the model life now involves a great deal of physical and virtual management of the body or what Wissinger terms glamour labor. Wissinger argues that glamour labor, the specialized modeling work of self-styling, crafting a look, and building an image, has been amplified by the rise of digital media as new technologies make tinkering with the body's form and image easy. Models can now present self-fashioning, self-surveillance, and self-branding as essential behaviors for anyone who is truly in the know and in fashion. Countless regular people make it their mission to achieve this ideal, not realizing that technology is key to creating the unattainable standard of beauty the model upholds, and as Wissinger argues, this has been the case for decades before Photoshop even existed. Both a vividly illustrated historical survey and an incisive critique of fashion media, *This Year's Model* demonstrates the lasting cultural influence of this unique form of embodied labor.
