Wallwork,2011-04-01 Publishing your research in an international journal is key to your success in academia This guide is based on a study of referees reports and letters from journal editors on reasons why papers written by non native researchers are rejected due to problems with English usage It draws on English related errors from around 5000 papers written by non native authors 500 abstracts by PhD students and over 1000 hours of teaching researchers how to write and present research papers With easy to follow rules and tips and with examples taken from published and unpublished papers you will learn how to prepare and structure a manuscript increase readability and reduce the number of mistakes you make in English by writing concisely with no redundancy and no ambiguity plan and organize your paper and structure each paragraph and each sentence so that the reader can easily follow the logical build up towards various conclusions write a title and an abstract that will attract attention and be read decide what to include in the various parts of the paper Introduction Methodology Discussion etc select from over 700 useful phrases highlight your claims and contribution avoid plagiarism and make it 100% clear whether you are referring to your own work or someone else s choose the correct tenses and style active or passive Other books in the series English for Presentations at International Conferences English for Academic Correspondence and Socializing English for Research Usage Style and Grammar English for Academic Research Grammar Vocabulary Writing Exercises Adrian Wallwork is the author of more than 20 ELT and EAP textbooks He has trained several thousand PhD students and academics from 35 countries to prepare and give presentations Since 1984 he has been revising research papers and in 2009 he set up englishforacademics com a proofreading and editing service specifically for researchers

Writing Human Factors Research Papers Don Harris,2016-12-05 Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it However many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented It is one thing to write a good scientific paper however it is quite another thing to get it published This requires some additional nous In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn t The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful All major points are illustrated with examples from his own published works The book is

written in the form of a manual for constructing a journal manuscript read a chapter write a section However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments Each chapter concludes with a checklist to ensure all the key elements have been addressed

Writing and Publishing Science Research Papers in English Karen Englander, 2013-10-11 This book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts It deals with both English and non Anglophone science writers and presents a global perspective and an international focus The book collects and synthesizes research from a range of disciplines including applied linguistics the sociology of science sociolinguistics bibliometrics composition studies and science education This multidisciplinary approach helps the reader gain a solid understanding of the subject Divided into three parts the book considers the context of scientific papers the text itself and the people involved It explains how the typical sections of scientific papers are structured Standard English scientific writing style is also compared with science papers written in other languages The book discusses the strengths and challenges faced by people with different degrees of science writing expertise and the role of journal editors and reviewers

, Teaching Academic Writing in European Higher Education Lennart Björk, Gerd Bräuer, L. Rienecker, Peter Stray Jørgensen, 2005-12-30 DAVID R RUSSELL English Department of Iowa State University U S A I was fortunate to attend as a visitor from the U S the first European Association for the Teaching of Academic Writing EATAW conference in 2001 at Groningen I was struck by the similarities in the challenges higher education faces on both sides of the Atlantic in terms of developing students academic writing and students learning through writing It is indeed an international problem But I was equally struck by the profound differences in responding to these challenges among nations institutions disciplines and even

within disciplines The essays in this traordinary volume address a growing demand for help with academic writing on the part of students and academic staff alike And they do so in ways that bring fresh approaches not only to Europeans who have only recently begun to study academic writing but also to researchers and academic staff in the U S where we have a c tury old tradition of attention to the problem but are much in need of these fresh approaches Academic writing has become a problem in higher education all around the world because higher education sits smack between two contradictory pressures On one end far more students and far more diverse students come streaming into higher education bringing in a far greater diversity of linguistic resources often interpreted as standards are falling as Frank Haacke Tente point out Writing Scientific Research Articles Margaret Cargill,Patrick O'Connor,2013-06-04 This book shows scientists how to apply their analysis and synthesis skills to overcoming the challenge of how to write as well as what to write to maximise their chances of publishing in international scientific journals The book uses analysis of the scientific article genre to provide clear processes for writing each section of a manuscript starting with clear story construction and packaging of results Each learning step uses practical exercises to develop writing and data presentation skills based on reader analysis of well written example papers Strategies are presented for responding to referee comments and for developing discipline specific English language skills for manuscript writing and polishing The book is designed for scientists who use English as a first or an additional language and for individual scientists or mentors or a class setting In response to reader requests the new edition includes review articles and the full range of research article formats as well as applying the book s principles to writing funding applications Web support for this book is available at www.writerresearch.com.au *The Quick Fix Guide to Academic Writing* Phillip C. Shon,2017-10-30 Whether you re writing a paper essay assignment or dissertation this short and punchy book helps you improve your writing skills through minimal effort Providing you with a quick set of writing rules to follow this tried and tested guide uses a unique and easy to follow grid based system Packed with advice on understanding big and little common errors made in academic writing it helps you identify patterns in your own writing and demonstrates how to reshape or re evaluate them and raise your writing game in any academic context How to tutorials include Synthesizing and critiquing literature and using your coding sheet to develop critical arguments Shaping abstracts introductions discussions and conclusions to improve the logic and structure of your writing Applying lessons learned to future projects whatever format of academic writing Save time and improve your grades with this essential quick fix guide The Student Success series are essential guides for students of all levels From how to think critically and write great essays to planning your dream career the Student Success series helps you study smarter and get the best from your time at university **Resources in Education** ,1999 **A Writer's Reference with Writing in the Disciplines** Diana Hacker,Nancy Sommers,2011-04-08 With Writing in the Disciplines Cover **Writing and Publishing a Scientific Research Paper** Subhash Chandra Parija,Vikram Kate,2017-07-28 This book covers all essential aspects of writing scientific

research articles presenting eighteen carefully selected titles that offer essential must know content on how to write high quality articles The book also addresses other rarely discussed areas of scientific writing including dealing with rejected manuscripts the reviewer s perspective as to what they expect in a scientific article plagiarism copyright issues and ethical standards in publishing scientific papers Simplicity is the book s hallmark and it aims to provide an accessible comprehensive and essential resource for those seeking guidance on how to publish their research work The importance of publishing research work cannot be overemphasized However a major limitation in publishing work in a scientific journal is the lack of information on or experience with scientific writing and publishing Young faculty and trainees who are starting their research career are in need of a comprehensive guide that provides all essential components of scientific writing and aids them in getting their research work published
