 to the world for so long there has yet to be an all inclusive study on their administrative systems until now In *Public

Globalization and India's Economic Integration Baldev Raj Nayar, 2014-11-12 A common critique of globalization is that it causes economic segmentation and even disintegration of the national economy Quite to the contrary Baldev Raj Nayar provides a thorough empirical treatment of India's political economy that challenges this critique by demonstrating that on balance both state and market have functioned to attenuate such a disintegrative impact and to accentuate economic integration The active role of the Indian state in the areas of economic planning fiscal federalism and tax reform has resulted in improved economic integration and not increased segmentation Similarly his investigation of trade investment entrepreneurship and migration suggests tendencies inherent in the market in favor of economic integration especially when assisted by the state While globalization has its benefits such as higher economic growth and costs such as external shocks Nayar's findings show that India has benefited from globalization more than it has been victimized by it Globalization and India's Economic Integration shows how globalization's pressures favoring efficiency paradoxically induced the state to push for consolidation on a pan Indian scale in the area of fiscal federalism and to advance the cause of the common market through reforming the indirect tax system meanwhile the state has pressed forward with social inclusiveness as never before in its economic planning For another the market too has been instrumental because of its widened scope and its inherently expanding character in strengthening economic integration through trade expansion diffusion of industry and increased inter state migration Nayar's groundbreaking work will interest students scholars and specialists of India South Asia globalization and political economy

Continuity and Change in Contemporary Capitalism Herbert Kitschelt, 1999-01-13 In the early 1980s

many observers argued that powerful organized economic interests and social democratic parties created successful mixed economies promoting economic growth full employment and a modicum of social equality The present book assembles scholars with formidable expertise in the study of advanced capitalist politics and political economy to reexamine this account from the vantage point of the second half of the 1990s The authors find that the conventional wisdom no longer adequately reflects the political and economic realities Advanced democracies have responded in path dependent fashion to such novel challenges as technological change intensifying international competition new social conflict and the erosion of established patterns of political mobilization The book rejects however the currently widespread expectation that internationalization makes all democracies converge on similar political and economic institutions and power relations Diversity among capitalist democracies persists though in a different fashion than in the Golden Age of rapid economic growth after World War II
