of academia and industry explored new uses for pine resin It is used to produce not only solvents glues and paper but also rocket fuels The pine resin has been one of the most versatile raw materials known to humanity This book not only explains the success of the material itself but also of the scientific industrial network that made it possible to exploit it sustainably over many decades Did the Pine Institute find a recipe for making the future more sustainable in the post oil world It carefully examines its organisational features relations with the local economy as well as the core elements of resin chemistry as an independent

discipline prefiguring sustainable chemistry of today This unique book constitutes an original and pioneering work on the origins of some of the ideas that are being labeled today as green or sustainable chemistry It establishes a bridge between two worlds explaining in detail the history of a sustainable scientific discipline in its institutional and economic setting accounting for the complexity of the relations between stakeholders and of the knowledge circulation patterns In other words the book fills a gap in the emerging field of social studies of scientific sustainability

The Cow-Hunter

Charles Hudson, 2014-10-07 A poor Scottish immigrant finds work and Shakespearean drama on a ranch in the backcountry of colonial South Carolina in this novel Vividly set in the rich pluralistic culture and primeval landscape of colonial South Carolina this historical novel brings to life and back into our memory the birth of free range cattle herding that would later come to be associated exclusively with the American West Drawing on his accomplished career as a leading scholar of the anthropology and history of the early South Charles Hudson weaves a compelling tale of adventure and love in the colorful tapestry of Charles Town taverns backcountry trails pinewoods cattle ranges hidden villages of remnant native peoples river highways rice plantations and more Hudson's narrative revolves around William MacGregor a young Scottish immigrant trying to establish himself in the New World A lover of philosophy and Shakespeare William is penniless which leads him to take work as a cow hunter colonial cowboy for a pinder colonial rancher of a cowpen colonial ranch in the Carolina backcountry The pinder an older man with three daughters sees his world unraveling as he ages The parallel to King Lear does not escape William who gets caught up in the family drama as he falls in love with the pinder's youngest daughter Except for the boss of his crew who is the pinder's son in law William's fellow cow hunters are slaves an old Indian captured in Spanish Florida a Fulani captured in Africa and two brothers half Indian and half African who were born into slavery in the New World A rogue bull adds a chilling element of danger and the romance is complicated by a rivalry with a wealthy rice planter's son William struggles to salvage something from the increasingly disastrous

situation and the King Lear like dissolution of the cowpen proceeds apace as the story heads toward its conclusion With an ethnohistorian's attention to context and detail Charles Hudson has written a compelling novel about the eighteenth century Carolina backcountry and its memorable characters the likes of whom the documentary record rarely reveals Theda Perdue professor emerita of history University of North Carolina Chapel Hill Whether trudging through the dismal swamps riding through the solitary longleaf forest or just hanging out at the cowpen Hudson renders the life of an eighteenth century Southern cow hunter's life palatable and real With a true sense of place and time Hudson brings the little known colonial South Carolina backcountry to spectacular life Robbie Ethridge professor of anthropology The University of Mississippi
