**Linda Tsung**

## **Mode 1 Students:**

*Language Power and Hierarchy* Linda Tsung, 2014-10-27 Shunning polemicism and fashioning a new agenda for a critically informed yet practically orientated approach this book explores aspects of multilingual education in the People's Republic of China PRC Amongst other issues it also looks at the challenges associated with bilingual and trilingual education in Xinjiang and Tibet as well as the mediation between religion and culture in multi ethnic schools covering these issues from a range of perspectives Korean Uyghur Tibetan Mongolian and Yi The PRC promotes itself as a harmonious stable multicultural mosaic with over 50 distinct ethnic groups striving for common prosperity Beneath this rhetoric there is also inter ethnic discord with scenes of ethnic violence in Lhasa and Urumqi over the last few years China has a complex system of multilingual education with dual pathway curricula bilingual and trilingual instruction specialised ethnic schools This education system is a lynchpin in the Communist party state's efforts to keep a lid on simmering tensions and transform a rhetoric of harmony into a critical pluralistic harmonious multiculturalism This book examines this supposed lynchpin

**THE COMPLETE PHI LEARNING GUIDE TO MATHEMATICS FOR JEE(MAIN)** PREM KUMAR, 2012-10-11 This book is designed to aid students in their preparation for JEE Main It is a well planned study guide which shows through examples and challenging questions how to think analytically and find a way to the mysteries of problem solving The book leads students through a broad spectrum of levels of difficulty with the intention that they will be able to crack their examinations successfully **HIGHLIGHTS** The topic wise concepts of the subject matter have been explained in each chapter for ease of recapitulation by the students Each chapter contains nearly 180 solved problems from the routine to the intriguing to test reinforce and expand the understanding of the concepts presented Each chapter contains a large variety of questions to hone the analytical and reasoning skills of students The book contains three sets of mock test papers and one fully solved sample paper for practice **Online Learning and its Users** Claire McAvinia, 2016-04-25 Online Learning and Its Users Lessons for Higher Education re examines the impact of learning technologies in higher education The book focuses particularly on the introduction and mainstreaming of one of the most widely used the virtual learning environment VLE or learning management system LMS The book presents an activity theoretic analysis of the VLE's adoption drawing on research into this process at a range of higher education institutions Through analysis and discussion of the activities of managers lecturers and learners using the VLE lessons are identified to inform future initiatives including the implementation of massive open online courses MOOCs A replicable research design is included and explained to support evaluation and analysis of the use of online learning in other settings The book questions accepted views of the place of technologies in higher education arguing that there has been a repeated cycle of hype and disappointment accompanying the development of online learning While much research has documented this cycle finding new strategies to break it has proved to be a more difficult challenge Why has technology not made more impact Are lecturers going to be left behind by their own

students in the use of digital technologies Why have we seen costly and time consuming failures This book argues that we can answer these questions by heeding the lessons from previous experiences with the VLE and early iterations of the MOOC More importantly we can begin to ask new and different questions for the future to ensure better outcomes for our institutions and ultimately our learners Presents institution wide analysis of the adoption of a key educational technology for higher education validated across multiple sites to support deeper understanding of the use of learning technologies in context Describes Activity Theory and presents a replicable model to operationalise it for investigations of the use of online learning in higher education and other settings Provides a unique perspective on the historical experience of VLE adoption and mainstreaming to identify important insights and essential lessons for the future *Creating Dynamic Places for Learning* Peter C. Lippman, Elizabeth A. Matthews, 2023-08-22 This book showcases how an evidence based design approach can be utilized in the planning of learning environments by acknowledging the interconnectedness of research practice and theory as core considerations in the design of learning environments Toward this end this volume explores a multi disciplinary perspective that draws upon modern learning theories and empirical research from the fields of environmental psychology education and architectural practice By presenting this information in an accessible manner it enables researchers educators and designers to take actionable steps needed to re imagine their settings and create dynamic places for learning **Technology, E-learning and Distance Education** A.W. (Tony) Bates, 2005-08-02 This update to the award winning first edition analyzes the pros and cons of different media and focuses on general guidelines and basic principles making the ideas in this guide transferable to future technologies **Universal Access in Human-Computer Interaction.
