## **Model For Calculating Interconnection Costs In Telecommunications:**

*A Model for Calculating Interconnection Costs in Telecommunications* Paul Numba Um, 2004 The proposed cost model takes into account most features characterizing the development stage of telecommunications networks in Sub Saharan Africa small size of fixed network importance of rural telephony excessive reliance on microwave technology explosive demand for mobile service and weak regulatory capacity **BOOK JACKET** [The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets](#) Rachel Alemu, 2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda's sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets **Telecommunication Markets** Brigitte Preissl, Justus Haucap, Peter Curwen, 2009-06-12 Telecommunication markets are characterized by a dynamic development of technology and market structures The specific features of network based markets convergence of previously separate spheres and the complex task of market regulation put traditional theoretical approaches as well as current regulatory policies to the test This book sheds light on some of the challenges ahead It covers a vast range of subjects from the intricacies of market regulation to new markets for mobile and internet related services The diffusion of broadband technology and the emergence of new business strategies that respond to the technological and regulatory challenges are treated in the book's 24 chapters [Business Information Systems Workshops](#) Witold Abramowicz, Angelika Kokkinaki, 2014-09-30 This book constitutes the refereed proceedings of the five workshops that were organized in conjunction with the International Conference on Business Information Systems BIS 2014 which took place in Larnaca Cyprus in May 2014 The 27 papers in this volume were carefully reviewed and selected from 53 submissions and were revised and extended after the event The workshop topics covered applications and economics of knowledge based technologies AKTB business and IT alignment BITA digital currencies DC

modern applications of business information systems MODAPP and tools for setting up and running a business in cloud computing TSRB In addition a keynote paper is included in this book *OECD Reviews of Regulatory Reform: Regulatory Reform in Italy 2001* OECD,2001-04-04 OECD s 2001 review of regulatory reform in Italy **Down to the Wire** Allan L. Shampine,2003 In recent years regulators and businesses have struggled to keep pace with an onslaught of new technologies that has dramatically changed the world s telecommunications networks This book gathers together research intended for those who must grapple with these changes the people who must decide whether and how to deploy new telecommunications technologies and those who must regulate the technologies The research is divided into three sections focusing on the past present and future of telecommunications innovations The first section Lessons from the Past examines what lessons concerning adoption and regulation can be learned by studying the diffusion of recent telecommunications technologies The second section Decision Making with Respect to Diffusing Technologies examines possible improvements to the decision making processes used by companies and regulators in the face of limited information and dynamic markets The final section Public Policy and Future Diffusion examines public policy implications for future technologies **Toward A Competitive Telecommunication Industry** Gerald W. Brock,2013-10-18 Providing an authoritative perspective on the best current research regarding telecommunication policy this book is based on the 22nd Annual Telecommunications Policy Research Conference The papers focus on the critical policy issues created by increasing competition in the industry The book contains a careful analysis of local competition and interconnection international competition universal service issues the Internet and emerging new methods of communication and the first amendment problems created by changing telecommunication technology It brings together in a convenient form a wide range of important scholarship on telecommunication policy that otherwise would require extensive research into a variety of journals government filings and unpublished papers

revolution resulting from the deregulation and new competitive opportunities represented by the 1997 World Trade Organisation Agreement on Basic Telecommunications Services This may be true Unfortunately however the actions of many regulators and industry participants more accurately reveal not a telecoms revolution but instead a growing telecoms trade war that is dangerously close to spiralling out of hand In this book Naftel and Spiwak review U S and European competition and regulatory initiatives post WTO and provide both a useful roadmap to today s U S EU and WTO telecoms regulation and an examination of various case studies to illustrate their points In so doing the authors discover unfortunately the sad reality that despite the political rhetoric regulators on both sides of the Atlantic have eschewed innovative and indeed productive solutions to create a market structure conducive to long term competitive rivalry Instead the authors demonstrate that current policies reveal a growing cynicism towards the maximisation of consumer welfare that will be difficult if not outright impossible to remove FCC Record United States. Federal Communications Commission,2004 *European Competition Law Annual 1998* Claus-Dieter Ehlermann,2000-09-14 Presenting academic papers and edited transcripts of panel discussions first presented at the Third Workshop on European Competition Law held in Florence in 1998 this volume provides insight into the debate of whether governments or the European Union should intervene to prevent powerful firms from abusing their control of critical gateways between consumers and communication information services The volume s three sections consisting of a panel discussion accompanied by from nine to 12 academic papers are organized into three themes regulating access to bottlenecks agreements integration and structural remedies and institutions and competence Panel participants include professors of economics law and telecommunications lawyers specializing in European trade and telecommunications law policy trade and technology advisors and consultants and others Distributed by ISBS c Book News Inc **Networking and Telecommunications: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2010-01-31 This multiple volume publications exhibits the most up to date collection of research results and recent discoveries in the transfer of knowledge access across the globe Provided by publisher
