Redemption Carne Maxwell,2020-11-01 Going back is never easy But sometimes you have to go back to move forward It has been nine years since the contest but for some of the contestants it feels like yesterday When they all receive an invitation to return to the island of Samimoto some say a return would be too painful while others see going back as a necessary cleansing to help them move on with their lives Will going back be a time to relax and bring redemption for those still seeking it Or will it unlock the secrets and lies that have been buried to protect those still living These are secrets and lies that if revealed could turn their lives upside down and tear their worlds apart When an abduction takes place back in New Zealand suspicions grow and point to one person but all is not what it seems Detective Sergeant Wood and Constable Banks are brought in to solve the case but as they learn more about the contestants a tangled web of untruths and deceit hinders their investigation making them question their every move

**Invisible Digital** Aylish Wood,2024-01-11 Invisible Digital helps us makes sense of something we cannot see by presenting an innovative approach to digital images and digital culture At its heart is a novel method for exploring software used in the creation of moving images as markers of converging cultural organizational and technological influences The three main case studies of Invisible Digital are the animated feature *Moana* 2016 and the computer games *No Man s Sky* 2016 and *Everything* 2017 All three were created using procedural techniques simulation software for *Moana* and procedural content generation for *No Man s Sky* and *Everything* Production culture disclosures associated with procedural techniques often emphasize the influences of automated systems and their algorithms making them ideal for a study that interrogates digital processes The approach of Invisible Digital is informed by relational theories and the concept of entanglement based on materialist perspectives combined with insights from work that more explicitly interrogates algorithms and algorithmic culture Aylish Wood employs the notion of assemblages to introduce the concept of material cultural narratives Using this

conceptual framework she draws out material cultural narratives for each case study to demonstrate what they reveal about software and digital culture These analyses of software provide a widely applicable method through which moving image studies can contribute more fully to the wider and growing debates about algorithmic culture

**Preaching Must Die!** Jacob D. Myers, 2017-10-18 The real question for homiletics in our increasingly postmodern post Christian contexts is not how we are going to prevent preaching from dying but how we are going to help it die a good death Preaching was not made to live At most preaching is a witness a sign a crimson X marking a demolition site The church has developed sophisticated technologies in modernity to give preaching the semblance of life belying the truth preaching was born under a death sentence It was born to die Only when preaching embraces its own death is it able to live This book then is a bold homiletical manifesto against preaching in support of preaching and beyond preaching to the entire worship experience It troubles modern homiletical theologies in light of the trouble always already at work within preaching Hereby it supports a way of preaching and teaching preaching that moves counter to the wisdom of this world It aims to joins in God s self revealed counterlogic of superabundance that saturates and thereby breaks open worldly systems of thought and practice The purpose of this book is to expose preaching to its own death to help it embrace its death so that it can discover what eternal and abundant life might look and feels like
