## **Number Activities For Children With Mathematical Learning Difficulties:**

*Number* Mel Lever, 2013-10-23 First Published in 2003 This short series of three books *Number* *Shape and Space* and *Measures and Handling Data* gives teachers and parents a range of ideas to help children with mathematical learning difficulties get to grips with mathematics In order to help these children effectively statements and teaching points need to be rephrased and produced in a variety of ways using concrete and pictorial aids The activities in these books will help teachers to offer children a wide ranging mathematical vocabulary adding meaning to the words children already use rather than just adding words to their repertoire these activities are flexible and can be used in any order with children of a range of ages and ability Activities focusing on number includes early counting activities acquisition and use of number bonds using the 100 square in understanding the four rules of number and number patterns strategies to help with place value an introduction to Maths Monster and activities to help memory training

**Measures and Handling Data** Mel Lever, 2013-01-11 First Published in 2003 This book offers practical advice to those students of maths who don't understand it and don't like it The author asks So what shall we do about it This is what makes her books so helpful they give parents and teachers practical ideas they can use First addressing the question of the types of difficulty encountered she then moves on to overcoming the difficulty

*Shape and Space* Mel Lever, 2013-01-11 Activities focusing on shape and space include symmetry shapes and patterns properties of shapes points of the compass angle and turn measurement of angles and use of compass and protractor and coordinates

*Mathematics for Children with Severe and Profound Learning Difficulties* Les Staves, 2013-12-19 The book will covers a wide range of approaches to teaching and learning and demonstrates how mathematics can be related to personal and social development communication and thinking skills Written with the non specialist in mind and including plenty of practical examples it will make useful reading for teachers in mainstream and special schools and learning support assistants Early years practitioners and teachers in training may find the book useful for its descriptions of how children acquire their foundation of early mathematics and numeracy skills

**Effective Teaching Strategies for Dyscalculia and Learning Difficulties in Mathematics** Marie-Pascale Noël, Giannis Karagiannakis, 2022-03-28

*Effective Teaching Strategies for Dyscalculia and Learning Difficulties in Mathematics* provides an essential bridge between scientific research and practical interventions with children It unpacks what we know about the possible cognitive causation of mathematical difficulties in order to improve teaching and therefore learning Each chapter considers a specific domain of children's numerical development counting and the understanding of numbers understanding of the base 10 system arithmetic word problem solving and understanding rational numbers The accessible guidance includes a literature review on each topic surveying how each process develops in children the difficulties encountered at that level by some pupils and the intervention studies that have been published It guides the reader step by step through practical guidelines of how to assess these processes and how to build an intervention to help children master them

Illustrated throughout with examples of materials used in the effective interventions described this essential guide offers deep understanding and effective strategies for developmental and educational psychologists special educational needs and or disabilities coordinators and teachers working with children experiencing mathematical difficulties *Math Instruction for Students with Learning Difficulties* Susan Perry Gurganus,2021-11-29 This richly updated third edition of Math Instruction for Students with Learning Difficulties presents a research based approach to mathematics instruction designed to build confidence and competence in preservice and inservice PreK 12 teachers Referencing benchmarks of both the National Council of Teachers of Mathematics and Common Core State Standards for Mathematics this essential text addresses teacher and student attitudes towards mathematics as well as language issues specific mathematics disabilities prior experiences and cognitive and metacognitive factors Chapters on assessment and instruction precede strands that focus on critical concepts Replete with suggestions for class activities and field extensions the new edition features current research across topics and an innovative thread throughout chapters and strands multi tiered systems of support as they apply to mathematics instruction

**International Handbook of Mathematical Learning Difficulties** Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This

comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Special Educational Needs and Disabilities in Schools Janice Wearmouth,2021-08-12 Special Educational Needs and Disabilities in Schools is an essential resource designed to support you during and beyond your teaching training to understand assess and address special and or additional educational needs and disabilities SEND In addition to the expected updates throughout to the latest research and legislation new developments include expanded discussions of key topics such as bullying social emotional and mental health detailed coverage of planning for transition across the age ranges suggestions of hardware and software for day to day use and use in exam conditions increased focus on the importance of positive and supportive relationships Drawing on her wealth of experience close contact with schools families and students as well as relevant research Janice Wearmouth explores a wide range of approaches to assess and address the most common forms of SEND These include difficulties in communication and cognition behavioural concerns related to social emotional and mental health sensory and or physical needs and literacy and numeracy difficulties The author uses key questions to introduce each chapter and reflective activities to encourage you to consider your own practice to ensure that all young people reach their potential She illustrates policy and provision for SEND in a highly authentic and engaging way with a range of exemplars vignettes and personal accounts of young people s and families experiences within the field and provides a wealth of additional resources on the companion website
