Consideration of this case exposes the limitations of global health frameworks that implicitly posit rich countries as the only sites of knowledge production. Analysis of iThemba identifies the problems inherent in global north south divides at the same time as it highlights what is at stake in who makes knowledge and where. It also provides a concrete example for consideration of the contexts and practices of postcolonial science, its constraints and its promise. Synthesizing Hope explores the many legacies that create conditions of possibility for South African drug discovery, especially the specific form of settler colonialism characterized by apartheid and resource extraction. Paying attention to the infrastructures and laboratory processes of drug discovery underscores the materiality of pharmaceuticals from the perspective of their makers and tracing the intellectual and material infrastructures of South African drug discovery contributes new insights about larger social, political and economic orders.

It offers a comprehensive analysis of scientific collaboration and its relation to development and the productivity of scientists with specific reference to South Africa in both the past and the present.

Can South and Southern Africa become Globally Competitive Economies? Gavin Maasdorp, 2016-07-27 Sub-Saharan Africa is the only region in the world where the population is worse off today than it was 20 years ago. Thus global interest has shifted away from Africa and Africa is referred to as the marginalised continent. But is this decline inevitable or is it reversible? The papers in this book attempt to answer this question, examining policies to avoid marginalisation and ensure that Southern Africa, the most promising part of the continent and South Africa, its engine of economic growth, become competitive in the new world trade order.

The Ambiguous Champion Linda

Freeman,1997 The Ambiguous Champion is the First Comprehensive and critical study of Canadian foreign policy towards South Africa Freeman challenges the conventional belief that successive Canadian governments took the high road leading the international struggle against apartheid She shows that Canadian policy like the policy of other Western states was complex ambiguous and contradictory Freeman s approach offers an alternative understanding of the forces shaping Canadian foreign policy Legend has it that Canadian prime ministers from Diefenbaker to Mulroney led the way in the international campaign against the apartheid state in South Africa Yet before Mulroney came to power except on a few occasions in the Commonwealth Canadian prime ministers did little to support the anti apartheid cause While Mulroney did significantly better invoking concrete economic sanctions and tackling Margaret Thatcher within the Commonwealth the policies of his government were compromised and limited the claims made for it excessive The state championed a cause but followed through in a highly ambiguous way Central to the explanation is an exploration of the influence groups within civil society especially the private sector on the formation of state policy Attention is also given to the way which churches trade unions universities anti apartheid groups and the media played in calling for a stronger Canadian policy against apartheid The approach offers an alternative way of understanding how foreign policy is made which goes beyond the South African case The Ambiguous Champion will challenge scholars in Canada and abroad in their analyses of relations with South Africa It is a major contribution to both the history and theory of Canadian foreign policy *Discovery and Innovation* ,1998
