NATO's strategic thinking on deterrence and escalation. He discusses the relation between arms control considerations and the strategic defense initiative focusing on NATO fears that SDI would lead to the abrogation of the 1972 ABM Treaty and with it the end of the arms control process. Turning to antitactical missile defense, Soifer argues that despite political opposition there exists a substantial strategic rationale for missile defenses deployed in Western Europe. Offering clarification and new perspectives on many complex defense issues, *Missile Defenses and Western European Security* will be an important contribution to the current debate on how new weapons initiatives will affect prospects for world peace. This timely book is for specialists, students and academics in the fields of strategic studies, peace studies, arms control, diplomacy and international relations.

*Soviet Ballistic Missile Defense and the Western Alliance* David Scott Yost, 1988. Yost suggests that the challenges for Western policy posed by Soviet ballistic missile defense (BMD) programs stem partly from Soviet military programs, Soviet arms control policies and Soviet public diplomacy campaigns and partly from the West's own intra-alliance disagreements and lack of consensus about Western security requirements.

***Sdi And European Security*** Regina Cowen, Peter Rajcsanyi, Vladimir Bilandzic, F. Stephen Larrabee, 2019-09-16. Originally published in 1987, European concerns about strategic defense and its impact on the stability of the East-West strategic balance have been the subject of frequent and lively discussion at the Institute for East-West Security Studies in the more than four years since President Reagan announced his Strategic Defense Initiative (SDI) in March.

***NATO and European Security*** Alexander Moens, Lenard J. Cohen, Allen G. Sens, 2003-03-30. From the end of the Cold War to the terrorist attacks on the United States in September 2001, the NATO Alliance has changed profoundly. This book explores the multifaceted consequences of NATO's adjustment to new international and domestic political and security realities. Internal Alliance politics and matters of relative power within the membership have strongly influenced recent NATO developments. Several major issues challenging the Alliance are examined, including how the impact of efforts to develop an enhanced common European security and defense policy have affected NATO, whether missile defense is driving the United States and its European allies closer or further apart, how the experience of NATO in the Balkans and elsewhere brought alliance members together or made NATO cohesion more difficult to maintain and in what way the changing role of NATO has influenced American and Canadian participation in the Alliance. An important guidepost to pivotal changes and likely NATO developments, scholars and policymakers of Atlantic and international politics will find these meditations indispensable. A number of authors also speculate on the likely changes for the alliance that will ensue in the wake of the September 11 terrorist attacks and the possibility that NATO will soon modify its mission and responsibilities in reaction to the threat of international terrorism. Indeed, many of the same strategies and strains that affected NATO cohesion over the past decade are likely to complicate efforts to maintain Alliance unity as part of the anti-terrorist coalition.

health crisis from spawning security crises Braze concludes by outlining NATO's 2030 vision which prioritizes making the Alliance stronger politically as well as extending its global reach Discussing the future of the transatlantic relationship in a declining liberal world order Senior Advisor to the President of Turkey Gülnur Aybet argues that the policies of certain allies have forced Turkey to become a self help state Aybet illustrates a revised and inclusive liberal world order in which Turkey is understood in its own context and thus approached accordingly Other topics taken up in this issue are the consequences of the INF Treaty's demise and NATO's digital public diplomacy efforts Several of our authors discuss NATO's expansion policy including North Macedonia's recent accession as the Alliance's 30th member and the prospective memberships of Ukraine and Georgia

European Security in the 1990s W. Laqueur, L. Sloss, 2013-11-11 Rarely if ever have the political economic and military foundations of the Western Alliance been in such a state of flux Walter Laqueur and Leon Sloss therefore deserve credit not just for the quality of the analysis in this superb book but also for the timeliness of its appearance As Laqueur says in his chapter Touring the Western European Defense Horizon if the likely development of European defense policies is not particularly reassuring at least it gives no grounds for despair The list of problems we face is a daunting one First there is the spiralling cost of defense expenditures particularly in the absence of significant NATO or inter European cooperation This is particularly serious in light of the reluctance to increase or even maintain current expenditures in the midst of Mikhail Gorbachev's peace offensive and the extraordinary changes in Eastern Europe both of which have had a dramatic impact on Western public opinion There is also a problem in the perceived relative economic decline of the United States vis a vis Western Europe and Japan which only exacerbates calls to reduce the number of American troops in Europe Other dangers to the political cohesion and military credibility of the alliance include demographic trends that threaten current manpower levels transatlantic acrimony over the burden sharing issue and political pressures particularly in West Germany toward denuclearization and even neutralism
